

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Julie Park

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.

Of the many benefits the Kapolei skatepark has brought to the area, one of the greatest things that has happened is that the local skaters have learned what it means to be responsible for their "backyard", and to have community awareness. The skaters in Kapolei now work hard to clean and maintain the park, which is why it looks as good today as it did the day it was built. Unfortunately the same cannot be said for the majority of other skateparks around the state. The phase 2 extension of Kapolei will bring the park to its originally planned size and will provide more room for safe skating and talent-building, and will continue to provide a safe alternative to skating on the streets or sidewalks. In addition, more and more kids are getting out of their house and having fun, safe exercise as well as learning how to take care of their community. I urge you to please consider this opportunity to be a true investment for the future of Hawaii's keiki. Mahalo.

Aloha Councilmember Pine-

Thank you for your work and support of the many improvements in the Kapolei District. I would like to particularly voice my full support of the current proposal to improve the Kapolei Skatepark.

I am concerned with the current facility having already been outgrown by the local skater population, and with the continued growth forecasted in Kapolei and the surrounding areas, the skatepark needs to be expanded now to meet the original design plans in order to safely accommodate the growing number of skaters. In the short time that the current skatepark has existed, it has proven itself to be a formidable park for growing professional-level skateboard talent, as well as a gathering place for families and skaters alike. More and more skaters are coming out to the park every day. With the growing number of skateparks in small, rural areas with small and stagnant populations, it only makes sense to bring the Kapolei skatepark up to its originally-planned size since this is one of the fastest-growing areas not only on Oahu but in the state.
