

RANK YOUR PREFERRED BRIDGE EXPERIENCE

Consider bridge feeling, style and mood by placing a dot along the spectrum that represents your preferred bridge experiences. Each participant will get one dot per experience type.

1. EXPRESSION

Pros: subtle, more connection with surroundings, lower cost

Cons: blends with surroundings, doesn't draw attention to crossing location/doesn't enhance wayfinding

Pros: landmark, destination quality, sense of place

Cons: impacts to views, draws attention away from natural features/landscape, higher cost

Low Profile

Intense

2. PURPOSE

Pros: enhanced walking and biking connections, efficient crossing travel time

Cons: "pass through" space, potentially congested without delineation, no furnishings or seating features on bridge

Pros: "stay" space, space for people to gather and activate space

Cons: need for activation/programming, public space management, increased maintenance cost

Utility

Public Space

NO BRIDGE ON ALAWAY

RANK YOUR PREFERRED BRIDGE EXPERIENCE

Consider bridge feeling, style and mood by placing a dot along the spectrum that represents your preferred bridge experiences. Each participant will get one dot per experience type.

3. SENSE OF ENCLOSURE

Pros: connection to surrounding landscape/ views

Cons: minimal bridge structure, no unique space above bridge deck

Pros: shade, weather protection

Cons: limited views from bridge, feeling of confinement, perception of safety may decrease

4. ALIGNMENT

Pros: direct travel path

Cons: perpendicular crossing, less visually interesting, lower cost

Pros: visual interest, enhanced public space, minimize 90' turns/sharp turning angles

Cons: limitations for maintenance/ emergency vehicle access, higher cost

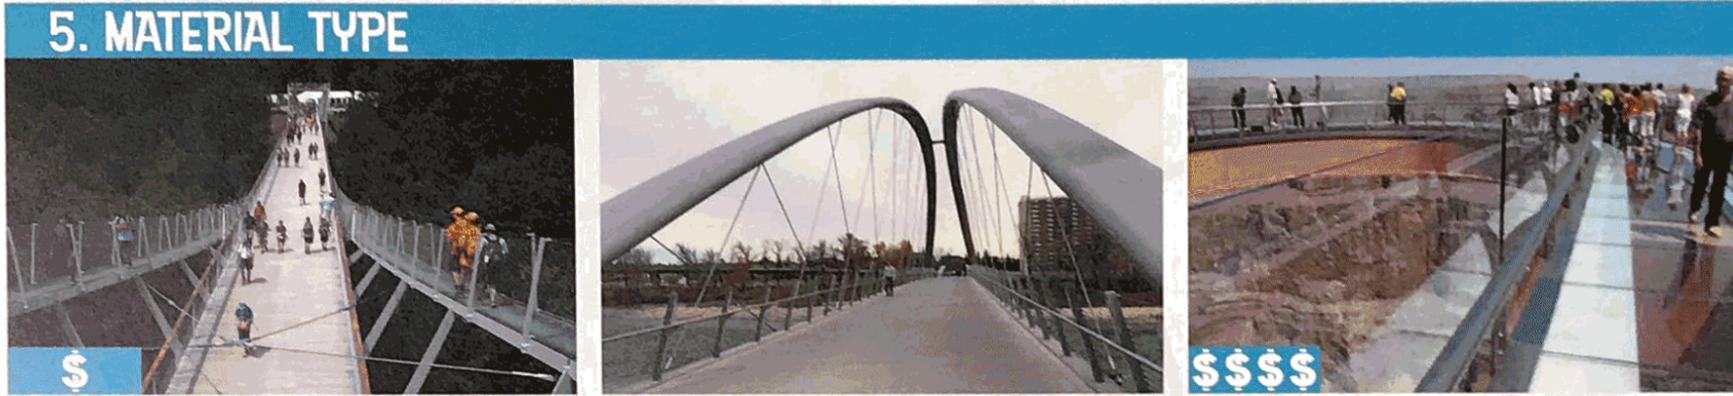

RANK YOUR PREFERRED BRIDGE EXPERIENCE

Consider bridge feeling, style and mood by placing a dot along the spectrum that represents your preferred bridge experiences. Each participant will get one dot per experience type.

Pros: robust wearing surface, excellent traction for all users, economical, can be textured or colored

Cons: solid surface

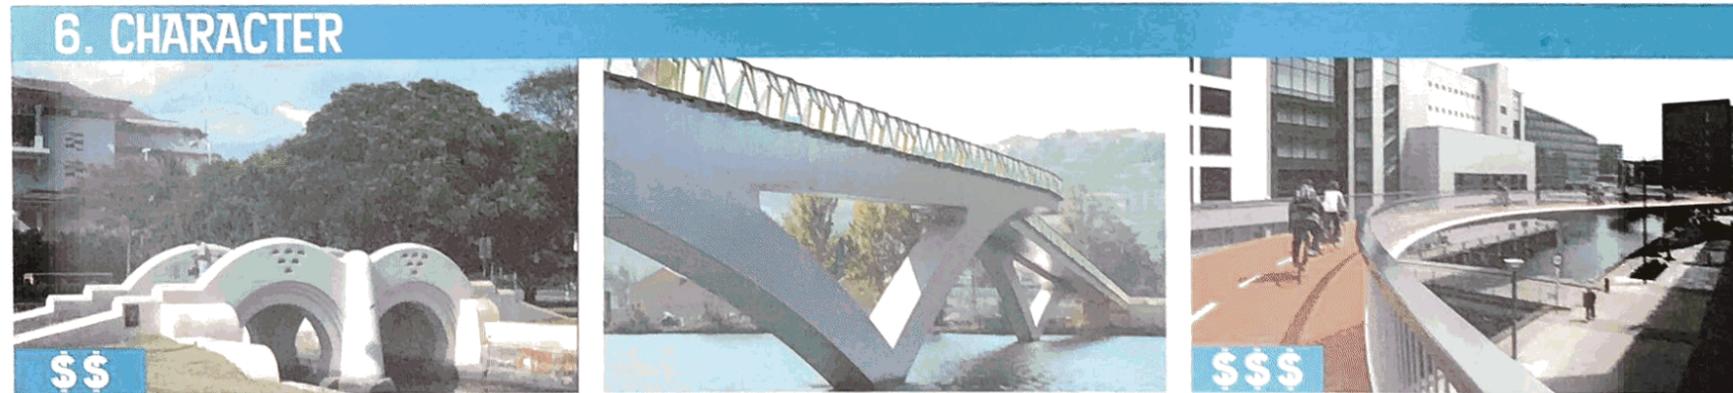

Pros: visual interest, transparency

Cons: glass presents a slipping hazard for both people walking and bicycling, costs, maintenance, vandalism

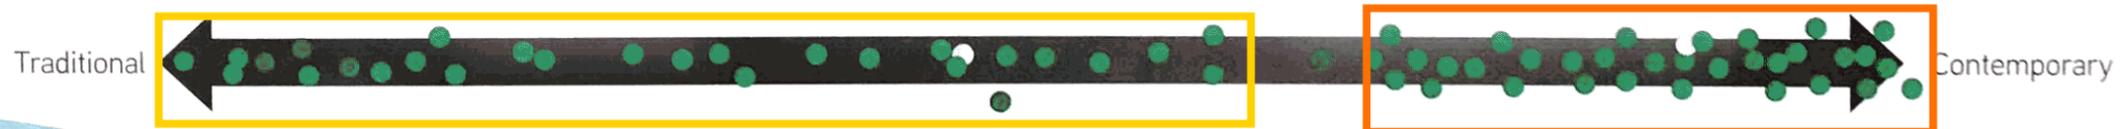

Pros: enhances historic sense of place

Cons: limited design/options materials

Pros: minimalist/sleek feel, less visual impact

Cons: less integration with the Hawaiian character
