RR 12-010

July 2, 2012

The Honorable Ernest Y. Martin, Chair
and Members
Honolulu City Council
530 South King Street, Room 202
Honolulu, Hawaii 96813

Dear Chair Martin and Councilmembers:

Subject: Report to City Council on Mandatory Business Recycling

The enclosed report is submitted to City Council in accordance with the Revised Ordinance of Honolulu, Section 9-3.1, which requires an annual report on the progress of the implementation of the mandatory recycling requirements for liquor-serving establishments and office buildings.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Steinberger", is written over a horizontal line.

Timothy E. Steinberger, P.E.
Director

Enclosure

APPROVED:

A handwritten signature in black ink, appearing to read "D. Chin", is written over a horizontal line.

Douglas S. Chin
Managing Director

RECEIVED
CITY CLERK
& C OF HONOLULU

Report on Implementation of Mandatory Business Recycling

July 1, 2012

Background / Introduction

Requirements for business recycling were established in City Ordinance in 1996. Section 9-3.1 requires the owners of liquor-serving establishments to recycle glass containers and the owners of office buildings with 20,000 square feet or more to recycle office paper, newspaper and corrugated cardboard. In doing so, these facilities cannot place those recyclable materials in the same containers as those holding refuse, or in a manner which causes or is intended to cause the collection of the recyclable material with refuse.

The “Chief,” referring to the Refuse Division Chief, is required to prepare and submit an annual report on the progress of the implementation of this subsection. The first report was submitted in July 1997.

Subsequent reports were provided orally at Council committee hearings by request of Council.

Comprehensive written reports were submitted in 2010 and 2011 to fully apprise the City Council of the details involved in implementing this program. This current report provides much the same in program and procedural description, with updates to the list of affected businesses and the findings/observations based on recent inspections.

This report is an overview of the division’s efforts to implement and maintain compliance among the affected businesses. Although not required in Ordinance, the report also includes information about the implementation of requirements stipulated in Section 9-3.5 for food waste recycling by businesses that generate large quantities of food waste, including restaurants, hotels, food courts, markets, food manufacturers and hospitals. Additionally, businesses are affected by disposal bans and restrictions on targeted materials, which are presented briefly to help round out the overall impact of recycling requirements on the commercial sector.

Affected Businesses

Recycling of targeted materials is required by law for most businesses and government agencies. Although the City encourages recycling of as many materials as possible, it requires that the regulated materials be recycled or composted and thereby diverted from City disposal sites. The commercial sector has the greatest potential to significantly increase recycling on Oahu. Businesses that generate large volumes of recyclable materials may also have an opportunity to reduce waste disposal costs when recycling is integrated into their waste management system.

Almost every large business on Oahu -- restaurants, bars, hotels, office buildings, shopping centers, retail stores, grocery stores, hospitals, food courts, food manufacturers and processors, golf courses, parks, tree trimmers, auto shops, appliance dealers -- is affected, either directly or indirectly, by the City's recycling requirements. Some of the requirements specifically identify the types of businesses that are required to set up recycling systems for targeted materials. Bars and restaurants are required to recycle glass containers; commercial office buildings, including government buildings, are required to recycle paper; and businesses that generate large amounts of food waste, including hotels, restaurants, manufacturers and hospitals, are required to recycle that waste.

Other businesses are affected indirectly by the bans and restrictions of materials at City disposal sites. Although refuse haulers are responsible for recycling/disposal compliance, the businesses that generate the waste need to insure that their refuse is within allowable disposal limits. Large generators of cardboard, including retail operations, shopping centers, grocery stores and hospitals, are affected by the restriction on cardboard; and large generators of green waste, including golf courses, hotels, condominiums and parks, are affected by the restriction on green waste.

Recycling Ordinances

Below is a summary of the mandatory recycling related ordinances. State and EPA laws are additionally noted where applicable.

Bars and restaurants serving alcoholic beverages are required to recycle glass containers, effective July 1, 1996. Local recycling companies and collectors pickup at no charge, and some pay for HI-5 deposit glass. (City Ordinance, Chapter 9-3.1)

Office buildings with 20,000 square feet or more of office space are required to recycle office paper, newspaper and cardboard, effective July 1, 1996. Local recycling companies pick up for fees which are less than waste collection/disposal. (City Ordinance, Chapter 9-3.1)

Hotels, restaurants, grocery stores, food courts, food manufacturers/processors and hospitals meeting specific size criteria defined by ordinance are required to recycle food waste, effective January 1, 1997. Collection service offered by local hog farmers and collectors for a fee. (City Ordinance, Chapter 9-3.5)

Green waste (yard trimmings) from commercial and government generators is RESTRICTED/BANNED from disposal. Commercial and government trucks are limited to a maximum of 10% green waste per load at H-POWER and Refuse Transfer Stations, and green waste is completely banned from disposal at the landfill. Local composting facilities accept this material for a fee and process it into soil amendment products. Generators are also encouraged to consider small-scale, do-it-yourself mulching and composting. Restrictions began in 1994; the ban became effective January 2003. (City Ordinance, Chapter 9-1.7)

Cardboard from commercial and government generators is RESTRICTED from disposal. Commercial and government trucks are limited to a maximum of 10% cardboard per load. Local paper recyclers pay for cardboard. Restrictions began in 1994. (City Ordinance, Chapter 9-1.7)

Tires, auto batteries, white goods and scrap metals are BANNED from all City disposal sites, effective 1994. State law bans auto batteries and whole tires, and requires dealers to take back old tires and auto batteries and recycle them. City-collected residential tires and batteries are delivered to a recycler. EPA bans white goods that contain freon. (City Ordinance, Chapter 9-1.7)

Electronic waste is BANNED from disposal, effective July 2006. Commercial and government e-waste must be processed through e-waste recycling companies. State law requiring manufacturer take-back became effective January 2010. (City Ordinance, Chapter 9-17)

City agencies are required to recycle newspaper, cardboard, office paper, aluminum, glass, and plastics through the government mandatory recycling program established in 1990 for all City agencies. (City Ordinance, Chapter 9-1.11)

The City is required to purchase recycled paper products to support the recycled paper market. Everything from toilet tissue and paper towels to copier and computer paper is purchased with recycled content. (City Ordinance, Chapter 1-12.3)

Implementation and Enforcement

Mandatory recycling affecting specific types of businesses -- glass recycling for bars and restaurants, paper recycling for office buildings, food waste recycling for hotels, grocery stores, food manufacturers/processors, food courts and hospitals -- is enforced at the point of generation. The affected businesses are sent annual compliance forms along with educational information to remind them of their responsibility to recycle. The City follows up with site inspections of businesses based on failure to return compliance forms, reported non-compliance, and request for help as well as random selection. If a business is not in compliance with the City's mandatory recycling ordinances, a Recycling Specialist will work with management to set up a recycling program or improve/correct a failing system.

The law also allows for the requirements to be suspended for any business if the cost to collect and recycle is more than the cost to collect and dispose of the targeted materials. Requests to suspend the requirements for a business are directed to the City's Recycling Branch. Each case is evaluated individually. City Recycling Specialists meet with the business, assess the problems specific to that site and work with the business to set up recycling operations. Through this evaluation and assistance process, the City's Specialist can determine whether recycling is feasible for the business and if the waiver provision should be applied.

Recycling and collection service companies that encounter businesses that are uncooperative or uninformed report those businesses to the City's Recycling Branch. City Recycling Specialists contact the business, clarify the requirements and offer assistance.

Disposal bans and restrictions on high volume recyclable materials, including green waste, cardboard, tires, auto batteries, white goods and scrap metals, are enforced at the City's disposal sites. Inspectors monitor trucks unloading at the landfill and H-POWER. By visual assessment, an inspector determines if a truckload is over the limit on restricted materials or contains any amount of banned materials. The offending vehicle can be denied access to City disposal facilities for up to two weeks per violation. The Chief of the Refuse Division determines the penalty and duration. The company, not the individual truck driver, is responsible for compliance of all trucks affiliated with the company.

Education

Outreach and education are ongoing, including the annual tip sheets mailed with the compliance forms, onsite technical assistance during inspections, technical tours, and online guidelines and resources at www.opala.org. The City collaborates with the State's Green Business Program to assist and recognize businesses for their recycling efforts.

The opala.org website is a central source of resources for businesses. Click on the link to Business Recycling from the home page to find guidelines for designing and implementing recycling programs, model programs, peer consultants, waste prevention strategies, recycling equipment vendors, recycling companies and collection services, and graphics and media to assist with employee education.

Tour de Trash, now in its 14th year, is an award-winning education program that offers a behind-the-scenes look at successful recycling programs at island businesses and recycling and waste processing operations on Oahu. Tour attendees have an opportunity to talk with business and facility managers to learn more about establishing and expanding recycling for their own operations. The City offers four full-day tours annually. Tour descriptions and schedules are online at opala.org.

WasteLine is a bimonthly e-newsletter which profiles successful community and business recycling programs, innovations and technology, and opens discussions on new directions in the City's waste management and recycling programs. Businesses (and others) can stay in the loop, talking trash, connected to all the resources

with a click of the mouse. Subscribe online at opala.org, and find current and archived stories by topic and date on the *WasteLine* blog.

The Green Channel is an interactive television channel on Oceanic Time Warner Cable 332 and on the web at opala.org, providing 24/7 viewing. ENV's programming is called "Opalavision," presenting informative messages about recycling programs on Oahu in entertaining three-minute episodes. The hosts are young, local actors, who take the viewers on journeys about how refuse travels from home to the processing centers, how schools make a difference through recycling projects such as food waste composting with worms, and how businesses are sorting out their waste for recycling.

Findings and Observations

Businesses appear to be generally supportive of recycling and are in compliance with mandatory recycling laws. The average response rate for the 2012 compliance forms is approximately 80% for glass, 75% for office paper and 70% for food waste. Follow-up inspections target the non-responding businesses first with additional sites selected at random. Businesses that do not have recycling programs are brought into compliance through the inspection process.

The goal is to “catch them recycling” not to penalize them for non-compliance. Businesses chosen for inspection are sent notices prior to the inspection to alert them that a recycling specialist will be inspecting their establishment during a specific month. Most often, if a business does not have a recycling program in place and receives an inspection notice, they will call the City’s Recycling Branch for assistance.

The vast majority of inspected businesses have recycling programs in place and are in compliance with the recycling laws. If not, the recycling inspector provides the business which educational materials and resources to implement or improve the program, and offers onsite technical assistance. A follow-up inspection is scheduled for 30 days later.

City recycling specialists noted the following during inspections conducted this past year (FY2012):

- Businesses are finding innovative ways to recycle their food waste. One produce company gives its produce waste to a farm for cow fodder and returns the cut pineapple tops to Dole for replanting.
- A poi producing facility composts the taro peelings on their North Shore farm.
- Some restaurants use leftover vegetable and meat scraps to prepare a broth base for sauces and gravies.
- Kapiolani Community College uses commercial vermicomposting (worms) and the Earth tub (specially designed enclosed composting vessel for commercial food waste).
- One business uses a special process to remove potato and carrot peelings which “evaporates” the peelings, reducing waste to a minimum.
- One of the larger produce companies regrinds their food waste to be able to maximize the storage of food waste in the carts and minimize pickups, which reduces the cost of the recycling program.
- Large catering companies, restaurants and bakeries give quality edibles to Aloha Harvest, Hawaii Food Bank and churches. These nonprofits redistribute the edibles to homeless shelters and other food distribution organizations. The food distribution chain is efficiently managed, resulting in minimal amounts of actual food disposal at City waste facilities.
- Businesses now include in-house recycling information as part of the orientation training for new employees.
- Many businesses have long-term employees who are proud of their recycling programs and keep them running efficiently.
- The recycling efforts of local businesses with parent companies that are very "green" are supported by the larger corporation which wants all locations to be environmentally friendly. Being green is good for business.

The Ordinances requiring mandatory recycling of food waste, glass, or office paper, include a provision that allows the owner of the business to petition the Chief of the Refuse Division to suspend the requirement if recycling service for the specified material is unavailable or if the cost of recycling exceeds the cost of disposal. There have been no petitions for waivers received from businesses required to recycle glass, office paper or food waste for 2012.

Glass and office paper maintain a value, making it easier to manage the program economics. Glass is subsidized by the HI-5 deposit beverage container program and the advance disposal fee for non-deposit glass. Office paper, newspaper and cardboard maintain fairly stable market values. Food waste, on the other hand, does not have a market value and requires special collection to contain and transport. Currently, local options for the majority of food waste include hog farmers and Island Commodities. Specialty organizations such as Hawaii Food Bank and Aloha Harvest handle food suitable for human consumption.

Revised Ordinances of City and County of Honolulu
Chapter 9 COLLECTION AND DISPOSAL OF REFUSE

Sec. 9-3.1 Business.

- (a) No person shall operate or maintain a business without arranging or providing for the collection of all refuse there from.
- (b) Where the collection of refuse is to be made by the division, the owner or occupant of the business shall prepare and place refuse for collection in the manner set forth in Section 9-1.4.
- (c) The owners of liquor-serving establishments shall arrange and provide for the separate collection and recycling of glass containers and the owners of office buildings shall provide for the separate collection and recycling of office paper, newspaper and corrugated cardboard. In so doing, liquor-serving establishments and office buildings shall not place those recyclable materials in the same containers as those holding refuse, or in a manner which causes or is intended to cause the collection of the recyclable materials with refuse. For the purposes of this subsection:

(1) "Liquor-serving establishment" means a business establishment that sells liquor or intoxicating liquor to be consumed on the premises of the establishment, and shall include bars, nightclubs, cabarets, taverns, and any restaurant where liquor or intoxicating liquor is sold for consumption on the premises, including restaurants within hotels and office buildings;

(2) "Liquor or intoxicating liquor" means the same as is defined in HRS Section 281-1.

(3) "Office building" means any building with, or group of connected buildings with an aggregate of, 20,000 square feet or more of office space, excluding common areas; provided that office space shall not include any portion of a building used for resort, retail or educational purposes.

An office building, as defined in this subsection, which is occupied by city agencies, in whole or in part, shall be subject to the requirements of this subsection, except where the city agencies are already participating in a recycling program under Section 9-1.11.

The owner of a liquor-serving establishment or office building may petition the chief for an exemption from the recycling requirements of this subsection in part or in full if the owner can demonstrate that the establishment or office building, as the case may be, does not generate a sufficient amount of the designated recyclable material to warrant separate collection for recycling.

The owner of a liquor-serving establishment or office building may petition the chief to suspend the applicability of this subsection to the applicant if the applicant demonstrates that recycling service for the items the applicant is required to recycle is unavailable to the applicant, or that the cost of recycling the applicable recyclable materials exceeds the cost of disposing of those same items at the HPOWER facility or the city's landfills. If the chief grants the application, the requirements of this subsection shall be suspended until such time as recycling service becomes available to the applicant, or the cost of the recycling service is less than or equal to the cost of disposal of the recyclable items at the HPOWER facility or the city's landfills. The chief shall, from time to time, review the availability and cost of the recycling service to those persons for whom the requirements of this subsection have been suspended. For the purposes of this subsection, the "cost of the recycling service" shall include only those costs that the recycler would charge the owner of a liquor-serving establishment or office building, whichever is applicable, for picking up and disposing of the items to be recycled, and the cost of disposal of the items to be recycled at the HPOWER facility or the city's landfills shall include the city's tipping fee and the cost of transporting the recyclable items to either of the aforementioned disposal facilities. If the chief determines that the requirements of this subsection shall no longer be suspended with regard to a particular liquor-serving establishment or office building, the chief shall notify the owner of the establishment or building by registered mail and such owner shall be required to recycle the appropriate items in accordance with this subsection within 60 days of receipt of the notice.

The chief may also suspend the requirements of this subsection during the period of a work stoppage or any other interruption of refuse collection service to the office buildings and liquor-serving establishments that are subject to this subsection.

The chief shall prepare and submit to the council an annual report on the progress of the implementation of this subsection. The report shall be submitted on July 1st of each year; provided that the first annual report shall be submitted on July 1, 1997.

(Sec. 9-3.1, R.O. 1978 (1983 Ed.); Am. Ord. 95-64)

Revised Ordinances of City and County of Honolulu
Chapter 9 COLLECTION AND DISPOSAL OF REFUSE

Sec. 9-3.5 Food waste recycling.

(a) The owners of the following food establishments located within the City and County of Honolulu shall: (i) arrange and provide for the separate collection of food waste and for its recycling by a recycling facility in the city; or (ii) separate food waste from all other solid waste generated by the food establishment and deliver the food waste to a recycling facility:

(1) A restaurant that occupies 5,000 square feet or more of floor area and serves 400 or more prepared meals per day based on an annualized average. If a restaurant is also a catering establishment, it shall be considered a restaurant for purposes of this section. If a restaurant has on its premises a place where the primary method of service, for all mealtimes, is food and drink orders taken and served to customers at a self-service counter, that portion of the premises devoted to the taking and serving of such food and drink orders, and any dining area serving customers of such self-service counter, shall not be counted in determining the square feet of the restaurant or the number of prepared meals served by the restaurant.

(2) A food court as defined in subsection (g). The company or entity that manages the shopping center or building where the food court is located shall be required to comply with the requirements of this section unless the owners of the food establishments in the food court are responsible for the disposal of their refuse, in which case the owners of those establishments shall be responsible for complying with this section.

(3) A hotel with a kitchen or kitchens and one or more function rooms. For the purposes of this subdivision, a "kitchen" means that place which is not part of a restaurant and where food is prepared for hotel employees or functions on the hotel's premises.

(4) A market that occupies 18,000 square feet or more of floor area.

(5) A food manufacturer or processor that occupies 5,000 square feet or more of floor area.

(6) A catering establishment that is not also a restaurant or part of a restaurant and which serves or sells 400 or more prepared meals per day based on an annualized average.

(7) A hospital which serves 400 or more prepared patient meals a day based on an annualized average.

For the purposes of this subsection, for the first year following January 1, 1997, * the annualized average number of prepared meals served or sold per day by a food establishment shall be the average number of meals prepared per day in the year prior to January 1, 1997, * for food establishments that have been in existence for one year or more prior to January 1, 1997. * For establishments that have not been in existence for that length of time prior to January 1, 1997, * the annualized average shall be determined based on the number of prepared meals served or sold per day during the first year that the food establishment has been in existence following January 1, 1997. * Except as provided above, establishments shall use the prior year's average number of prepared meals served or sold per day in determining whether they are required to recycle their food waste in accordance with this section.

[*Editor's Note: "January 1, 1997" is substituted for "the effective date of this ordinance."]

(b) This section shall not apply to any church or nonprofit organization except a hospital, as provided in subsection (a). Further, this section shall not apply to any food service establishment which offers as the primary method of service, for all mealtimes, food and drink orders taken at and served to the customer at a self-service counter; provided that this exemption shall not apply to food establishments in markets or establishments in a food court.

(c) The requirement to recycle food waste under this section shall be applicable only to the food waste from kitchens and food preparation, handling, and manufacturing or processing areas, and from dining areas where customers are served by waiters or waitresses, or where tables or meals are cleared away by employees of the business or establishment.

The requirement of this subsection shall not apply to commercial cooking oil waste or commercial FOG waste. Instead, the removal, transport, and disposal of such waste shall be subject to Chapter 14, Article 5A.

(d) A food establishment that is required to recycle food waste under this section may combine such waste with that of other establishments, or may separately collect and recycle its own food waste.

(e) All food establishments otherwise required to recycle food waste under this section shall not be required to do so if the disposal charge for disposing of food waste at a recycling facility in the city, including the cost of transporting the food waste to the facility, exceeds the tipping fee or disposal charge for disposing of waste at the HPOWER facility, as provided in Section 9-4.2, plus the cost of transporting refuse to such facility. The chief shall make this determination.

(f) The owner of a food establishment that is otherwise required to recycle food waste may petition the chief to suspend the applicability of this section to the applicant if the applicant demonstrates that recycling service for food waste is unavailable to the applicant. If the chief grants the application, the requirements of this section shall be suspended until such time as recycling service becomes available to the applicant. The chief shall, from time to time, review the availability of recycling service to food establishments for which the requirements of this section have been suspended. If the chief determines that recycling service is available and that the requirements of this section shall no longer be suspended with regard to a particular food establishment, the chief shall notify the owner of the establishment by registered mail and that owner shall be required to recycle food waste in accordance with this section within sixty days of receipt of the notice.

The chief may also, on the chief's own initiative, suspend the requirements of this section:

(1) During the period of a work stoppage or any other interruption of recycling collection service to the food establishments that are subject to this section; or

(2) Whenever the chief determines that there are inadequate recycling facilities or there is inadequate recycling capacity to dispose of the food waste being collected pursuant to this section.

(g) For the purposes of this section:

"Catering establishment" means the same as defined in Section 21-10.1.

"Composting facility" means an establishment that conducts either major or minor composting operations, as defined in Section 21-10.1.

"Food bank" means a facility that receives donations of food for redistribution to needy groups, individuals or families.

"Food court" means an area within a building or shopping center where five or more food establishments are situated and serviced by a common dining area.

"Food establishment" means a catering establishment, food court, food manufacturer or processor, hospital, hotel, market, or restaurant.

"Food manufacturer or processor" includes an establishment that generates food waste and is primarily involved in the manufacture or processing of food products, including animal products, but excluding baked goods.

"Food waste" means the same as that term is defined under the definition of "recyclable materials" in Section 9-1.2.

"Function room" means an area within a hotel where events are held at which food is served, including but not limited to wedding receptions, business meetings, conferences, banquets and parties.

"Hospital" means the same as defined in Section 21-10.1.

"Hotel" means the same as defined in Section 21-10.1.

"Market" includes establishments where fresh meat, fish or produce is prepared, handled and displayed for sale at retail or wholesale.

"Meal" includes any food item or items served as an entree at breakfast, lunch or dinner, but excludes beverages and desserts, if the beverages or desserts are served by themselves and not part of a breakfast, lunch or dinner.

"Prepared meals" means meals that have been cleaned, cooked, or otherwise prepared on the premises of the food establishment, and shall exclude prepackaged meals that are cooked or otherwise prepared elsewhere and only sold on the premises of the establishment. "Prepared meals" includes meals a portion of which have been precooked or prepared off the premises of the establishment.

"Recycling facility" includes a composting facility, waste bioconversion facility, rendering facility, pig farm or other agricultural facility that uses food waste as animal feed or for other agricultural use, or any other facility that

recycles food waste and is approved by the director for that purpose.

"Recycling service" is a service or collection of services that includes the collection and transportation of food waste to a recycling facility by a refuse hauler or other company that collects the food waste, and the recycling or reuse of that food waste by a recycling facility, which may or may not be operated by the company that collects and transports the food waste.

"Rendering facility" means an establishment that converts kitchen grease, cooking oils, meat scraps or other slaughterhouse waste, waste from meat processing plants, or any combination of the foregoing items, for use in the manufacture of such products as cosmetics, detergents, plastics, paints, tires and animal feed products.

"Restaurant" means a place of business where food is served for compensation and includes the kitchen or food preparation area of that place of business, but excludes any portion of the establishment that is a bakery serving baked goods for consumption on or off the premises of the restaurant and excludes a quick-serve food service establishment which offers as the primary method of service, for all mealtimes, food and drink orders taken at and served to the customer at a self-service counter.

"Waste bioconversion facility" means a facility where food and other organic waste are converted into useable byproducts.

(h) The department may adopt rules in accordance with HRS Chapter 91, having the force and effect of law, for the implementation, administration and enforcement of this section.

(i) Upon presentation of proper credentials, the director or the director's duly authorized representative, may enter at reasonable times any building or premises of a food establishment and inspect the books and records of a food establishment to determine compliance with the requirements of this section; provided that such entry and inspection shall be made in such a manner as to cause the least possible inconvenience to the persons in possession of the property and the owners of the food establishment; and provided further that an order of a court authorizing such entry and inspection shall be obtained prior to entry or inspection in the event that such entry or inspection is denied or resisted by the persons in possession or owners of the food establishment.

(j) On January 1, 1997* and quarterly thereafter: (1) each waste bioconversion facility in the city shall report to the refuse division on: (a) how much private refuse haulers or other companies are being charged as of the end of the quarter being reported, per unit of weight or volume, for disposing of food waste at the bioconversion facility, and how much the facility is charging per unit of weight or volume, if the facility both collected and disposed of food waste from a food establishment; (b) the amount of food waste, per unit of weight or volume, that the facility recycled during the previous quarter; and (2) each refuse hauler or other company that collects and transports food waste shall report to the refuse division on how much, per unit of weight or volume, the hauler or company charged food establishments as of the end of the quarter being reported to collect and dispose of their food waste.

(k) Nothing in this section shall preclude a food establishment from donating leftover or unsold food that is safe to consume to a food bank.

(Added by Ord. 96-20; Am. Ord. 99-32, 02-14)

[*Editor's Note: "January 1, 1997" is substituted for "the effective date of this ordinance."]

It's The Law

To be in compliance with City law, restaurants, food courts, hotels, grocery stores, food manufacturers/processors and hospitals meeting the following criteria are required to recycle food waste.

- Restaurant that occupies 5,000 square feet or more of floor area and serves 400 or more prepared meals per day
- Food court in a building or shopping center where five or more food establishments are situated and serviced by a common dining area
- Hotel with a kitchen, or kitchens, and one or more function rooms
- Grocery store that occupies 18,000 square feet or more of floor area
- Food manufacturer or processor that occupies 5,000 square feet or more of floor area
- Catering establishment which serves or sells 400 or more prepared meals per day
- Hospital which serves 400 or more prepared patient meals per day

NOTE: Meals per day are based on an annualized average

Going Green Is Good For Business

Recycling is not only the law, it is also the smart thing to do. It's good for business and good for the environment. Recycling food waste and other materials will help to extend the life of our landfill. We all need to work together to reduce waste and promote our island's sustainability for future generations.

Companies that generate large volumes of food waste have been able to derive economic benefit from recycling. Although they incur an additional cost to separately collect the food waste, that cost is counter-balanced by a reduction in their waste disposal costs. When large volumes of food waste are removed from general waste, there is an opportunity to reduce disposal costs by reducing the number of dumpsters and/or the pickup frequency.

/68-3200 www.opala.org

Collection Options

You can contract directly with the recyclers or food waste collectors. Most recyclers, such as pig farmers, as well as the collectors will charge a fee for the collection service. The Hawaii Food Bank and Aloha Harvest will pick up quality leftover food at no charge.

GLASS RECYCLING - Tips and Guidelines

You Can Recycle
All glass bottles
and jars

You Can't Recycle
Plates
Cups
Window panes

- It's The Law
- Going Green Is Good For Business
- Collection Options

It's The Law

To be in compliance with City law, liquor-serving establishments must recycle all glass bottles generated from their business including bottles with the HI5 deposit and non-deposit bottles.

- Deposit glass bottles - The majority of beverages in glass bottles from bars and restaurants (e.g. beer, wine cooler, drink mix, malt beverage) are HI-5 containers.
- Non-Deposit glass bottles include all non-beverage bottles as well as wine, spirits, liquor, and syrup bottles.

Going Green Is Good For Business

Recycling is not only the law, it is also the smart thing to do. It's good for business and good for the environment.

Recycling offers an opportunity to reduce refuse costs. If you throw all of your glass in a dumpster, you pay twice – once to haul it away and again to dispose of it. Because glass has a market value, it can often be hauled away at no charge. And with less waste in your dumpster there is an opportunity to lower your disposal cost.

Glass accounts for 60,000 tons per year of Oahu's waste stream. Recycling glass and other materials will help to extend the life of our landfill. We all need to work together to reduce waste and promote our island's sustainability for future generations.

If you have a program you are proud of and would like to be publicly recognized for your efforts, notify us and your program may be featured online in our WasteLine newsletter.

768-3200 www.opala.org

Collection Options

Collectors and recycling companies may offer various service arrangements (see list that follows). Or you can do it yourself using maintenance personnel and/or volunteer employees to take HI-5 bottles to a redemption center to redeem deposits or take all your bottles to a community recycling bin and support our local schools. Find the location of community recycling bins and redemption centers near you by going to www.opala.org.

OFFICE PAPER RECYCLING - Tips and Guidelines

You Can Recycle

Colored ledger paper including:
 Yellow legal paper
 Color stock copier paper
 Corrugated cardboard
 Newspaper

White ledger paper including:
 Copier paper
 Binder lined folder paper
 Black inked "blue" prints
Staples need not be removed

You Can't Recycle

Bindings: glued, metal, spiral
 Blue inked blueprints
 Carbon paper
 Carbonless multi-copy forms
 Envelopes
 Folders - manila or color
 Labels, adhesives, tape
 Paper bags, plates, cups
 Paper clips
 Paper towels, napkins
 Photographs
 Rubber bands
 Tissue

- It's The Law
- Going Green Is Good For Business
- What To Recycle
- Collection Options

It's The Law
 To be in compliance with City law, office buildings with 20,000 square feet or more of office space are required to recycle office paper, newspaper and corrugated cardboard.

Going Green Is Good For Business
 Recycling is not only the law, it is also the smart thing to do. It's good for business and good for the environment.

Recycling offers an opportunity to reduce refuse costs. If you throw all of your office paper, newspaper and cardboard into a dumpster, you pay twice – once to haul it away and again to dispose of it. And with less waste in your dumpster there is an opportunity to lower your disposal cost.

Paper accounts for approximately 30% of the waste stream on Oahu and in office buildings it is almost twice that amount. Recycling paper and other materials will help to extend the life of our landfill. We all need to work together to reduce waste to promote our island's sustainability for future generations.

What to Recycle
 High-grade paper (white and computer) have stable markets, are generated in larger quantities and command a higher price. Low-grade papers are in less demand, so dealers pay less (and sometimes nothing) for them. Higher volumes of the high-grade office papers can help to defray the costs to collect the low-grades, and significantly reduce your disposal costs.

768-3200 www.opala.org

Collection Options

Collection service can be provided by a refuse company, recycling company or by a small collector. A refuse hauler may offer a combined cost/pay structure to handle both your refuse and recyclable paper. In other words, the hauler would charge you for the collection of both refuse and paper, and credit you the current market value on the paper. This can reduce your overall disposal costs, or at least provide a break-even arrangement.

A recycling company as well as the small collector may charge you for the collection service and credit you the current market value on the paper or collect it at no charge/no pay. These recycling businesses base their charges on the volume of paper generated, current value of the paper and fuel costs. When you select a recycler, you should discuss lowering your disposal costs with your refuse hauler, once your recycling program is underway.

- **Refuse Haulers**

It is best to start with your current refuse hauler. Check on line or the yellow pages of your phone book for refuse haulers.

- **Recycling Companies**

Honolulu Recovery Systems	842-3602
Island Recycling	682-9200
RRR Recycling Hawaii	682-5600

- **Shredding Companies**

ENV OVERVIEW

Business Recycling

Many Oahu businesses are already engaged in recycling. Recycling at work can reduce cost as well as reducing waste on Oahu. Most Oahu businesses are affected by one or more of the City's mandatory recycling laws or regulations. If your business needs assistance in getting started or improving your recycling program, this website offers the following resources:

Inspection Procedures for Mandatory Recycling Compliance

- I. **Pre-inspection**
 1. Select businesses for inspection from mandatory recycling data bases (food waste, glass, and office).
 2. Create and mail inspection notices
 3. Contact businesses to schedule a day and time range
 4. Create inspection schedule

- II. **Inspection Process**
 1. Ask for a briefing of their recycling efforts and a tour of the facility.
 Explain purpose. Example: I'm here to check your compliance with the mandatory recycling laws. Your business is required to recycle glass and food waste (or other). I would like to see your recycling program. The inspection will take approximately 15 minutes. If you cannot accompany me, please have someone show me around, and I would like to speak with you again after the inspection.
 2. Site inspection
 - a. **Glass**
 1. Check bar site(s) for separate collection
 2. Check collector pickup location - look inside bins
 3. Check refuse dumpsters for glass
 5. Ask for name of collector
 6. Encourage the business to reduce the amount of contamination
 7. Offer suggestions/assistance (may include collector information, peer consultant for a similar business, appropriate fact sheets, training tips)
 - b. **Foodwaste**
 1. Check kitchen for separate collection from preparation area and dining areas where meals are cleared away by employees of the business
 2. Check collector pickup location
 3. Check refuse dumpsters for food waste
 4. Ask for name of collector
 5. Offer suggestions/assistance (may include collector information, peer consultant for a similar business, appropriate fact sheets, training tips)
 - c. **Office paper**
 1. Check generation points for separate collection containers (e.g., photocopy machine, computer center, individual desks)
 2. Check collector pickup location
 3. Check refuse dumpsters for office paper
 4. Ask for name of collector
 5. Offer suggestions/assistance (may include collector information, peer consultant for a similar business, appropriate fact sheets, training tips)

- IV. **Site closure**
 1. Complete Mandatory Recycling Compliance Inspection form. Get name (printed), title and signature of manager or contact person.
 2. Leave original of form with manager or senior person on property

- V. **Post-inspection**
 1. Update appropriate database with information from copies of notices
 2. Schedule follow-up visit, if needed (NOTE: same inspector should do follow-up.)
 3. Copy of notice is scanned using Optical Character Recognition and placed in DocuShare

INSPECTION NOTICE

Your business is required to be in compliance with the following mandatory recycling law:

- Revised Ordinance of City & County of Honolulu Sec. 9-3.1 requires the owners of **liquor-serving establishments** to arrange and provide for the separate collection and recycling of **glass** containers.
- Revised Ordinance of City & County of Honolulu Sec. 9-3.1 requires owners of **office buildings** with 20,000 square feet or more of office space to provide for the separate collection and recycling of **office paper, newspaper and corrugated cardboard**.
- Revised Ordinance of City & County of Honolulu Sec. 9-3.5 requires the owners of **restaurants, food courts, hotels, markets, food manufacturers, caterers, and hospitals** to arrange and provide for the separate collection of **food waste**.

A City and County of Honolulu recycling specialist will inspect your business during one of the following months - **April 2012, May 2012 or June 2012**.

The purpose for the inspection is:

- Incomplete compliance form
- Follow-up to previous inspection
- No response to compliance form
- Suspected violation
- Random

Questions and/or need assistance with your recycling program?
 • Glass recycling • Office paper recycling • Food waste recycling
