

Aloha Councilmembers,

I'm writing in regards to your resolution calling for labeling of GMOs. I oppose such a mandate and ask that you NOT support it. This kind of government regulation is unnecessary, and worse, will make it more expensive for me to buy food for my family. The cost of new labeling will be passed on to consumers, and my taxpayer dollars will be spent to enforce it. I'd rather see that money go toward improving education, or doing something helpful for the economy. I don't have any concerns about GMO foods, but if people want to avoid them, there are lots of products already labeled as organic or that say they don't contain any GMO ingredients. There's no need for more labeling.

Thank you for your consideration.

Respectfully,
Luly Unemori
