City Council
Attn: Councilman Ikaika Anderson
530 South King Street, Room 202
Honolulu, Hawaii 96813

Dear Councilman Anderson,

I do not support Bill 62, 63 and Resolution 15-206 due to the encroachment on the shoreline.

The development will have an impact on the marine ecosystems and expedite shoreline erosion. The marine ecosystem on the Ewa Coast has depleted due to coral bleaching, invasive limu and pollution due to development. The limu is no longer thriving in the areas surrounding One'ula Beach Park due to the lack of clean brackish water. The fish need limu to eat and, we the people, need fish to eat as well as other marine life.

I am a student at Nanakuli High School and I do not support this bill. I do not support this bill because if you were to follow through with the building the hotels, then soon there will be rubbish in the freshwater lagoon. If there is rubbish in the lagoon then it would travel to the ocean water and if there is rubbish in the ocean water it would be both a swimming and a health hazard to others. People would not be able to swim or fish in the dirty water.

The encroachment on the shoreline is unreasonable nor feasible and therefore the bills should not be passed. Thank you very much for taking the time to consider my testimony.

Sincerely,

Leila Asuega-Kekuawela

Dear Councilman Anderson,

I do not support Bill 62, 63 and Resolution 15-206 due to the encroachment on the shoreline.

The development will have an impact on the marine ecosystems and expedite shoreline erosion. The marine ecosystem on the Ewa Coast has depleted due to coral bleaching, invasive limu and pollution due to development. The limu is no longer thriving in the areas surrounding One'ula Beach Park due to the lack of clean brackish water. The fish need limu to eat and, we the people, need fish to eat as well as other marine life. Hawaii is changing so fast and preserve our natural resources.

I am a student from Nanakuli High and Intermediate School, and I want to protect the marine life and ecosystem. It is important that we protect the limited resources that we currently have already. Even though the EIS provided by the developer may state that there will be no adverse effects but the current ecosystem is already in peril. We need to protect these vital resources. Without it, Hawaii will lose its meaning of life.

The encroachment on the shoreline is unreasonable nor feasible and therefore the bills should not be passed. Thank you very much for taking the time to consider my testimony.

Sincerely,

A handwritten signature in black ink that reads "Antonette Labrador". The signature is written in a cursive, flowing style.

Dear Councilman Anderson,

I do not support Bill 62, 63 and Resolution 15-206 due to the encroachment on the shoreline.

The development will have an impact on the marine ecosystems and expedite shoreline erosion. The marine ecosystem on the Ewa Coast has depleted due to coral bleaching, invasive limu and pollution due to development. The limu is no longer thriving in the areas surrounding One'ula Beach Park due to the lack of clean brackish water. The fish need limu to eat and, we the people, need fish to eat as well as other marine life.

I am a student from Nanakuli High and Intermediate School, and I want to protect the marine life and ecosystem. People in Hawai'i are protecting species that are going extinct, so why do they want to develop over here? It is important to know that people still do care about the environment, but hearing about the development that will be built sounds like there is no care to the land. Limu is a vital resource to the fish in the area, and without the limu there would not be no fish. Everyone on the island would love to see development in nature, and nature defines the tropical and island vibe of Hawai'i, but now people are changing the face of this island.

The encroachment on the shoreline is unreasonable nor feasible and therefore the bills should not be passed. Thank you very much for taking the time to consider my testimony.

Sincerely,

Mia Kaaukai-Ranis
