Subject: Lable GMO'S!!!!!!!!!!!!!!

Aloha,

I wish to voice my support of Resolution 12-57. We need to label GMO's now and give the public a choice to know what they are consuming. This is simple, I want to be healthy and want the choice to choose what is good for me. Labeling does this. I demand that you all support the labeling of GMO's.

Urging the State of Hawaii and the United States Food and Drug Administration to require labeling of genetically engineered food.

Mahalo,

Jeremy
