Subject: The right to know G.M.O.'s

Aloha,

I am a small farmer in Kahalu'u Oahu. I grow organic produce and livestock. To maintain organic certification I must ensure that the seeds I grow and the foods I feed my animals is organic. Untainted by chemicals and genetically modified organisms.

Labeling of G.M.O's must be put into effect to safeguard the health of the aina(land), the plants, animals, air, and people who call this Earth home. It is our inalienable right to have safe food, water, air, and environment! G.M.O.'s are unproven experiments that have been unleashed onto us causing devastation in there wake. You don't have to look to had to find the sicknesses and infertility occurring where G.M.O's and there accompanying chemicals occur. For instance, look at the birth defects in Vietnam and the cancerous sickness our military soldiers came home with from the use of Agent Orange. This chemical is almost identical to the chemicals in the herbicide Round UP which has been genetically spliced into the genes of our food crops! Then these crops are sprayed with more of this chemical while it grows.

Do you know what these G.M.O.'s are doing to you?
Neither do I.

So, I urge you to err on the side of caution and to pass Resolution 12-57 the mandatory labeling of Genetically Modified Organisms.

Mahalo for listening to the voice of reason.
