RE: **TESTIMONY IN OPPOSITION TO BILL 59 CD2**
Relating to the use of bags provided to customers.
Committee Meeting on Wednesday 3rd May, 2017 at 1PM.

RECEIVED
CITY CLERK
C & C OF HONOLULU
2017 MAY -2 PM 1:39

Aloha Chair Fukunaga and Members of the Committee on Public Works, Infrastructure & Sustainability,

I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean - not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully - banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

PETITION 15

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean - not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully - banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely

RE: **TESTIMONY IN OPPOSITION TO BILL 59 CD2**
Relating to the use of bags provided to customers.
Committee Meeting on Wednesday 3rd May, 2017 at 1PM.

Aloha Chair Fukunaga and Members of the Committee on Public Works, Infrastructure & Sustainability,

I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

Raelyn L. Yeomans

RE: **TESTIMONY IN OPPOSITION TO BILL 59 CD2**
Relating to the use of bags provided to customers.
Committee Meeting on Wednesday 3rd May, 2017 at 1PM.

Aloha Chair Fukunaga and Members of the Committee on Public Works, Infrastructure & Sustainability,

I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean – not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully – banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

Ashley Riker

Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean – not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully – banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

Paul J. Novacil

Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

RE: **TESTIMONY IN OPPOSITION TO BILL 59 CD2**
Relating to the use of bags provided to customers.
Committee Meeting on Wednesday 3rd May, 2017 at 1PM.

Aloha Chair Fukunaga and Members of the Committee on Public Works, Infrastructure & Sustainability,

I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean – not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully – banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,
Charlene Noland

Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean – not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully – banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

Martha Madigan

RE: **TESTIMONY IN OPPOSITION TO BILL 59 CD2**
Relating to the use of bags provided to customers.
Committee Meeting on Wednesday 3rd May, 2017 at 1PM.

Aloha Chair Fukunaga and Members of the Committee on Public Works, Infrastructure & Sustainability,

I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean – not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. Relating to the use of bags provided to customers.
Committee Meeting on Wednesday 3rd May, 2017 at 1PM.

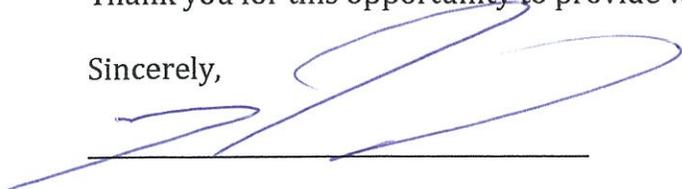

Aloha Chair Fukunaga and Members of the Committee on Public Works, Infrastructure & Sustainability,

I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean – not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully – banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean - not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully - banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

RE: **TESTIMONY IN OPPOSITION TO BILL 59 CD2**
Relating to the use of bags provided to customers.
Committee Meeting on Wednesday 3rd May, 2017 at 1PM.

Aloha Chair Fukunaga and Members of the Committee on Public Works, Infrastructure & Sustainability,

I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean - not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. RE: **TESTIMONY IN OPPOSITION TO BILL 59 CD2**
Relating to the use of bags provided to customers.
Committee Meeting on Wednesday 3rd May, 2017 at 1PM.

Aloha Chair Fukunaga and Members of the Committee on Public Works, Infrastructure & Sustainability,

I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean - not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully - banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

Emma Holland

RE: **TESTIMONY IN OPPOSITION TO BILL 59 CD2**
Relating to the use of bags provided to customers.
Committee Meeting on Wednesday 3rd May, 2017 at 1PM.

Aloha Chair Fukunaga and Members of the Committee on Public Works, Infrastructure & Sustainability,

I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean - not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully - banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. I am opposed to Bill 59 CD2. Instead of fixing up the current plastic bag law to finally ban all plastic checkout bags, this bill eliminates the word "ban", replaces it with "regulation" and allows all plastic checkout bags as long as a fee is charged with the exception of food and drink bags which will be allowed to be given away free.

I do not agree with changing the plastic bag law from a ban to a fee. All plastic checkout bags need to be banned including plastic bags for food and drinks, thick plastic bags, compostable plastic bags and all other plastic checkout bags.

Charging fees for all plastic and paper bags will do nothing to stop the problem of plastic bags getting into the environment and harming endangered sea turtles and other marine life. Many stores are already charging for plastic and paper bags on their own so this law is unnecessary. Charging 10 cents or more will not discourage people from getting plastic bags. Walmart, Don Quijote and ABC Shops already charge for plastic bags and bags from these stores and others are found all across the island on beaches, roadways, parks and in the ocean - not only from littering but also from flying out vehicles, off picnic tables, out of rubbish bins when they are being emptied into the garbage truck and many other ways that plastic bags easily escape into the environment through wind and rain. This is why the only answer to the plastic bag pollution problem is to ban them. Kaua'i County did this successfully - banned all plastic checkout bags and their law is working well. Honolulu gets more tourists than any other county and needs a strong law that works. The law we have now is not working and Bill 59 CD2 is not going to make it any better. In fact it will get worse as stores that had only paper bags may decide to go back to plastic bags if a fee is implemented, the ban is eliminated and all plastic bags are allowed. Please do not pass Bill 59 CD2 unless it is amended to restore the word "ban", take the fee out and most importantly, close all the loopholes in the current law by banning all plastic checkout bags. Thank you for this opportunity to provide written testimony.

Sincerely,

Linda Luka
