Re: Support of Bill 72 about prohibiting smoking in certain places

Hearing: Committee on Public Safety and Economic Development, Tuesday, February 26, 2013 at 9 a.m.

Thank you for the opportunity to submit testimony in favor of Bill 72, which would make certain beaches on Oahu smoke-free. This policy sends a strong message about the importance of protecting the health and environment of people who live and visit Oahu.

The negative effects of tobacco and secondhand smoke are well-known. The U.S. Surgeon General notes that any level of exposure to secondhand smoke is dangerous and can be harmful. Cigarette butts are not only unsightly litter, but can also be toxic to children, pets, and marine life. They degrade the quality of coastal areas where people play, swim, fish and boat. With limited land space and a large population, it is important to ensure that local families have access to public recreation areas that are safe and clean.

A 2012 poll done by SMS Research showed over 73% of Oahu residents support a law for tobacco-free public beaches and parks.

Other states and countries have smoke-free beaches and have realized the benefits of creating these protected spaces. I hope the County Council will support this bill to move forward.

Thank you for the opportunity to testify.
