# MISSION

We, the men and women of the Honolulu Police Department, are dedicated to providing excellent service through partnerships that build trust, reduce crime, create a safe environment, and enhance the quality of life in our community.

We are committed to these principles:

## INTEGRITY

*We have integrity. We adhere to the highest moral and ethical standards. We are honest and sincere in dealing with each other and the community. We have the courage to uphold these principles and are proud that they guide us in all we do.*

## RESPECT

*We show respect. We recognize the value of our unique cultural diversity and treat all people with kindness, tolerance, and dignity. We cherish and protect the rights, liberties, and freedoms of all as granted by the constitutions and laws of the United States and the State of Hawaii.*

## FAIRNESS

*We act with fairness. Objective, impartial decisions and policies are the foundation of our interactions. We are consistent in our treatment of all persons. Our actions are tempered with reason and equity.*

*. . . in the spirit of Aloha.*

Office of the Mayor  
City and County of Honolulu

This report describes the major activities, programs, and accomplishments of the Honolulu Police Department and presents crime-related statistics for the City and County of Honolulu for the year 2000. It is designed to inform the community about the goals and accomplishments of the department and to provide a statistical overview of the year.

I believe that the members of this community should take great pride in the work performed by the Honolulu Police Department's officers and civilian personnel. Their dedication to duty and excellent service are helping to make Honolulu a better and safer place for everyone.

  
JEREMY HARRIS, Mayor  
City and County of Honolulu

The Honolulu Police Commission is made up of seven members who are appointed by the Mayor and confirmed by the City Council. All members serve staggered terms of five years. They volunteer their services and do not receive any compensation.

The commission elects its own chair and vice chair each year from among its members. The commission chair for 2000 was Leonard Leong and the vice chair was Cha Thompson.

The commission has the following mandated responsibilities:

- appoints and may remove the Chief of Police;
- evaluates the performance of the Chief of Police at least annually;
- reviews rules and regulations for the administration of the Honolulu Police Department;
- reviews the annual budget prepared by the Chief of Police and may make recommendations thereon to the Mayor;
- compares at least annually the actual achievements of the police department against the goals and objectives in the five-year plan;
- receives, considers, and investigates charges brought by the public against the conduct of the department or any of its members and submits a written report of its findings to the Chief of Police.

The commissioners are committed to continue working proactively with the department to address problems regarding police conduct and other issues.

*Honolulu Police Commissioners: (seated from left) Chair Leonard Leong and Vice Chair Cha Thompson; (standing from left) Theo Butuyan, Darolyn Lendio, Dwight Yoshimura, Alan Ho, and Melga Gendrano.*

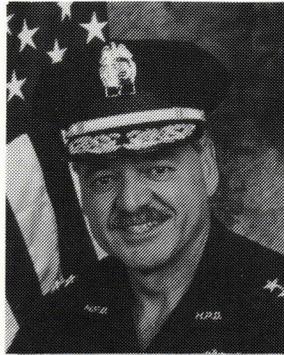

For the Honolulu Police Department, 2000 represented another year of progress toward our goals.

For example, we continued to move forward in adapting technology to meet our needs and improve our services. During the year, the radio system was redesigned to add channels for our mobile data computers. More than 600 officers have been trained to use the mobile data computers, and installation of all 1,200 units should be completed sometime in the first half of 2001. A vendor was selected for the development of our new computer aided dispatch and records management systems, which should be installed in 2001 and 2002, respectively. We are getting closer to development of an automated field reporting system, which will permit officers to write their reports in the field and submit them electronically via their mobile data computers. We are upgrading the computer system that links us to the FBI's National Crime Information Center. Our computerized mugshot system was upgraded and units were installed in all regional district stations. And the document imaging system was expanded to include three regional stations, which means that investigators outside of Honolulu are now able to access police reports at the push of a button. All these changes mean that our work can be done faster and more efficiently, which will benefit the community we serve.

During the year, we also embarked on the path that will take us to accreditation within some 18 months. Becoming accredited means that we have chosen to voluntarily comply with the standards established by the national Commission on Accreditation for Law Enforcement Agencies. There are more than 400 of these standards, and they are designed to provide a uniform set of benchmarks for the organization and operation of law enforcement agencies across the country. By demonstrating compliance with these standards, we believe that we will be joining the ranks of the nation's best.

## HONOLULU POLICE ADMINISTRATION

The Honolulu Police Department serves as the primary law enforcement agency for the entire island of Oahu.

The Chief of Police directs the operation and administration of the department and is responsible for the following:

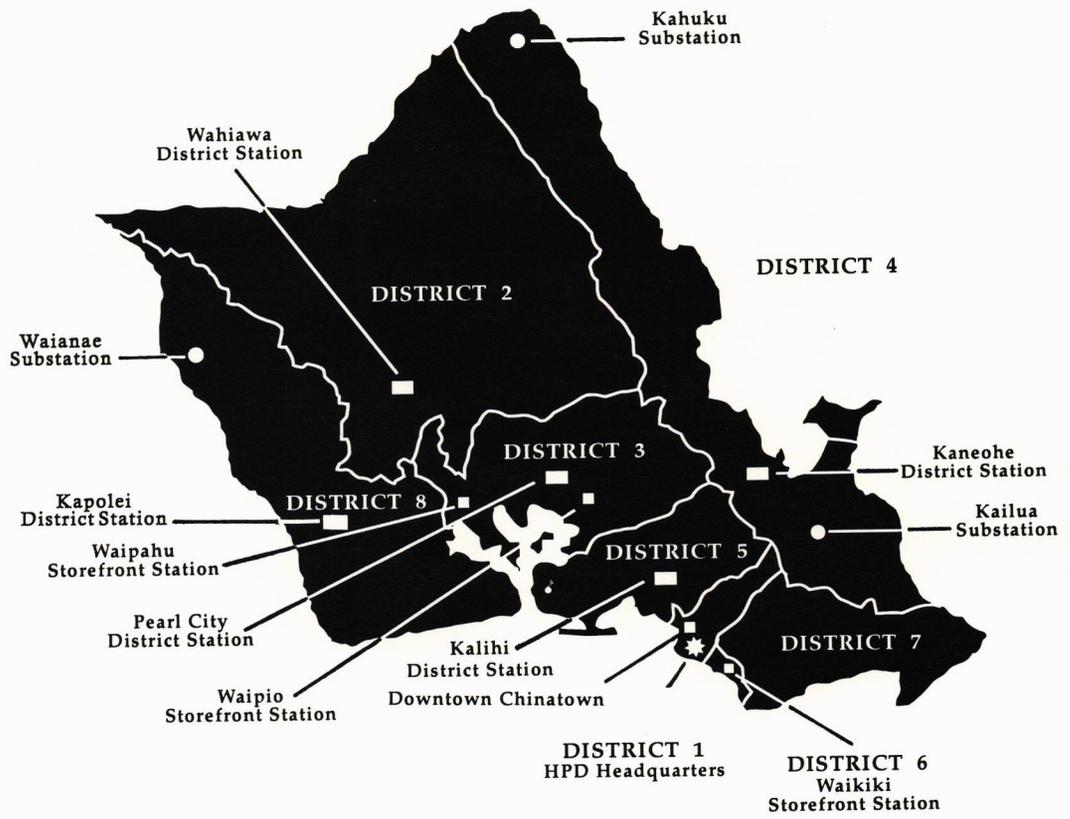

- preservation of the public peace;
- protection of the rights of persons and property;
- prevention of crime;
- detection and arrest of offenders against the law;
- enforcement and prevention of violations of state laws and city ordinances; and

- service of processes and notices in civil and criminal proceedings.

The department's jurisdiction is the City and County of Honolulu. It includes the entire island of Oahu, which has a circumference of about 137 miles and an area of some 596 square miles. The estimated resident population is about 867,500, which includes military personnel but not tourists.

For police operations, the island is divided into eight patrol districts; each district is subdivided into sectors and beats. The department's headquarters are at 801 South Beretania Street in downtown Honolulu. District stations are found in Kalihi, Pearl City, Kapolei, Wahiawa, and Kaneohe. Other facilities are identified on the map below and in the narrative parts of the report.

	HPD Headquarters
	District Station
	Storefront Station
	Substation

## District 1

Downtown Honolulu is the core of this district, which stretches from Liliha Street to Punahou Street. The command offices are located at the Alapai Headquarters.

The opening of the district's Chinatown Substation was celebrated on May 19, 2000, with a traditional Chinese blessing. The building was named in memory of former Chief of Police Dan Liu. This new facility houses the district's downtown officers, Chinatown bicycle detail, burglary-theft detectives, and Project Outreach worker.

The Weed and Seed program has continued to show success in the district and to help revitalize the downtown area. Criminal justice agencies work to "weed" criminal elements out of the area, and then "seed" elements are introduced to enhance social services and economic growth. Under this program, eight additional video monitoring cameras were installed on King Street between River Street and Nuuanu Avenue. In November 2000, the city put out a bid to complete the video system, which will eventually have 22 cameras in operation.

District 1 administers the department's Field Training and

Evaluation Program (FTEP), which enables newly graduated recruit officers to apply their police academy training under close supervision in the field. During 2000, a total of 127 recruits completed the FTEP.

The district also administers the department's Reserve Program. Reserve officers volunteer a minimum of 20 hours per month in support of the department's mission and goals. During the year 2000, the 69 reserve officers contributed over 16,300 hours of volunteer police service to the community. Reserve Officer Ladislaus Piwowarski was named Reserve Officer of the Year for 2000. He has been a member of the police reserves since 1950 and has contributed over 108,000 hours of volunteer service in the course of his 50-year police career.

## District 2

District 2 covers the area from central Oahu to the North Shore between the Waianae and Koolau mountain ranges. The district includes Wahiawa, Mililani, Mililani Mauka, Waialua, Mokuleia, and Haleiwa, as well as prominent military bases such as Schofield Barracks. The district's administrative offices are located in the Wahiawa Police Station at 330 North Cane Street.

In mid-year 2000, the district began formal implementation of a "burglary patrol" in which off-duty officers were recruited to supplement on-duty officers to aggressively patrol certain neighborhoods, primarily in Mililani. The purpose of these patrols is to discourage residential burglaries and thefts. In support of this effort, the geographical information system is used to map the time and location of property crimes. This information gives investigators timely crime trend data and is used to adjust the deployment of personnel and to implement special crime suppression programs.

Two projects were designed to improve traffic safety in the district. One project targeted fatal and serious motor vehicle collisions. A study of all fatalities over the two prior years provided data on the locations, times, conditions, and causes of collisions. These data were given to watch commanders, who are responsible for developing programs to control and reduce fatalities.

The second project was aimed at motor vehicle collisions in general. It involved a variety of enforcement and education efforts, including the use of decoy vehicles and the state Department of Transportation's trailer-based digital speed sign. The sign lets motorists know if they are exceeding the speed limit; it is commonly set up on collision-prone main thoroughfares.

Sergeant Fay Tamura, a resident of Mililani, is on the Board of Directors for the Wahiawa Community Coalition for Youth. This organization has envisioned a youth center to provide recreational opportunities for youngsters in Wahiawa. In July 2000, the City Council approved \$150,000 for planning and designing the center, and a consultant has been hired. The next step is to seek funding for land purchase, building construction, and proper staffing of the center.

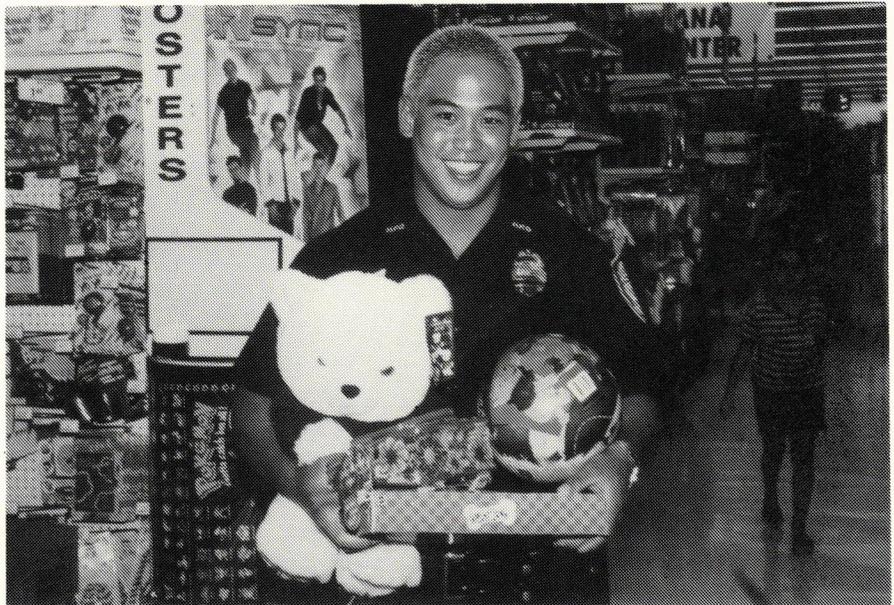

### District 3

District 3 covers the area from Red Hill to Village Park and Waipahu. The main station is at 1100 Waimano Home Road in Pearl City. Storefront stations are located in the Waipahu Shopping Center at 94-144 Farrington Highway and in the Gentry Waipio Shopping Center at 94-1040 Waipio Uka Street. The district also maintains an office in a trailer at the Waimalu Shopping Plaza.

The Waipahu storefront station also houses the district's new Weed and

Seed program. This is the second Weed and Seed site in Hawaii (the first is shared by Districts 1 and 5), and the program went into operation on September 12, 2000. Weed and Seed is a federal program designed to reduce crime, empower the community, and improve the quality of life for area residents through partnerships among government, local businesses, and the community.

The district's Crime Reduction Unit (plainclothes officers) supported the uniformed patrol effort by making 240 arrests in 2000. The unit also participated in a three-month drug undercover operation with the federal Drug Enforcement Administration and the Federal Bureau of Investigation. Drug-trafficking charges resulted in 31 arrests; state charges resulted in several more. All the arrests were part of the ongoing initiative to eliminate drug trafficking in the Waipahu Weed and Seed site.

In partnership with Kmart management, district officers helped organize the annual "Shop with a Cop" event for 130 underprivileged children at the Waialele and Stadium Marketplace Kmart stores during the Christmas holidays. Throughout the year, officers gave station tours, attended community meetings, provided keiki safety and identification

**MUNICIPAL LIBRARY, RECORDS MGMT & BOOKSTORE**  
 Department of Customer Services  
 City Hall Annex, 558 S. King Street  
 Honolulu, Hawaii 96813-3006

tags, and made presentations at community gatherings. They also helped maintain the district's 132 Neighborhood Security Watches, which had almost 10,000 participants by year-end.

The promotion of traffic safety continued throughout 2000 with the issuance of about 2,400 traffic safety awareness cards to motorists. In addition, more than 12,400 citations were issued and 200 arrests were made for traffic offenses.

Critical incident response folders have been prepared for all public and private schools in the district. These folders contain school information, campus maps, evacuation routes, and response plans for use in the event of a major incident at a school in the district.

#### District 4

This district encompasses all of Windward Oahu. The main station is located at 45-270 Waikalua Road in Kaneohe. Substations are at 219 Kuulei Road in Kailua and at 56-470 Kamehameha Highway in Kahuku.

Throughout 2000, the district's Crime Reduction Unit (CRU) provided valuable support to both field and specialized units. The CRU focused primarily on crimes against tourists, drug offenses, and property crimes, and helped to break up several series of burglaries and thefts.

In an effort to provide better service in the major beach areas, the district has expanded its use of all-terrain vehicles (ATVs) to patrol the Waimanalo and Kailua beach and park areas. There are now four ATVs available, with two ATV trailers to help move the vehicles. A cooperative arrangement with the Air Force permits training to be conducted and one ATV to be stored at Bellows Air Force Station.

Throughout the year, the district gave high priority to the campaign against domestic violence. The service and enforcement of court orders for protection were carried out on a 24-hour basis. Abuse cases and court protective order violations were aggressively pursued, and suspects who evaded arrest initially were sought islandwide. A joint project with the Criminal Investigation Division now seeks to develop arrest warrants for domestic violence offenses; this effort is designed to achieve long-term reductions in the number of offenses and the number of offenders who elude arrest.

In the area of traffic enforcement, the district emphasized making arrests for driving under the influence and issuing citations for speeding and hazardous moving violations. The district led the entire department in the number of DUI arrests made in 2000. In the area of traffic safety, the emphasis was on public education, high-visibility patrols, and community traffic awareness partnerships (known as C-TAPs).

## District 5

District 5 occupies about 36 square miles of Honolulu and runs from Pali Highway in the east to Aliamanu in the west. The command headquarters are in the Kalihi Police Station at 1865 Kamehameha IV Road.

District patrol officers continued to report improvements in service under the Community Area of Responsibility (CAR) program in combination with the 3/12 compressed work schedule that has been in effect for the last two years. Because officers consistently work the same areas during the same hours of the day, they are able to provide a more consistent response to crime problems and other community concerns. This has also improved the relationship between the police and the community.

For at least five evenings a week, District 5 patrol officers are supported by an outreach and crisis intervention worker from Puuhonua, a private nonprofit support agency for domestic violence and abuse victims. The worker accompanies officers on domestic violence calls and provides on-site outreach and counseling services to victims and their children.

During the year, Crime Reduction Unit officers conducted several undercover operations. One involved the sale of drugs at Kaahumanu Housing. When the operation ended, the dealers were arrested and prosecuted under the federal Weed and Seed program and the Safe Streets Act. A total of 11 dealers were prosecuted and are now in federal prison.

The district's Weed and Seed program is almost two years old. Officers assigned to the program continued their efforts to weed criminal elements out of the area and improve relationships between younger community members and police personnel. On the "seeding" side, officers worked with service providers

to improve social and quality of life services to the community. Dances, teen events, and gatherings are planned for Mayor Wright Homes and the surrounding area.

In September 2000, federal grant funds were received as part of a drug elimination program. As a result, District 5 was able to intensify efforts in the Kamehameha, Kaahumanu, and Kalihi Valley Homes housing areas. Officers have provided support for citizen patrols in the three areas, a variety of activities for youngsters, and ongoing counter-drug operations.

The district's annual Shop with a Cop event occurred at the Iwilei Kmart store on December 16, 2000. Some 60 off-duty officers turned out to escort 80 children and their parents through the store so that each child could select up to \$20 worth of Christmas gifts. This program continues to be a big hit with everyone involved.

## District 6

This district covers the Waikiki peninsula from Atkinson Drive in the west to the slopes of Diamond Head in the east. The administrative offices for the district are in the Alapai Headquarters at 801 South Beretania Street. The new Waikiki storefront station, which is located on Kalakaua Avenue at Prince Kuhio Beach, was officially opened in August 2000. The district's burglary-theft detectives and Crime Reduction Unit (CRU) occupy office space on the fourth floor of the Royal Hawaiian Shopping Center. In addition, officers staff a kiosk next to the shopping center (photo on next page) during evening hours in an effort to help deter crime and give visitors and residents direct access to the police.

District 6 continues to hold orientation classes for new officers on the unique history of Waikiki and its role in Hawaiian tourism. The classes

provide historical and cultural information that gives officers added respect for and pride in their assignment to the district. This cultural training began with the late Dr. George Kanahale and will continue in honor of his work and life.

The district's CRU conducted a number of sensitive investigations during the year. In one case, the CRU worked with the management and owners of a small hotel that was being used by drug dealers and prostitutes. This effort expedited the eventual demolition of the building. In another case, the CRU worked with the Secret Service to investigate a forgery ring producing false identification cards, which were used for various crimes from forgery to underage drinking. Several persons were arrested and indicted as a result of this investigation.

With Waikiki as the central tourist destination in the state, District 6 must coordinate traffic and security for many events. There were 42 special events in Waikiki in 2000, including parades, conventions, dedications, runs, ocean fests, and concerts. Major events included the Pacific Basin Economic Council meeting, Waikiki Hoolaulea, and Aloha Week Parade. The district command is now working with other elements of the department and with city, state, and federal agencies to prepare for

the Asian Development Bank Board of Governors meeting, which will be held at the Hawaii Convention Center in May 2001.

Officers worked with representatives of public and private agencies during the year to attempt to address the problems of the homeless in Waikiki and the concerns of residents about homelessness. By year-end, the homeless population in Kapiolani Park had been reduced to 2 or 3--a substantial change from the 120 or more who were there several years ago.

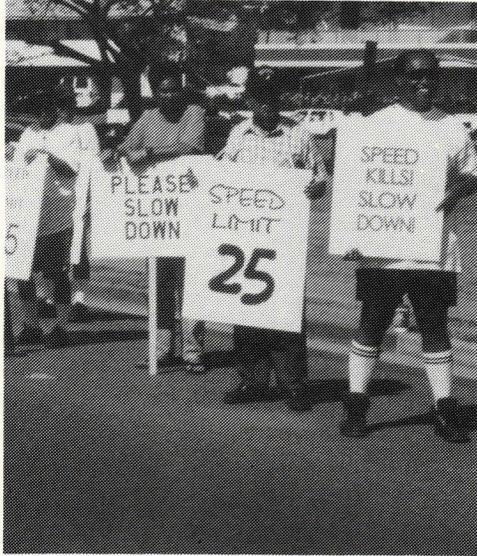

### District 7

This district encompasses East Honolulu from Punahou Street to Makapuu Point, excluding Waikiki. The command's administrative offices are currently in the departmental headquarters at 801 South Beretania Street. However, the district is working with neighborhood boards and council members to obtain a separate police station in East Honolulu. A site adjoining the Hawaii Kai Park and Ride facility is the current preference. The district is now waiting for concurrence from the Mayor and funding from the City Council.

Thefts remained a concern in the beach areas between Hanauma Bay and Sandy Beach. A special detail was formed in 1995 to deal with these crimes, primarily through area surveillance and aggressive enforcement action. Since the formation of this detail, thefts in the area have declined every year.

Traffic safety efforts continued via the Community-Traffic Awareness Partnership (C-TAP) and Community-Traffic Selected Area for Enforcement (C-SAFE) programs. C-TAP is designed to address the problems of speeding and hazardous vehicular movement in two ways: owners of vehicles observed violating the traffic

code are sent warning letters, and concerned citizens join the police in displaying safe-driving signs in their neighborhoods.

Under C-SAFE, the district's selective enforcement unit spends extended periods in areas with high numbers of traffic violation complaints. The unit worked in over 40 locations during the year 2000.

### District 8

District 8 encompasses the Waianae Coast, Makakilo, Ewa Plain, and City of Kapolei. July 8, 2000, was the formal opening of the new Kapolei Station at 1100 Kamokila Boulevard. This is the now the second largest

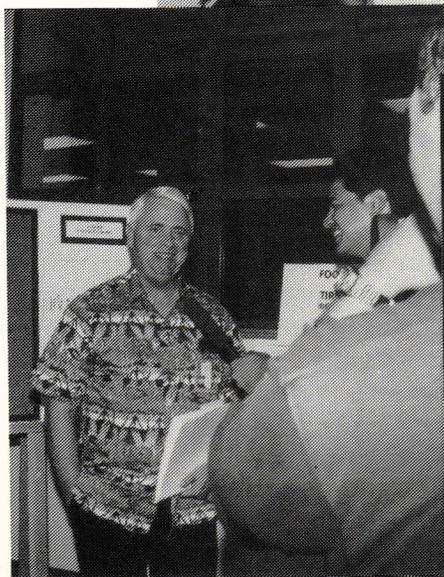

police facility on Oahu. The Waianae Substation, which is located at 85-939 Farrington Highway, provides a base of operations for personnel patrolling the Waianae Coast.

The district continued to promote traffic safety in 2000. The "Live and Let Live" program featured static traffic safety displays in the Waianae, Maili, and Nanakuli areas. In addition, ten events brought more than 800 people to sign-wave along Farrington Highway in an effort to encourage motorists to obey speed limits.

The number of Neighborhood Security Watches in the district grew by 4 in 2000, bringing the district total to 113 programs with over 8,500 participating households by year-end. The number of citizen patrols increased to 29, and these have 500 trained members. Also, the district now has three mobile patrols with a total of 196 members.

The campaign to reduce domestic violence continued in partnership with Puuhonua, which provides a daytime advocate to assist victims in court and in obtaining temporary restraining orders, finding transportation, and getting work referrals. An evening crisis counselor continues to provide advice to victims and placement in shelters. During 2000, the Puuhonua program provided assistance to more than 500 victims of abuse.

## Criminal Investigation Division

The Criminal Investigation Division (CID) is responsible for all felony investigations relating to forgery, auto theft, white collar crime, robbery, assault, murder, and sexual assault. A divisional reorganization in 2000 resulted in the Career Criminal Unit being disbanded; the unit's detective positions were distributed among other details.

CID again gave high priority to domestic violence cases throughout the year. A promising new program was started in collaboration with the Department of the Prosecuting Attorney and Family Court. This program makes it possible to obtain misdemeanor arrest warrants for domestic violence offenders and temporary restraining order violators who initially elude arrest. As a result, there should be more arrests of these offenders and a reduced likelihood that they will again threaten their victims.

The CrimeStoppers program continued to educate the community about current crime trends and wanted persons. The number of arrests resulting from CrimeStoppers tips increased for the third consecutive year. In addition, the Student CrimeStoppers program jumped from 4 to over 40 active schools on Oahu. In 1999, schools took action on 4 Student CrimeStoppers tips; in 2000, the number grew to 56.

Several high-profile cases were completed in 2000. For example, the

Gang Detail successfully investigated allegations of bribery involving tee times at the Ala Wai Golf Course. Two employees of the Department of Parks and Recreation were believed to be involved, and numerous charges were filed as a result.

An extensive white collar crime investigation culminated in indictments and convictions in the largest fraud case in the history of the City and County. Michael Kahapea, a high-ranking city housing official, was convicted of diverting about six million dollars over a period of several years. The money was obtained under the guise of moving businesses in the Ewa Village area.

A series of four armed robberies occurred in the early morning hours of November 19, 2000, in areas as far apart as Kalihi, Pearl City, and Kailua. Four suspects were arrested by December 1, thanks to a cooperative investigative effort involving the Robbery and Gang Details of CID, District 5's Crime Reduction Unit, Police Graphic Artist Joe Aragon, and tips received from the community through CrimeStoppers.

In December 2000, the Homicide and Gang Details conducted a joint investigation in a murder-for-hire case that saw three adults arrested.

## Juvenile Services Division

The Juvenile Services Division strives to stop violence and address issues involving the development of the

community's youngsters through a variety of intervention, prevention, and education efforts.

The Drug Abuse Resistance Education (DARE) elementary school curriculum was taught in 122 public and 46 private schools in 2000. A successful pilot program was taught at four middle schools; the division hopes to expand the middle school program in the future. In addition, DARE personnel participated in more than 100 special events during the year. These included health and safety/wellness fairs, school fairs, PTA meetings, parades, and tobacco stinging investigations.

An anti-gang curriculum was taught to seventh graders in 22 of the 25 public intermediate schools on Oahu. Gang Resistance Education and Training (GREAT) personnel also made gang awareness presentations to community groups, colleges and universities, and governmental agencies, including the military.

GREAT officers assisted with the school attendance program, which is an anti-truancy effort administered by the Department of Education; 764 families participated in the program in 2000. Other GREAT activities included teen dances, youth events at Magic Island and Kakaako Park, and the Department of Education's positive message program called "Forget Crime, Learn to Cook the Grinds." This event featured chef Sam Choy, who visited schools and related his trials and triumphs in growing up and the results he achieved by making positive choices.

The Evening Counseling Program provided counseling to 1,751 juveniles and their parents during the year. Counselors included officers, reserve officers, and six civilian volunteers.

Police Activities League (PAL) officers attended the National PAL Conference in Minnesota in June 2000, where they were certified as youth sports administrators and trainers. This will

lead to national certification of the Police Activities League on Oahu.

### Narcotics/Vice Division

This division is responsible for the enforcement of laws, ordinances, and regulations relating to gambling, morals, and narcotics offenses. It consists of eight elements.

The Airport Detail operates primarily at the Honolulu International Airport, working with federal, state, and other city agencies to intercept drugs being smuggled into the state. This detail accounts for about 80 percent of the department's drug seizures. In 2000, Airport Detail personnel investigated over 100 cases, made 87 arrests, and seized drugs valued at over \$4.2 million, including almost 42 pounds of cocaine, 3.5 pounds of heroin, over 44 pounds of methamphetamine, and 102 pounds of marijuana. In addition, the detail seized over \$485,000 in cash, real estate valued at over \$700,000, three vehicles, and ten firearms.

The Covert Detail investigates major drug trafficking organizations. During the year, the detail executed seven search warrants and made 79 arrests. Seizures included almost 30 pounds of methamphetamine, one-half pound of cocaine, one-half pound of heroin, and about 25 pounds of marijuana. The detail worked closely with the Drug Enforcement Administration and the Federal Bureau of Investigation on several cases.

The Marijuana Eradication Detail seized 10,859 marijuana plants on Oahu during the year. It also executed six search warrants, made 166 arrests, recovered 19 weapons, and seized \$58,719 in assets. Eight eradication missions were conducted on Oahu, and assistance was provided for eight on other islands.

The Complaints Detail develops cases from complaints, tips, and other sources. In 2000, it received and investigated over 1,000 public complaints of drug activity in the community and seized about one pound of crystal methamphetamine and assets valued at \$113,394.

The Clandestine Laboratory Response Team (CLRT) investigates suspected laboratories manufacturing illicit drugs. The CLRT pursued 97 complaints during the year and identified eight clandestine laboratories. The team made six arrests, seized almost 15 ounces of liquid methamphetamine with a street value of \$18,750, and seized over two ounces of crystal methamphetamine valued at \$7,300.

The Morals Detail arrested 490 people for prostitution and related offenses involving massage parlors, strip clubs, bars, escort services, and Internet sites, among others. In a unique reverse sting operation, female officers posed as prostitutes at a massage parlor and obtained violations from customers seeking sex for a fee.

The Gambling Detail effected 152 arrests for gambling-related activities and executed eight search warrants. A continuing crackdown on illegal game rooms and bookmaking activities resulted in the seizure of over \$61,000 in cash and \$41,000 in other assets.

The Forfeiture Detail pursues forfeiture cases referred to it by the division and other elements of the department. By the end of 2000, the detail had processed \$237,330 in

cash, vehicles worth \$860,570, and \$549,091 in miscellaneous property.

### Scientific Investigation Section

In addition to its work for the department, the Scientific Investigation Section (SIS) also provides forensic testing services for federal, state, and county agencies.

The DNA/Serology Unit continued to expand its DNA typing capabilities and maintain its database of convicted felons and sexual assault offenders. Some structural modifications were made to the unit's work areas in order to meet the requirements of the DNA Advisory Board. In addition, a substantial amount of effort was devoted to preparations for the audit scheduled for January 2001.

The Firearms Unit continued to enter information into its DRUGFIRE computer system. Also, a new criminalist was hired to help clear up the backlog of cases. This individual underwent an extensive in-house training program for approximately eight months, successfully completed the moot court exercise, and is currently doing supervised case work.

The Evidence Specialist Unit played a major role in planning and holding the national Clandestine Laboratory Investigators Association conference in September 2000. Planning for this event went on for more than a year and involved many SIS personnel. The association plans to hold its conference in Hawaii again within the next five years.

The Summer Mentorship Program ran from June 15 through June 30, 2000, and brought nine high school students to SIS from around the state. The program involved setting up a mock crime scene at the Police Academy, where the students were involved in photographing, dusting, recovering evidence, and drawing diagrams. They analyzed the recovered evidence in the section's laboratories and

presented their results in a mock grand jury exercise.

Section personnel attended a number of training courses and workshops during the year in order to keep abreast of the latest technological developments. Training sessions included organic chemistry for fire debris analysts, identification of building materials, bloodstain pattern interpretation, and interpretation of mass spectra data, to name a few. Funding for training was provided in part by grants, the Attorney General's asset forfeiture fund, and the Federal Bureau of Investigation.

SIS personnel responded to numerous speaking requests from schools, community clubs, and libraries, as well as city, state, federal, and private agencies. They provided training in fingerprint techniques, criminalistics, and crime scene investigations to police recruits, members of the Citizens Police Academy, new detectives, and other interested groups. The graphic artists taught interested community members how to be effective eyewitnesses by providing accurate descriptions of suspects.

Section personnel again participated in Sherlock Holmes Night, which was held at the Alapai Headquarters on October 27, 2000. They produced the display boards that provided forensic clues for the participants trying to solve the murder mystery.

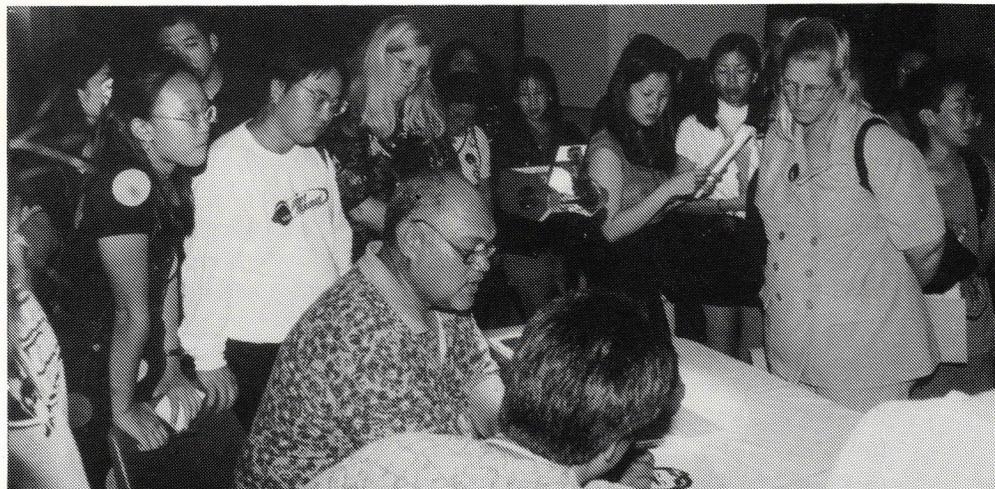

## Legislative Task Force

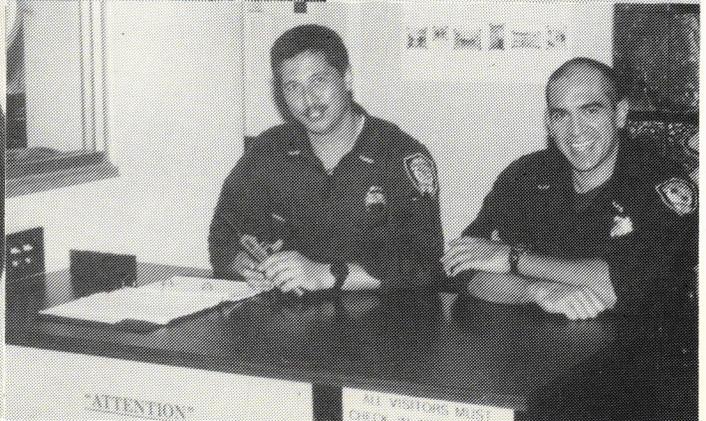

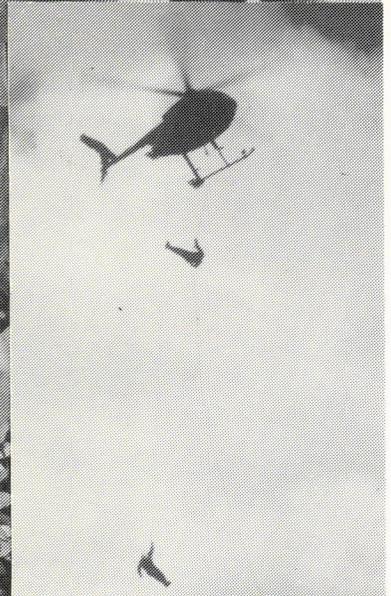

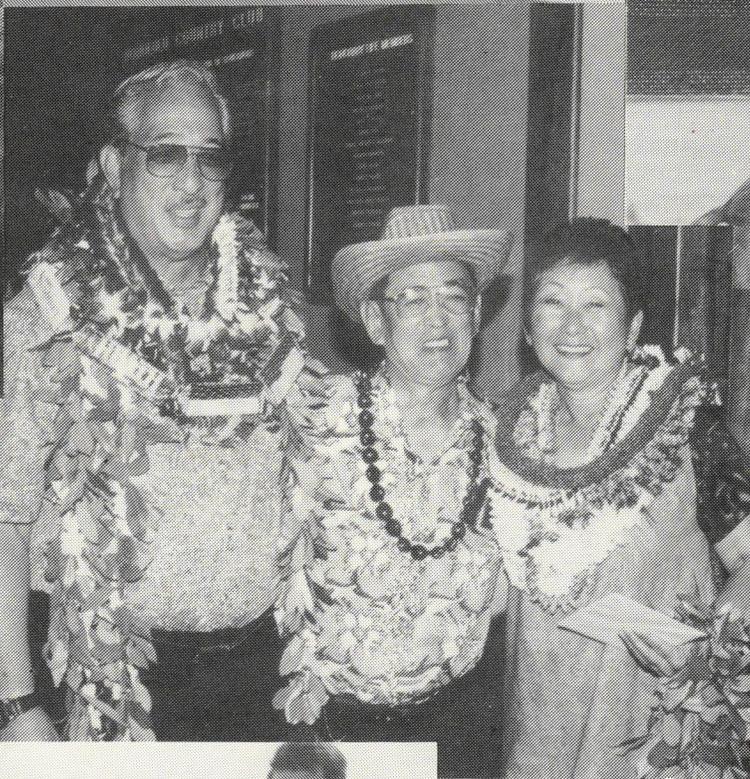

The Legislative Task Force is responsible for the coordination of all legislative matters that concern or affect the operations of the department.

Task force personnel tracked more than 1,100 bills and resolutions at the 2000 session of the Hawaii State Legislature. They also tracked over 100 bills and resolutions at the Honolulu City Council during the year.

A number of measures supported by the department were passed by the 2000 Legislature and signed into law by the Governor. These included bills on robbery, sentencing for murder, child restraints, child protective act, criminal trespass, prostitution, domestic violence, telemarketing fraud, habitual criminal behavior, the pilot program for photo-radar traffic enforcement, and fireworks. Bills supported by the department that did not pass included one that would have required convicted defendants to serve 85 percent of their sentences; another would have required mandatory jail sentences for felony and multiple misdemeanor convictions.

The task force also provided classes for the department and personnel from other county police departments on laws newly enacted by the Hawaii State Legislature.

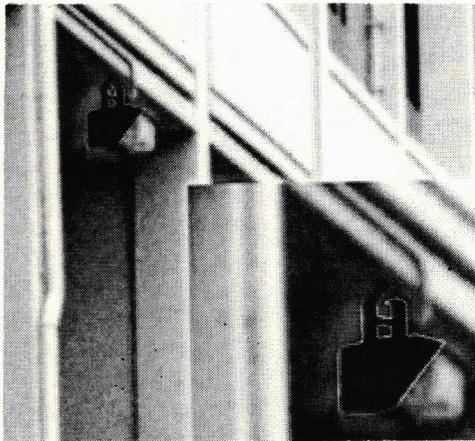

## Central Receiving Division

The Central Receiving Division (CRD) is responsible for the main booking and detention facility at the Alapai Headquarters. As a result, CRD processes most adults and juveniles arrested on Oahu. All people arrested in Districts 1, 6, and 7 are taken to CRD for booking and held until they are released or taken to court. Persons arrested in other districts who cannot post bail or must be held overnight are also brought to CRD.

In addition, CRD is responsible for providing security for the Alapai Headquarters and for managing the station's arsenal.

In 2000, the division continued working with service contractors to enhance the multiplex camera system in the Alapai Headquarters. The system currently includes 32 cameras that provide effective coverage of the division and the headquarters building. The video recordings also provide valuable tools for internal investigations.

## Specialized Services Division

The Specialized Services Division (SSD) consists of a Canine Unit, Helicopter Section, Parks Detail, and Task Group. Task Group functions include special weapons and tactics (SWAT), dignitary protection, Hawaiian sovereignty liaison, and the Bomb Detail. The division also serves temporary restraining orders (TROs) where weapons may be involved, enters and secures sites where search

warrants are being executed, and provides assistance to other elements and agencies as requested.

The division's seven canine/handler teams responded to 220 requests for assistance in 2000. These included searches for missing persons, fleeing suspects, explosives, and narcotics. Teams assigned to the Narcotics/Vice Division's Airport Detail operate at the Honolulu International Airport. Their efforts resulted in the recovery of 66 pounds of marijuana, 19 kilograms of cocaine, 7 kilograms of crystal methamphetamine, and 29 ounces of heroin, and the seizure of \$500,000 in currency in 2000. The explosive detection teams were called out on 12 occasions.

The Bomb Detail responded to 65 service calls involving military ordnance, improvised explosive devices, commercial explosives, and hoax devices. The detail was also busy with the disposal of illegal fireworks. Record seizures of fireworks at the end of 1999, including one of 14 tons, required special handling and disposal procedures. However, this experience prepared the unit for a 1,800-pound seizure at the end of 2000.

The Helicopter Section completed 430 assignments in 2000. Working with the Narcotics/Vice Division, the section helped recover 10,614 marijuana plants with an estimated value of more than \$10 million. The section also aided in the recovery of 63 stolen cars.

The Parks Detail serviced the hundreds of parks on Oahu. In 2000, its officers issued 3,538 citations for parking and other violations.

The SWAT teams were called out 16 times during the year for incidents involving armed, barricaded suspects. For example, on April 13, 2000, a Waianae man took his wife hostage in their home. Crisis negotiators talked to the man over a ten-hour period, but then the negotiations broke down and the man threatened to stab his wife.

SWAT officers burst into the residence and found the man in a bedroom holding a knife to his wife's throat. In the brief struggle that followed, officers were able to take away the knife and arrest the man with no significant injuries to anyone.

The division served 230 temporary restraining orders in 2000, which resulted in the recovery of 161 firearms. SSD personnel provided entry and scene security in the service of 110 search warrants without significant injuries. Officers also made 35 arrests for outstanding warrants and captured one escapee.

### Traffic Division

The Traffic Division investigates motor vehicle collisions and promotes the movement of traffic on public roadways through educational programs, traffic management, and the enforcement of traffic laws.

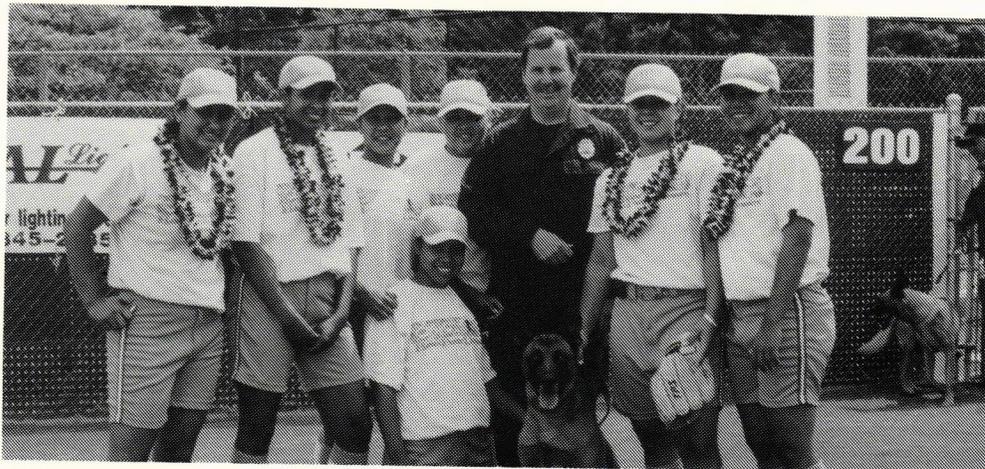

The Vehicular Homicide Section investigates collisions involving death and critical injuries and felony traffic crimes, and it provides oversight and follow-up work in other cases. The section continues to emphasize technology and training in order to expedite the investigation of collision cases and to help determine where traffic safety efforts should be focused. The section dealt with 66 traffic fatalities on Oahu in 2000, compared to 47 in 1999.

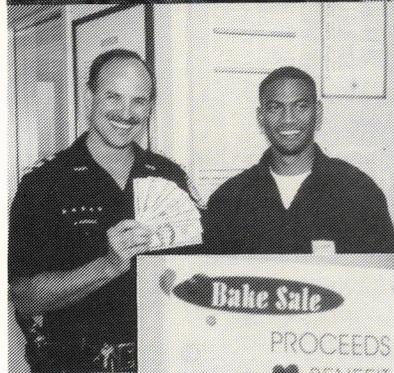

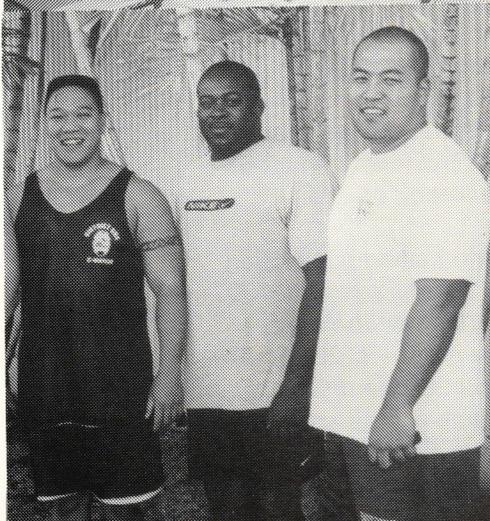

The Solo Motorcycle Detail provides highway traffic management by acting as a deterrent to violations and responding to specific problems. Enforcement programs are adapted to address traffic trends and concerns as they arise. In 2000, for example, the section targeted aggressive driving, driving under the influence, and occupant protection violations.

In August 2000, the division launched its Responsible Driver Program in which unmarked vehicles were used to detect traffic violations related to aggressive driving. Aided by generous media coverage and enforcement efforts, this program appears to have made an impact on the attitudes of many drivers.

The Parking Enforcement/Collection Section issued an average of 5,400 citations for parking and related violations every month in 2000. The volunteers who staff the disabled parking enforcement program issued more than 3,000 disabled parking citations during the year.

The Junior Police Officer (JPO) Section coordinates the work of nearly 5,000 JPOs and about 170 adult traffic monitors who help to provide traffic safety assistance to the children traveling to and from elementary schools. The program services about 150 public and private schools on Oahu. The division hosts an annual picnic for the JPOs as a reward for their participation.

## Finance Division

The Finance Division oversees the department's annual operating budget, which amounted to \$152,327,000 in the 2000-2001 fiscal year. The budget covered all salaries, fringe benefits, and equipment purchases.

The division also coordinated or managed 22 federal and state grants totaling more than \$14,700,000. These grants covered programs such as community policing, Drug Abuse Resistance Education, drug and marijuana eradication, gang prevention, family violence projects, sobriety checkpoints, speed and safety belt enforcement, forensic DNA testing, commercial auto theft, clandestine drug laboratory enforcement, and mobile data computers.

The division hired a full-time grant writer in March 2000 to help seek available grant funds and monitor the progress of existing grants.

## Human Resources Division

Recruitment was again a major focus of the Human Resources Division (HRD) in 2000, with the primary emphasis on candidates for police recruit and police radio dispatcher positions. Four police recruit classes were started during the year with 226 candidates, as well as two police radio dispatcher classes with 22 candidates. (Classes in 1999 had 150 police recruit candidates and 18 police radio dispatchers.)

A number of changes in strategy were made in 2000 in order to enhance the future recruitment of candidates for police officer positions. For example, in the future HRD will emphasize attracting candidates who share and support our "corporate culture," that is, the values of integrity, respect, and fairness. Recruitment materials will showcase positive community interactions and partnerships. Instead of publicizing "benefits," recruitment will focus on the ways in which an individual can make a positive difference in the community.

To attract the current generation of applicants, recruitment presentations are being converted to a "high-tech" computerized format. In addition, a professional recruitment environment is being developed in the new Career Processing Center in the Standard Finance building at 715 South King Street. In this facility, candidates will be able to take the police recruit written examination on-site and learn the results immediately. They will also be exposed to the department's culture via presentations, literature, and videos.

Elimination of the state residency requirement has made it possible for HRD to recruit retiring military personnel as well as seek out-of-state applicants (via the Internet).

"Recruitment Expos" will continue for police recruits and will be expanded to include dispatchers as well. The expos will coincide with scheduled written examinations for both recruits and dispatchers.

HRD continued to make use of its partnership with the University of Hawaii Athletic Department in 2000, producing recruitment announcements that were aired at athletic events and staffing recruitment booths at the event sites.

Finally, an internship program for potential police officer candidates is being developed. This will provide an "anchor" for applicants who wish to complete their college education first

and then seek a career in law enforcement.

An agreement was reached between the department and the State of Hawaii Organization of Police Officers to extend the initial probationary period for new police officers to 18 months. Because academy and field training of recruits took up 40 of the 52 weeks of the former probationary period, there was insufficient time to properly evaluate new officers working on their own. The new probationary period went into effect with the 134th Recruit Class, which started in January 2000.

In addition, HRD began work in 2000 with the city's Department of Human Resources to make basic changes in the promotional process for police personnel. Written examinations and oral interviews will be eliminated in favor of an "assessment center." The assessment center uses and tests for "real world" abilities and attributes to identify the most qualified candidates for sergeant/detective, lieutenant, and captain. Site visits in San Francisco and training by the International Association of Chiefs of Police have helped expedite this process.

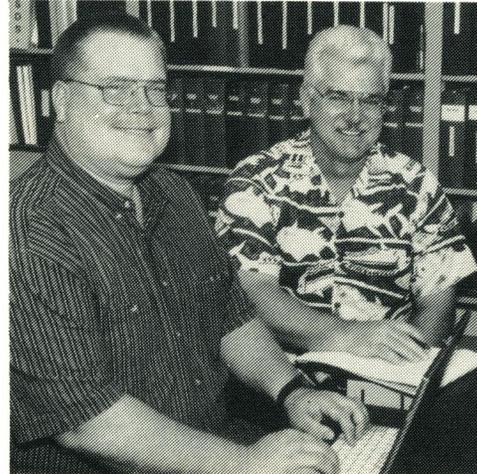

## Information Technology Division

The Research Section continued converting departmental directives into the new format. It also began entering into the directive system the many changes that will be required for compliance with accreditation standards.

A study of the compressed work schedule (known as 3/12) was completed in April 2000, and work continued on a variety of other research topics throughout the year. Work also continued on updating departmental forms and computerizing them to facilitate future changes.

The Research Section lieutenant and a detective on special assignment from the Criminal Investigation Division

continued training officers to use the new mobile data computers (MDCs). About 650 officers had completed this training by the end of the year. Installation of all 1,200 MDCs is expected in the first half of 2001.

A Byrne Memorial grant was obtained to provide computers, printers, and training for personnel using the Geographic Information System. All eight patrol districts will eventually be able to make maps and plot crime information for themselves.

The Data Processing Section continued working on the selection of a vendor for the Automated Field Reporting (AFR) system, which will eventually permit officers to write reports in the field and submit them electronically via their MDCs. This system is expected to be operational by the end of 2001.

A vendor was selected for the new National Crime Information Center (NCIC) 2000 system; all state systems must be compatible with the FBI's national system by 2002. The NCIC 2000 system is expected to be operational by the middle of 2001. A future expansion of the capabilities of this system will permit officers to take mugshots and fingerprints of suspects in the field and check them electronically against criminal history files. This should greatly facilitate the identification of wanted persons.

The section continued working on the upgrade of the mugshot system to

increase its availability and improve response time. All regional stations had mugshot capabilities by the end of 2000. The mugshot capabilities will be integrated into the new records management system in the long run.

### Training Division

In 2000, the Training Division graduated 140 police recruits in three recruit training classes. This reflected a slight increase over the 130 recruits who graduated the previous year. Three new recruit classes started during the year, an increase of one over 1999.

During its period in training at the police academy, each recruit class is expected to complete a minimum of two community service projects. Examples in 2000 included the construction of a playground for children with special needs, participation in blood drives, and the grand opening of the Kapolei Station.

The Annual Recall Training I (ART I) program is a five-day session in which an entire watch from each patrol district receives training. This includes annual mandatory training in firearms, sexual harassment, bloodborne pathogens, hazardous materials, cardiopulmonary resuscitation, and the physical fitness assessment known as Fit for Life. During the year, the division held 32 ART I training sessions that reached

867 officers. The program is staffed by an officer on special assignment from each of the eight patrol districts.

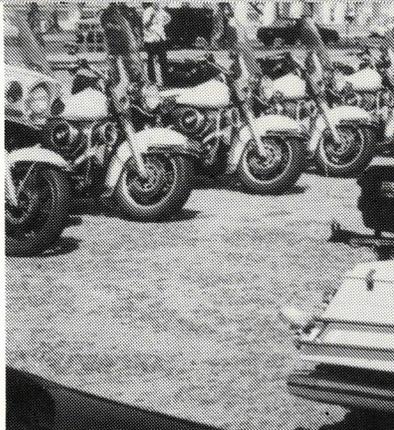

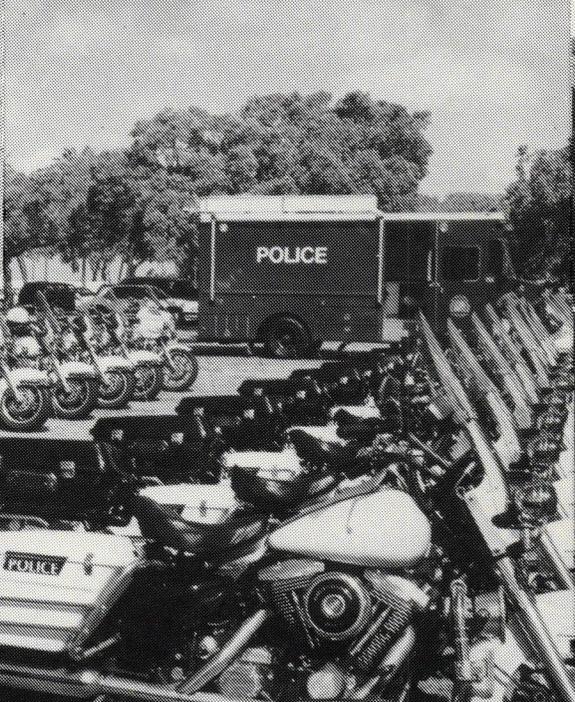

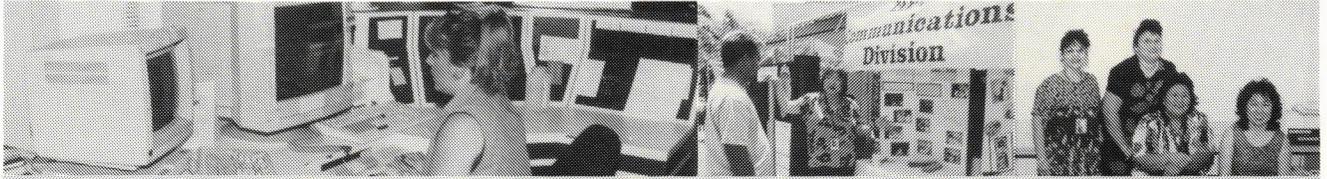

From April through October 2000, the Annual Recall Training II (ART II) program was conducted for non-patrol officers through the rank of captain. ART II is a two-day program designed to cover training in mandatory subjects. Twenty sessions were held for 629 police personnel. The program was completed with the assistance of six officers on special assignment to the Training Division. In addition, the division provided specialized training in a number of subjects, e.g., supervisory training for new sergeants (two weeks), conflict management simulation training for personnel from the patrol districts and the Mounted Unit, and automatic external defibrillator training. The division also presented an instructor development course, completed the eight-hour expandable baton transition training, and trained officers in the proper conduct of building searches.

In 2000, the division held the second annual individual and group competitions in control and arrest tactics, Fit for Life, and firearms events. This program is designed to reinforce physical fitness and functional skills while building morale.

### Human Services Unit

The Police Psychologist saw employees for consultation and counseling throughout 2000. She also acted as a backup and consultant for the Peer Unit and taught classes for recruits and officers at the Training Academy.

A second psychologist position was filled during the year; this enabled the department to refine and expedite the screening process for police recruits. In addition, to improve the coordination of services, the chaplaincy program was transferred to the unit from the Human Resources Division.

## Communications Division

During the year 2000, the Communications Division received about 946,820 calls for emergency and other police services on the enhanced 911 system. This is an increase of almost 146,000 calls from the previous year. Over 200,000 of these calls came from cellular telephones, which reflects the increase in wireless telephone use on Oahu.

During Police Week in May 2000, Supervising Police Radio Dispatcher Terry Ann Kaiwi was named the department's Civilian Manager of the Year (see Awards Section). She was honored at ceremonies at the Alapai Headquarters and the City Council.

## Records and Identification Division

The document imaging system was expanded during 2000 to include the Wahiawa, Pearl City, and Kaneohe district stations. Investigators at these stations are now able to access police reports at the push of a button. This avoids all the delays that were formerly involved in moving paper copies of reports from the Alapai Headquarters to other stations.

Similarly, copies of motor vehicle collision reports can now be transmitted electronically to insurance companies in response to their requests. This use of technology saves the time that was formerly spent in locating, duplicating or faxing, and refiling paper reports.

The document imaging system is now also being used to store geographical restriction information. This provides a much more efficient means of accessing and distributing this information to officers in the field, who must have specific, detailed information about each geographical restriction before taking enforcement action.

In September 2000, the Firearms Section implemented the Electronic Trace Submission System of the Bureau of Alcohol, Tobacco and Firearms (ATF). This allows section personnel to enter firearm data into the ATF national database so that weapons can be traced. All firearms surrendered to police are now entered into the system to determine whether they are linked to any criminal activity.

With the assistance of the Information Technology Division, work continued during the year on development of the new computer aided dispatch/records management system (CAD/RMS). A vendor was selected in 2000 and a contract should be signed in early 2001. The CAD portion of the project should be finished in late 2001 and the RMS portion some time in the latter part of 2002.

## Telecommunications Systems Section

A number of initiatives were under way in 2000 in an effort to enhance the 800 MHz Digital Voice Trunking System. Com-Net Ericsson redesigned the system to add channels in order to accommodate the department's mobile data computers and to bring other city agencies onto the system. The city will add amplifiers in the Diamond Head, Kalihi, and Castle Junction areas in an effort to improve coverage. In addition, the department will install an alternate communication center at the Kapolei Station for use in emergencies.

## Vehicle Maintenance Section

Plans for the existing vehicle maintenance facility at Alapai were revised, making it possible to cancel the projected new repair facility in Halawa. This will result in substantial savings for the department and the city.

The Informational Resources Section (IRS) operates and/or coordinates a number of the department's special projects and events.

## HPD Museum

The Honolulu Police Department Museum houses exhibits that tell the story of the department from its inception through the present day. The museum is the most popular stop for visitors touring the Alapai Headquarters and had over 7,000 visitors in 2000.

## Speakers Bureau

IRS coordinates the departmental Speakers Bureau, which provides experts on subjects such as home and personal security, robbery and theft prevention, child security, traffic safety, drug awareness, domestic abuse, and workplace violence. Over 900 requests for speakers were handled in 2000.

## Hō'ike Information Line

The Hō'ike Information Line continued to provide the public with a contact point from which they can obtain answers or referrals for police-related questions. Anyone with a question can call 529-3352 on weekdays during normal business hours. During the year, over 2,400 calls were handled via the information line.

## Citizens Police Academy

Held twice a year, the Citizens Police Academy is designed to open lines of communication between the public and the police department. By enrolling in this academy, members of the public can gain a firsthand understanding of what it takes to become an officer. Among other things, participants come to realize the educational, physical, and

emotional demands endured by those who serve in law enforcement. It is hoped that this heightened understanding will correct some of the misconceptions about police work and foster mutual respect between the public and the department.

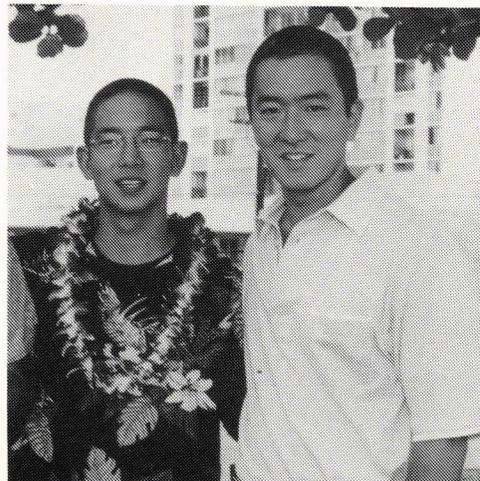

## Youth Citizens Police Academy

The first Youth Citizens Police Academy was held in 2000. It consisted of young men and women at the sophomore, junior, and senior levels in high school. Again, the goals are to impart understanding about police work to the participants and to enhance the relationship between them and the department.

## Other Activities

IRS continues to coordinate the department's awards system and activities that are part of the national observance of Police Week each year in May. It also maintains the department's Internet web pages (see [www.honolulu.org](http://www.honolulu.org) or send e-mail to [hpd@honolulu.org](mailto:hpd@honolulu.org)).

In 2000, the section played a large role in planning and coordinating events such as Sherlock Holmes Night, the conferences of the Major Cities Chiefs and the Hawaii State Law Enforcement Officials Association, and the National Conference on Diversity.

Certificate of Merit

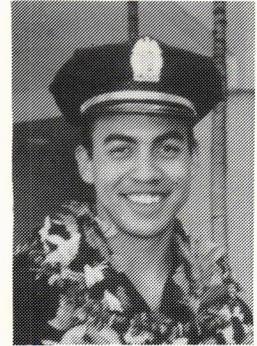

This award is given to departmental employees who distinguish themselves by exceptional performance of duty or periods of outstanding and faithful service, acts, or achievements.

Major statistics are presented on pages 36 through 51. For purposes of presentation, statistics are categorized in different ways.

For instance, offenses are counted in two ways: actual and reported.

"Actual offenses" are defined according to the standards of the Uniform Crime Reporting program of the Federal Bureau of Investigation (FBI). Counts of actual offenses are a common measure of crime. The data that appear on pages 36 through 41 are based on actual offenses.

"Reported offenses" include unfounded complaints, which are screened out in the counting of actual offenses. Counts of reported offenses are a common measure of workload. The data on pages 42 through 51 of this section are based on reported offenses.

In addition, offenses are divided into two major categories: Part I and Part II.

Part I offenses generally correspond to the major offense categories used by the FBI (see page 36). For the purposes of this report, the Part I category has been broadened to include negligent manslaughter.

Part II offenses represent all offenses not counted under Part I.

Pages 42 and 43 summarize both Part I and Part II data for the eight patrol districts into which Oahu is divided. Pages 44 through 51 summarize Part I data for each beat within the eight patrol districts.

Beat and district boundaries underwent some significant changes in 1997 and 1998. As a result, the beat and district data presented for the year 2000 are comparable to the data for 1999, but they are not comparable to the data presented for 1998 and earlier years.

Seven serious offenses are used to define trends and make comparisons across the nation. These offenses are called index crimes, and data about them are drawn from the Federal Bureau of Investigation's Uniform Crime Reporting (UCR) program. The offenses consist of four violent crimes (murder, forcible rape, robbery, and aggravated assault) and three property crimes (burglary, larceny-theft, and motor vehicle theft).

During 2000, a total of 46,659 index crimes were reported to the Honolulu Police Department, an increase of 9 percent from 1999. This reversed the trend of declining offense totals that had gone on since 1996. Violent crimes increased slightly (5 percent), although there was a substantial drop in the number of murders. Property crimes increased almost 10 percent, with higher numbers in all three categories. Even though both violent and property crimes increased from 1999 to 2000, the totals in both categories were lower than in 1998.
