Subject: Council Meeting Testimony 4/25 HR 12-57

Aloha,

I am writing in support of HR 12-57. As a consumer I have the right to know whether or not the foods I purchase contain genetically modified ingredients. One reason I want to be informed is because I am allergic to many of the pesticides used in GMO production.

Also, my children may have the same allergic reactions so I need to make healthy choices on their behalf. In addition, I care about the health of my elders who could potentially be suffering from the same allergies unknowingly. Poison is not good for us, our children and our kūpuna. Please support the labeling of food products that contain genetically modified ingredients. Consumers have the right to know.

Mahalo,
Jenny Lynn
