**Subject:** Zoning and Planning Committee Testimony regarding bill 65 Ewa development plan

Dear City Council members:

As long time residents of Makakilo, please allow us to share that we oppose to building Hoopii as it stands now. For too long the City and DPP has allowed big business housing developers to come in, bolt on a bedroom community and leave the existing residents with the pieces left to pick up. Pieces such as urban blight, choke neck traffic, infrastructure strains, multi tracked schools, continue to this day. The word "planning" in the DPP is a mis nomer as there is really was sub par planning, especially for traffic. Atop this are the issues of lost farmland and continued urban sprawl, blight from the government allowing un restrained, poorly regulated development.

The decades old Ewa development plan really should be redone as we can see now it was flawed in providing smart growth for Oahu. If the committee cannot see to redo the Ewa plan, we support delaying approval for a year or at a minimum until the voters have had there voices heard on the future directions the Ewa plain should take. To those council members who would listen to the people, we thank an applaud you.

R,

Dennis and Edith Tingey
