

RECEIVED
CITY CLERK
C & C OF HONOLULU

Item #3
Resolution 12-57

2012 APR -2 AM 8:49

Concerning Resolution 12-57 Labeling of genetically modified food for human consumption

From Dora Chang, 2449 Sonoma St., Honolulu, 96822; e-M: akekua@yahoo.com, constituent of Anne Kobayashi.

I would like to encourage the city council to pass from committee the resolution 12-57 and then vote to pass it in the city council. People should be able to know what they are getting in their food and to be able to have the contents labelled to show if any of the ingredients are genetically modified. If GMO food is good then people will choose it, but if people have objections to GMO food then they can avoid it. It should be up to the shoppers to be able to choose. DC
