Re: Opposition to Bill 84 and Bill 8

Dear Members of The Honolulu City Council,

Complete streets is a transformative idea that will make Honolulu more inviting, inclusive, and livable for residents of all ages and of all means.

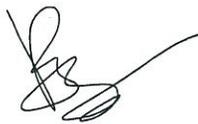

The City and County of Honolulu has many aspects of city management to balance and must make hard decisions on how to allocate resources. But our public sidewalks, roads, and thoroughfares are an absolutely critical public resource. While many users currently rely on the roads as they are, many more could benefit from projects that could accommodate more modes of transportation.

Considering complete streets on all new projects is a cost efficient way to gradually introduce complete streets features into our city. Bikeshare Hawaii urges the council to continue to support complete streets, and helping to remove barriers whenever possible.

Thank you for the opportunity to testify,

Sincerely,

Lori McCarney
