Mission

We, the men and women of the Honolulu Police Department, are dedicated to providing excellent service through partnerships that build trust, reduce crime, create a safe environment, and enhance the quality of life in our community.

We are committed to these principles:

INTEGRITY

We have integrity. We adhere to the highest moral and ethical standards. We are honest and sincere in dealing with each other and the community. We have the courage to uphold these principles and are proud that they guide us in all we do.

RESPECT

We show respect. We recognize the value of our unique cultural diversity and treat all people with kindness, tolerance, and dignity. We cherish and protect the rights, liberties, and freedoms of all as granted by the constitutions and laws of the United States and the State of Hawaii.

FAIRNESS

We act with fairness. Objective, impartial decisions and policies are the foundation of our interactions. We are consistent in our treatment of all persons. Our actions are tempered with reason and equity.

... in the spirit of Aloha.

A Message From the Mayor

The people of our community deeply appreciate the men and women of the Honolulu Police Department whose dedication and professionalism are vital to making our city one of the safest in the country.

The Honolulu Police Department protects lives and property 24 hours a day; fighting crime, ensuring homeland security, promoting safe behavior, and providing excellent prevention and education programs. It truly is an elite department, one of a select few to be certified by the national Commission on Accreditation for Law Enforcement Agencies, Inc.

This 2006 Annual Report details the activities and accomplishments of "Honolulu's finest" and documents how they play an integral role in safeguarding and preserving our special island of aloha.

I proudly salute the more than 2,500 sworn and civilian employees of this outstanding organization for their devotion to duty in serving the residents and visitors of the City and County of Honolulu.

A handwritten signature in black ink, reading "Mufi Hannemann". The signature is fluid and cursive, with a long horizontal stroke at the end.

MUFI HANNEMANN, MAYOR
City and County of Honolulu

Honolulu Police Commission

(Benjamin Saguibo, Keith Amemiya, Charlian Wright, Boyd Andrade, Paul Leong, Carol Takahashi, and Mark Hunsaker)

The Honolulu Police Commission is made up of seven members who are appointed by the Mayor and confirmed by the City Council. All members serve staggered terms of five years. They volunteer their services and do not receive any compensation.

A chair and vice chair are elected from within its membership every year. The commission chair for 2006 was Boyd S. Andrade, and the vice chair was Paul T. Leong.

The commission has the following mandated responsibilities:

- appoints and may remove the Chief of Police;
- evaluates the performance of the Chief of Police at least annually;
- reviews rules and regulations for the administration of the Honolulu Police Department;
- reviews the annual budget prepared by the Chief of Police and may make recommendations thereon to the Mayor;
- compares at least annually the actual achievements of the police department with the goals and objectives in the five-year plan; and
- receives, considers, and investigates charges brought by the public against the conduct of the department or any of its members and submits a written report of its findings to the Chief of Police.

The commissioners are committed to continue working proactively with the department to address problems regarding police conduct and other issues.

A Message From the Chief

Aloha,

During 2006, public involvement continued to be an invaluable part of each community's policing efforts. Membership in Neighborhood Security Watches and various citizen groups increased in all parts of the island. These groups developed projects that addressed safety in the homes and on the streets. Traffic safety for motorists and pedestrians was of particular concern throughout the year.

Exceptional teamwork between uniformed and plainclothes officers, which included the sharing of information and special skills, formed a unified attack on both routine and atypical crime problems.

Field operations continued to take advantage of technology to improve efficiency and effectiveness. The LiveScan Automated Fingerprint Identification System reduced fingerprint processing time. Testing began on radar guns that can now scan license plates for an automatic comparison to a database of stolen vehicles.

It is particularly rewarding to have the standards achieved by departmental employees recognized by the Commission on Accreditation for Law Enforcement Agencies, Inc. (CALEA). The department was reaccruited by CALEA, and other elements attained additional CALEA accreditations of their own.

I am proud of the men and women of the Honolulu Police Department. Their accomplishments demonstrate the finest example of professionalism in a law enforcement organization that is committed to improving the quality of life in our community.

A handwritten signature in black ink that reads "Boisse P. Correa".

Honolulu Police Administration

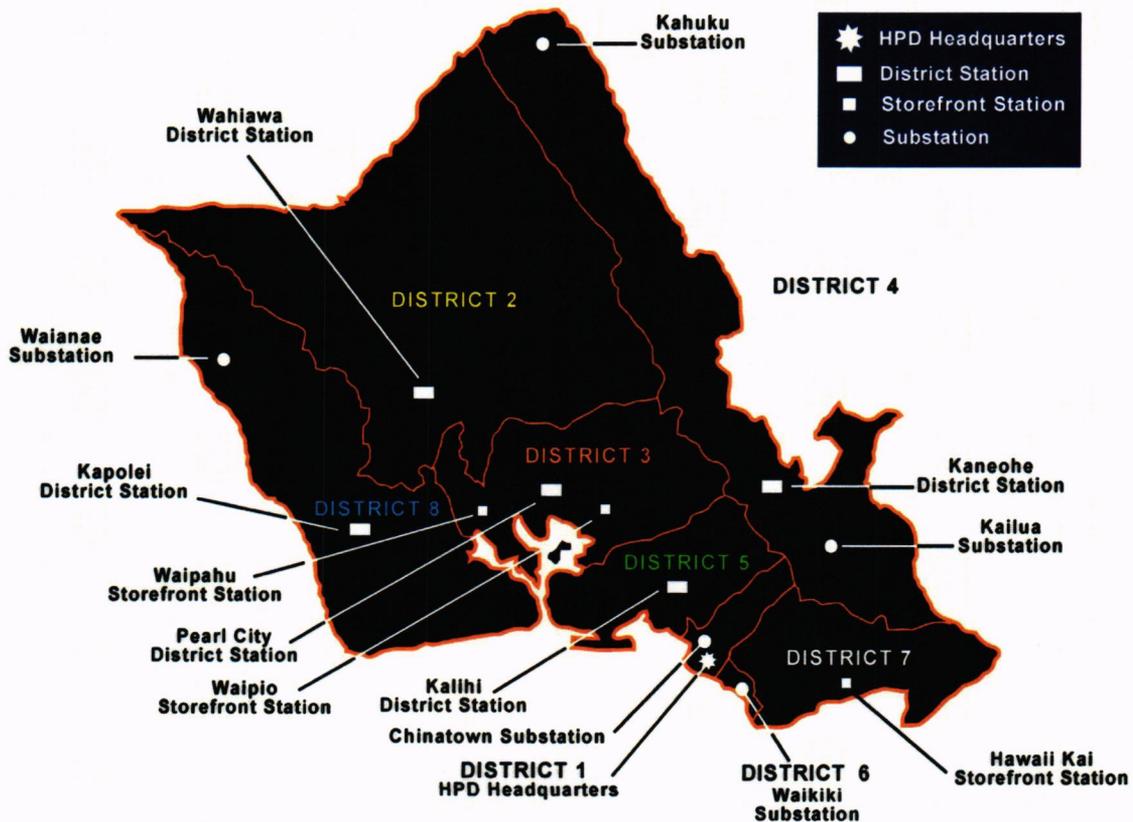

Powers, Duties, and Functions

The Honolulu Police Department serves as the primary law enforcement agency for the entire island of Oahu. The Chief of Police directs the operation and administration of the department and is responsible for the following:

- preservation of the public peace;
- protection of the rights of persons and property;
- prevention of crime;
- detection and arrest of offenders against the law;
- enforcement and prevention of violations of state laws and city ordinances; and
- service of processes and notices in civil and criminal proceedings.

The department's jurisdiction is the City and County of Honolulu. It includes the entire island of Oahu, which has a circumference of about 137 miles and an area of some 596 square miles. The estimated resident population is about 769,464, which includes military personnel but not tourists.

For police operations, the island is divided into eight patrol districts. Each district is subdivided into sectors and beats. The department's headquarters is located at 801 South Beretania Street in downtown Honolulu. District stations are found in Kalihi, Pearl City, Kapolei, Wahiawa, and Kaneohe. Other facilities are identified on the map below and in the narrative parts of the report.

Field Operations

DISTRICT 1

District 1 encompasses almost eight square miles in downtown Honolulu, spanning from Liliha Street to Punahou Street and from the ocean to Pacific Heights, Pauoa Valley, and the Makiki/Tantalus area. The resident population is approximately 70,000 people. As the retail, financial, and political center of the state, the actual number of people in the district at any given time is much greater. The Chinatown Substation at 79 North Hotel Street provides a permanent police presence in downtown Honolulu. This facility houses the district's Bicycle Detail, the Burglary-Theft Detail, and the Project Outreach Worker.

The district's Weed and Seed program in the downtown Honolulu area continued to experience success this year. This community restoration program is designed to reduce or "weed" criminal elements out of the district and initiate or "seed" the area with services and economic revitalization programs. These positive programs help to strengthen and empower residents in the area and encourage community spirit. Through the efforts of the district's officers, the Weed and Seed program was expanded this year to include the Kapiolani and McCully areas. In addition, officers administer the district's Law Enforcement Explorers Program which teaches high school students discipline and responsibility through various community activities, such as the Special Olympics and the Keiki Identification Program.

In addition to performing their regular surveillance on bicycles, the Bicycle Detail officers also patrol the Ala Moana Beach Park on all-terrain vehicles. These vehicles grant officers access to areas that were once difficult to patrol. The community response has been positive, and the vehicles will continue to be used to help prevent crime.

Field units in the district began initiatives to specifically address speeding and pedestrian safety. As a result, a total of 990 citations and 295 Traffic Safety Awareness Cards were issued for speeding. Pedestrian safety was also targeted with the issuance of 634 citations and 1,597 Traffic Safety Awareness Cards. Officers working the night watch continued their aggressive campaign against impaired drivers. By enforcing the Operating a Vehicle Under the Influence of Intoxicants law, officers effected 841 arrests in 2006.

In the continuing effort to add helpful "eyes and ears" out in the community, the Kalaniuhia and Pumehana apartments were included this year to the district's Neighborhood Security Watches. Also, the Keeaumoku Wal-Mart store joined the ranks of Citizen Patrols by partnering with the existing Sheridan Street patrol and contributing supplies as well as employees to join in the walks.

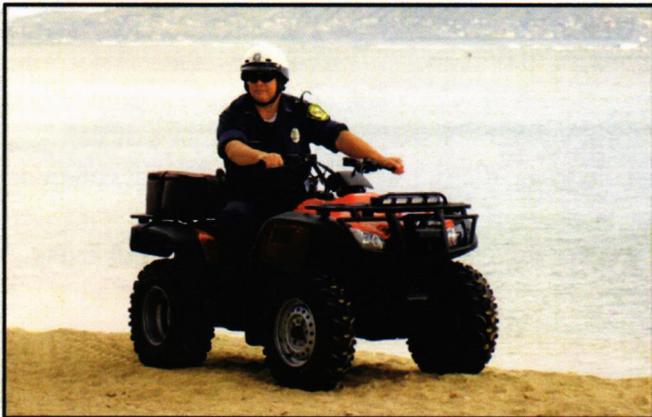

Realizing the importance of interagency cooperation, the Crime Reduction Unit, Weed and Seed Detail, and Narcotics/Vice Division officers joined forces with the federal Drug Enforcement Administration; the Bureau of Alcohol, Tobacco, Firearms and Explosives; and the Office of the U.S. Attorney to suppress illegal drugs and firearms activities. In addition, the district participated in other projects that involved the U.S. Marshals Service, U.S. Secret Service, and Sheriff's Division of the state's Department of Public Safety.

DISTRICT 2

District 2 covers approximately 204 square miles from Central Oahu to the North Shore between the Waianae and Koolau mountain range and is bounded on the south by Kipapa Gulch and the Waiahole Ditch. The area includes the communities of Wahiawa, Mililani, Mililani Mauka, Whitmore Village, Waialua, Mokuleia, and Haleiwa, as well as Wheeler Army Air Field and Schofield Barracks. The district's headquarters is located in Wahiawa at 330 North Cane Street.

The district continued to move forward with strategies that are based on policing led by intelligence information. A form of intelligence-led community policing that was developed by the district is the Crime Analysis and Targeting (C.A.T.) program, which is a primary example of how citizens can be educated to help police and themselves. The program's objective is to provide relevant, helpful,

and timely information to the public and police so that their cooperative efforts are more efficient and effective.

The C.A.T. program is also a component of the district's three-pronged approach of using high visibility, public education, and community partnerships to reduce property crimes. Another component is the district's all-terrain vehicle (ATV) patrol units. The ATVs enhance the officers' ability to reach secluded, off-road areas as well as to provide

high profile patrolling along the beaches. Increased police presence can also help to curtail burglaries of beachfront homes and other illegal activities along the coastline.

All three watches made personnel available to continue the Line Patrol program on the H-2 Freeway from the District 2/District 3 boundary to Schofield Barracks. Focusing on a main thoroughfare 24 hours a day, 7 days a week, the Line Patrol program set out to effectively address four major objectives in the area: provide high visibility police presence, assist stalled and stranded motorists, enforce moving violations, and manage traffic problems.

In an effort to increase crime prevention awareness and to promote public efforts to combat crime, District 2 officers continued their involvement in numerous community presentations: Keiki Identification, elementary and secondary school crime presentations, senior citizens' group presentations, business security check programs, residential security check programs, Neighborhood Security Watch (NSW) meetings, Wahiawa Police Activities League, and neighborhood board meetings. District 2 officers continued to work closely with the 155 active neighborhood security programs consisting of 5,248 members. Officers provide information and guidance to NSWs and the Agricultural Watch in order to keep up interest and membership while working to revitalize inactive groups.

District 2 continued its Quality Management concept in meeting with first-line supervisors. Every other month, all district sergeants and detectives meet as a group with the district's command staff. During the other months, two officers from each watch and one officer from another element meet with the district's command staff. In addition to sharing productive ideas and formulating plans to resolve challenges, various projects are discussed and new methods are developed to improve the quality of life in the community.

DISTRICT 3

District 3 encompasses a geographical area that includes Pearl Harbor, Halawa, Aiea, Pearl City, Waipio, Waikele, and Waipahu. Storefront sites are located in the Waipahu and the Waipio Gentry Shopping Centers. The district also maintains an office in the Waimalu Shopping Center. District 3 serves approximately 160,000 residents. Calls for service totaled 84,935.

The Weed and Seed program covers the area of Waipahu, west of Waipahu Depot Street. In 2006, the Weed and Seed team executed 10 search warrants and arrested 15 wanted fugitives/suspects and 14 other individuals. Patrol units specifically addressed complaints of drug abuse and school property crimes that resulted in numerous arrests for drug offenses, property crimes, and public drinking. In District 3, there were 50 Neighborhood Security Watches with 1,454 members by the end of 2006. There were also 18 citizen patrol groups with 585 members by year's end.

Officers of the Crime Reduction Unit (CRU) operate in plainclothes to support the efforts of uniformed officers in the field. To combat the prevalent use and distribution of crystal methamphetamine, CRUs throughout the island continued to emphasize drug suppression operations. During the year, District 3 CRU officers effected 859 arrests: 253 felonies,

128 misdemeanors, 162 traffic offenses, and 316 warrants. They also executed 16 search warrants and recovered 26 firearms, 1,000 grams of crystal methamphetamine, 5 vehicles, and \$120,000.

Investigating burglary and felony theft offenses is the responsibility of the district's Burglary-Theft Detail. During the year, the detail received 4,848 cases; 478 were assigned for further investigation and 370 were closed. There were 65 cases conferred with the city's Department of the Prosecuting Attorney. The detail continued to be the driving force behind the grant-funded, educational program, "Keep Your Identity." Under this program, detectives conducted 51 public presentations throughout the year to educate 2,360 citizens about identity theft crimes. In addition, the program enabled detectives to distribute informational brochures and booklets on identity theft to the general public.

The Prevention, Intervention, Treatment to Stop Thieves Operating Permissively (PIT-STOP) program continues to operate in District 3. An agreement was reached with the city's Department of the Prosecuting Attorney whereby suspects arrested for a stolen vehicle in the district would be immediately charged. The success of the program has led to its expansion to the Kalihi and Central Honolulu patrol districts.

District 3 continued to coordinate two grants that were awarded from the Edward Byrne Memorial Justice Assistance Grant. The \$70,000 award for "Project Clean Sweep" will be used to make undercover purchases of unlawfully obtained or possessed firearms. Another \$35,000 award for "Keep Your Identity" will be used to continue educating the public about the crime of identity theft. The district was able to extend both grants until the first quarter of 2007.

DISTRICT 4

District 4 encompasses an area of Windward Oahu covering about 127 square miles from the Koolau Mountains to the sea and stretching northwest from Makapuu Point to the mouth of Waialeale Stream just past Kawela Bay. The communities include Waimanalo, Lanikai, Kailua, Kaneohe, Ahuimanu, Kahaluu, Waikane, Waiahole, Kaaawa, Punaluu, Hauula, Laie, and Kahuku. The main station is located at 45-270 Waikalua Road in Kaneohe, and full-service substations are located in Kailua at 219 Kuulei Road and in Kahuku at 56-470 Kamehameha Highway.

Traffic safety and the reduction of traffic injuries and fatalities continued to be a high priority for District 4 officers. Communication and cooperation with the public were as vital as enforcement in this commitment to improve traffic conditions. Strategically placed speed monitor displays throughout the district, combined with laser gun enforcement, has heightened awareness and helped to slow down motorists and change their driving habits. Another example of cooperation is the use of saturation patrols (intensive high-visibility patrolling) and Community Traffic Awareness Partnerships (C-TAP). Citizens participating in the C-TAP held signs and waved to motorists to send the message that neither the police nor the community would tolerate unnecessary traffic deaths and injuries in the area.

The Burglary-Theft Detail, Misdemeanor Follow-up Detail, Crime Reduction Unit, and Bicycle Detail continued to work together with field units to specifically address the increase of property crimes in the district. Efforts focused particularly on the apprehension of repeat offenders who often contribute largely to this ongoing problem. Bicycle Detail officers used bicycles and all-terrain vehicles to negotiate secluded, off-road beach areas where thieves have previously been able to evade apprehension.

Established community partnerships, like the Neighborhood Security Watch (NSW) program, continued to expand throughout 2006. Through the program, community members were involved in disseminating crime information and devising ways to improve residential security. By the end of the year, the district had 93 NSW programs with a total of 3,902 members. There were also 13 Citizens Patrol groups with 202 members, 2 mobile patrol groups with 20 members, 1 Seniors Against Crime group with 6 members, and a Business Watch group with 40 members. The district also maintained and developed partnerships with 65 community associations, including The 96744 (a nonprofit organization) and Key Project (an outreach program that services youth).

District 4 sponsored blood drives on the Kamehameha Day and Veterans' Day holidays. Both drives were extremely successful, with a total of 175 pints of blood collected over the two days.

The LiveScan Automated Fingerprint Identification System was implemented this year at the Kaneohe Station. The system allows officers to identify suspects through digital fingerprints and can reduce the time the Federal Bureau of Investigation takes to process fingerprints from days to 15 minutes.

DISTRICT 5

District 5, the "Kalihi District," encompasses 36 square miles of central Honolulu and has a resident population of approximately 139,000. The district's boundaries span from Aliamanu to the Pali Highway (west to east) and from the rim of the Koolau mountain range to the central southeastern shoreline of Oahu (north to south). Responsibility for the naval housing area next to the Honolulu International Airport was added to the district's jurisdiction in 2006. This new area includes a shopping complex, the Navy Exchange, and approximately 1,000 military housing units.

District 5 includes six major highways that intersect in the district, with over 395,000 vehicles passing through every weekday. It has the highest density of public housing complexes (13), the highest number of public and private schools (47), industrial zones (3), the most prominent homeless service center (Institute for Human Services), active military installations (6), hospitals (5), foreign consulates (7), nightclubs and liquor establishments (77), the Honolulu International Airport, the Sand Island and Honolulu Harbor's Commercial Shipping Facility, the Oahu Community Correctional Center, and the Laumaka Work Furlough Center.

Since the district is a major corridor for West Oahu commuters, traffic enforcement and management continued to be a high priority. In 2006, patrol officers issued 10,062 citations, which included 2,435 for speeding and 474 for pedestrian violations. District officers also made 101 traffic arrests and 489 arrests for Operating a Vehicle Under the Influence of an Intoxicant.

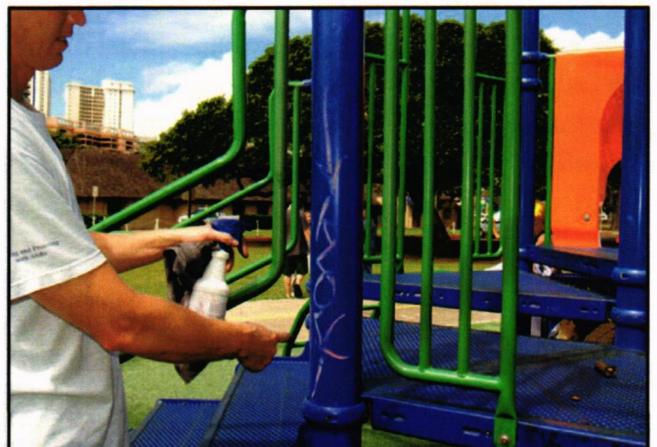

A major challenge this year for the Burglary-Theft Detail was the growing number of copper theft cases. Innovative solutions, such as collaborating with military investigative units and conducting sting operations, began to make some headway toward combating the problem. Also, detectives in the

detail were assigned 3,812 cases in other areas such as fraud and Unauthorized Entry into Motor Vehicles. Detectives' efforts led to the closure of 280 cases, conferral of 35 cases with the city's Department of the Prosecuting Attorney, and recovery of \$18,755 in cash and \$112,305 worth of property.

The Misdemeanor Follow-Up Detail (MFUD) investigated 1,685 cases and forwarded 86 cases for prosecution. A group of officers attached to the MFUD investigated 249 domestic violence cases and processed roughly 74 court documents in 2006.

Many of the Crime Reduction Unit's drug investigations resulted in executed search warrants and seized drugs, money, weapons, and other items. In 2006, the unit made 1,209 arrests, conducted 16 search warrants, and confiscated \$8,819 in cash and \$85,200 worth of property. By monitoring and gathering intelligence on known criminals in the Kalihi area, the unit was able to identify crime suspects based on descriptions from victims and Crime Information Bulletins.

The district's Weed and Seed Detail continued to be involved in socially positive/responsible activities, such as basketball leagues, Graffiti "Paint-Outs," Project Graduation, and Dads Against Doing Drugs. In May 2006, the unit participated in the first Weed and Seed Ohana Day Fair. Also, the four officers of the unit issued 318 citations, handled 348 cases, and effected 201 arrests throughout 2006.

DISTRICT 6

District 6 encompasses the Waikiki peninsula, which is bordered by the Ala Wai Canal, the slopes of Diamond Head, and the Pacific Ocean. The administrative offices are located at the Alapai headquarters. Patrol personnel also utilize the Waikiki Substation located on Kalakaua Avenue fronting Waikiki Beach. The Burglary-Theft Detail and the Crime Reduction Unit (CRU) offices are located on the fourth floor of the Royal Hawaiian Shopping Center.

As the major destination for tourists, Waikiki continued to host many special events in 2006 that attracted large crowds of both vacationers and residents. During the year, the nearly 120 events held in the district included various parades (Aloha Week and Saint Patrick's Day), Brunch on the Beach, Waikiki Hoolaulea, and numerous cultural events (Okinawan and Scottish festivals) at Kapiolani Park. Primary responsibility for security and traffic management for all of these events fell on the officers of District 6.

Partnerships with the district's community continued to be the framework within which officers addressed local concerns and crime problems. For example, the district's CRU offered classes to hotel personnel (management, security, housekeeping, etc.) regarding crime trends affecting their clientele. In addition to community-oriented projects, the two sergeants and

14 officers of CRU conducted investigations that resulted in 158 felony arrests, 123 misdemeanor arrests, and 236 warrant arrests.

Criminals target Waikiki's shorelines/parks because of the high concentration of beachgoers and areas that are difficult to monitor and access with patrol sedans. Officers of the Bicycle/All-Terrain Vehicle (ATV) Detail used highly maneuverable, off-road modes of transportation to provide police presence and effectively address in-progress incidents in this environment. Tourists are also highly susceptible to hotel room burglaries and property thefts. In 2006, the district's Burglary-Theft Detail officers were assigned 3,051 cases and closed 465 cases.

District 6 continued to explore the capabilities of the Geographic Information System (GIS) as officers assigned to the GIS project entered current data to identify crime trends in a timely manner. Maps displaying dates, times, and locations of criminal activities were made weekly and served to increase officers' awareness of new and existing problems in their areas of responsibility. All of the GIS information was made accessible to all officers through their laptop computers. The GIS was also used to map special events, such as parades and the Waikiki Hoolaulea, to monitor the status and deployment of personnel.

The Waikiki Business Improvement District program donated \$75,000 for concentrated enforcement of handbilling, peddling, and other solicitation laws. Another \$150,000 is anticipated throughout the first half of 2007. By the end of 2006, the program resulted in 25 prostitution arrests, 8 peddling arrests, and 31 handbilling citations. Officers also made 64 warrant arrests and 28 drug arrests, cited for 72 liquor law violations, and issued 1,302 other various citations.

DISTRICT 7

District 7 covers approximately 40 square miles of East Honolulu from Punahou Street to Makapuu Point. This includes Manoa, McCully, Kaimuki, Palolo, Diamond Head, Waialae, Kahala, Aina Haina, Kuliouou, Hawaii Kai, Sandy Beach, and Makapuu lookout. The area is predominately residential with supporting infrastructures such as public housing, schools, parks, shopping centers, and the University of Hawaii at Manoa, with a resident population of approximately 147,769.

In April 2006, contractors began construction on a satellite station in the Diamond Head area adjacent to Fort Ruger. The new station will house the district's Burglary-Theft Detail and Crime Reduction Unit (CRU).

While the Diamond Head location underwent renovations during the year, the Hawaii Kai storefront station in the Hawaii Kai Towne Center continued to receive walk-in requests for police services during day and early evening hours.

District 7's Burglary-Theft Detail is responsible for the investigation of all Unauthorized Entry into Motor Vehicle, burglary, theft, and fraud cases. In November, the detail's detectives partnered with security from the University of Hawaii at Manoa to address a growing number of car break-ins, bicycle thefts, and other criminal activities on campus. The

concerted effort resulted in a total of 13 individuals being arrested for various offenses. Detectives in the detail were assigned to 3,546 cases this year, 551 of which were actively investigated due to leads or information gained, and 272 were closed.

In January 2006, the Kaimuki and Aina Haina post offices were burglarized, and among the items taken were several postal money orders. In the ensuing months, 35 of the money orders were cashed at various locations by 12 individuals. In a joint effort with the U.S. Postal Inspection Service and the U.S. Secret Service, an islandwide operation in June resulted in all 12 suspects being charged with Forgery in the First Degree.

Plainclothes officers of CRU led a raid on a drug house on Wihelmina Rise in October 2006. This joint effort between officers and residents in the area culminated in the execution of two search warrants and the recovery of drugs and drug-related items. CRU also helped to create a neighborhood security patrol so that residents can more actively participate in preserving the safety of their community.

On December 9, 2006, officers took time out from their busy schedules to host the district's Shop With a Cop event at the Kahala Mall. Officers donated monies to provide food, fun activities, and Christmas presents to deserving students who are financially less fortunate than others. The district officers have continued their work with the city Department of

Parks and Recreation to have signs posted informing the public of park closures at night. These closures were prompted due to numerous calls for service regarding the homeless, littering, drinking, loud noise, and assaults.

DISTRICT 8

District 8 serves the communities of Ewa, Ewa Beach, West Loch, Kalaeloa (formerly Barber's Point), Kapolei, Makakilo, Campbell Industrial Park, Honokai Hale, Ko`Olina, Nanakuli, Lualualei, Ma`ili, Waianae, Makaha, Keaau, Makua, and Kaena Point.

The district encompasses 128 square miles of which approximately 38 miles is coastline. The Kapolei Police Station is located at 1100 Kamokila Boulevard. The Waianae Substation, located at 85-939 Farrington Highway, provides police services to the Waianae Coast and serves as a base of operations for officers who patrol that community. The Kapolei station acts as a multidivisional police station. In addition to patrol operations, the station houses offices for the Criminal Investigation, Juvenile Services, and Narcotics/Vice Divisions. The Kapolei Receiving Desk processes all arrests occurring in the district. The Waianae station houses officers who work in the Ma`ili, Waianae, Makaha, Keaau, and Kaena Point areas.

Traffic safety continued to be a major concern in the district. District 8 officers increased enforcement in areas that have a high incidence of speeding and other hazardous driving violations. More specifically, officers monitored and took enforcement action in areas such as Makakilo Drive, Fort Weaver Road, Keaunui Drive, Farrington Highway, and the H-1 Freeway.

The district's Burglary-Theft Detail and Crime Reduction Unit (CRU) addressed Burglary and Unauthorized Entry into Motor Vehicle (UEMV) crimes in the district. Surveillance, use of a bait

car, and concentrated traffic enforcement in areas with significantly greater occurrences of UEMVs resulted in arrests for UEMV, Unauthorized Control of a Propelled Vehicle, and various warrants. These efforts were successful in decreasing the number of reported UEMVs and burglaries.

The Community Policing Team worked with various Neighborhood Security Watches (NSW) and Citizen Patrols to enhance safety with the combined resources and cooperation of officers and local residents. By the end of the year, there were 83 active NSW programs that consisted of 4,824 members, 35 Citizen Patrols with 653 members, and 2 Mobile Patrols made up of 76 members.

The Weed and Seed Detail in District 8 continued to serve the Ewa and Ewa Beach communities. Some of the enforcement activities that the detail was involved in were truancy sweeps, warrant sweeps, illegal drinking enforcement at beach parks and playgrounds, bicycle/all-terrain vehicle patrols, and abandoned vehicle enforcement. The detail also held community events such as the "Movie on the Wall" at the Ewa Boys and Girls Club, water sports, the Campbell High School's Culinary Arts Summer Program, Graffiti Paint-Outs, and the "Pride for Ewa."

District 8 personnel also worked with various city and state agencies to address issues regarding illegal dumping in the Waianae and Ewa Beach areas, traffic management at Keaunui and Kolowaka Drives, and speeding motorists along Makakilo Drive and Farrington Highway.

Special Field Operations Bureau

CENTRAL RECEIVING DIVISION

The Central Receiving Division (CRD) is responsible for the detention of arrestees who are under investigation for felony offenses from both the Central and Regional Patrol districts. In addition, the CRD processes and provides custodial care for all arrestees from Districts 1, 6, and 7.

Providing security for the Alapai headquarters is another very important responsibility of the CRD. The division screens all building visitors and monitors and responds to fire, duress, and other emergency alarms throughout the building. To enhance the security of the Alapai headquarters, the CRD implemented an X-ray screening process for visitors' bags, briefcases, and other closed containers before the visitors are permitted to enter the building. Within the building, over 70 closed-circuit television cameras are monitored around-the-clock to safeguard the headquarters building and departmental personnel.

During 2006, the CRD personnel processed 17,761 arrestees, provided nearly 21,000 meals, and transported approximately 9,583 arrestees to the Sheriff's Department court lockup facility. In addition, CRD personnel assigned to the security post made 325 arrests and initiated 2,478 police incident reports.

The CRD is responsible for the maintenance of the department's 23 Intoxilyzer breath analyzers and the certification of over 600 police officers to operate the Intoxilyzer breath test instruments. During 2006, the CRD personnel administered the Intoxilyzer breath test to over 1,200 arrestees.

SPECIALIZED SERVICES DIVISION

The Specialized Services Division (SSD) performs a wide range of functions and consists of the Task Group, Bomb/Chem-Bio Unit, Helicopter Section, and Canine Unit. The division also serves temporary restraining orders (TROs) where weapons are involved, provides dignitary protection, and enters and secures sites where search warrants are being executed.

The Task Group includes the Special Weapons and Tactical (SWAT) teams. In 2006, SWAT teams responded to eight call-outs involving high-risk incidents. All of the incidents were resolved successfully without significant injury to the police

or innocent parties. A suspect in one of the incidents suffered a fatal gunshot wound from a marksman on the SWAT team. The SWAT teams also provided entry assistance for a total of 56 search warrants for the Narcotics/Vice and Criminal Investigation Divisions and various Crime Reduction Units.

The Canine Unit is comprised of dog and handler teams trained to detect explosives and narcotics. In 2006, the unit handled 18 calls for explosive detection (bomb sweeps), 18 calls for missing persons/fugitives, and 35 calls for demonstrations from schools and community groups.

The Bomb/Chem-Bio Unit is recognized as an accredited bomb unit by the Federal Bureau of

Investigation and continues to attend training and recertification classes to uphold their status. Participation in these scenarios provided the opportunity to work with other federal and state agencies as well as to test the Honolulu Police Department's level of preparedness. During 2006, the Bomb/Chem-Bio Unit responded to 18 calls for military ordnance; 9 calls for improvised explosive devices/suspicious packages; 18 calls for fireworks recoveries; 16 calls for suspicious/hoax devices; and 10 calls for demonstrations to recruit classes, schools, and business and community groups.

The Helicopter Section, based at the Honolulu International Airport, responded to 721 assignments to assist various elements throughout the year. For example, the section's missions with the Narcotics/Vice Division led to the recovery of 3,571 plants worth about \$3 million. Also, flights for the Criminal Investigation Division led to the recovery of 31 stolen vehicles with an estimated total value of \$194,700. The unit's contributions were recognized, and it received the Honolulu Police Department's Unit of the Second Quarter award.

In its commitment to reduce the incidents of domestic violence in the community, the division served firearms-related temporary restraining orders (TROs). As a result, throughout 2006, the SSD served 117 TROs in which 128 firearms were confiscated.

A new SSD bomb truck arrived on the island this year. While several discrepancies were detected, the division worked with various manufacturers to make the needed corrections. Completed final acceptance of the truck is scheduled for the year 2007.

TRAFFIC DIVISION

The Traffic Division investigates certain motor vehicle collisions and promotes the safe and efficient movement of traffic on public roadways through educational programs, traffic management, and the enforcement of traffic laws. In 2006, the division coordinated the department's traffic safety strategies to make Oahu's roadways safer. These strategies involved expediting the flow of traffic; enforcing vehicle occupant protection laws; streamlining traffic investigative procedures; and monitoring pedestrian safety, speeding, and impaired driver violations.

Throughout the year, the division's officers continued their commitment to improve pedestrian safety through the Walk Wise Hawaii campaign. As a result, officers issued 212 citations for various pedestrian and motorist violations. As a whole, the department gave 2,480 warnings and issued 2,136 citations in the year 2006. The Traffic Division was also the driving force behind the national "Click It or Ticket" campaign. Through the use of federal grant monies and aggressive enforcement, seat belt usage in Hawaii was 92.5 percent.

The Vehicular Homicide Section (VHS) investigates motor vehicle collisions involving death, critical injury, or felony traffic crimes. The officers in this section also review the investigations of major traffic collision cases to ensure their proper disposition and closure. During 2006, the VHS investigated 82 collisions that resulted in 90 traffic fatalities. Innovative techniques and technology for investigative efficiency continued to be pursued by officers of the section as they received new equipment and training for the Sokkia Forensic Mapping Program (a program that allows traffic crime scenes to be mapped expeditiously).

The Selective Enforcement Unit, with its Drug Recognition Expert Detail, looks for impaired drivers at locations and times known to be particularly dangerous. These areas are shown by trends in fatal and critical motor vehicle collisions where drugs or alcohol were found to be contributing factors.

This past year, the unit made 497 arrests for Operating a Vehicle Under the Influence of an Intoxicant (OVUII). Total arrests made in 2006 for OVUII by the department was 3,862.

The Parking Enforcement and Collection Section (PECS) enforces parking laws and is responsible for the collection of coins from city parking meters as well as the maintenance and proper operation of the units. The parking enforcement officers issued a total of 52,480 parking and related citations in 2006; an average of about 4,373 a month. The PECS collected over \$5.2 million from parking meters. The disabled parking enforcement program is staffed by volunteers who are trained and commissioned by the department and who issued 1,962 citations by the end of the year 2006.

In November 2006, the Solo Motorcycle Detail and the department grieved the loss of Officer Steve Favela who was involved in a fatal motor vehicle collision while providing dignitary motorcycle escort for President George W. Bush.

HOMELAND SECURITY DIVISION

The Homeland Security Division (HSD) provides support during major events and establishes and facilitates interagency communications during such events. It also coordinates site and threat assessments and acquires and manages resources to prevent and respond to acts of terrorism. In addition, the division coordinates and participates in joint training with federal, state, and other local agencies.

In 2006, the HSD provided input for the City and County of Honolulu's interoperable communications plans. Along with the Honolulu Fire Department, the HSD helped plan the city's Communications Table Top and Full Scale Exercises training event in 2006.

Investigative Bureau

CRIMINAL INVESTIGATION DIVISION

The Criminal Investigation Division (CID) consists of nine details which investigate cases involving murder, robbery, sexual assault, assault, domestic violence, child abuse, financial fraud and forgery, auto theft, and white collar crimes. In the course of these investigations, divisional personnel have partnered with other law enforcement agencies and the community to assist the victims and their families. The division strives to nurture these partnerships by keeping the community updated and by increasing public awareness in an effort to help prevent crimes.

In 2006, the Homicide Detail investigated 18 homicides and closed 15 cases with arrests or conferrals with the city's Department of the Prosecuting Attorney. This raised the closing rate slightly from 80 percent in 2005 to 83 percent this past year. In addition, the detail investigated 771 Unattended Death cases; 141 of these cases warranted assignment to a homicide detective team for further investigation.

The Robbery Detail continues to work with the Federal Bureau of Investigation; the Bureau of Alcohol, Tobacco, Firearms and Explosives; and the U.S. Attorney's Office through the Honolulu Violent Crime Task Force. The cross-deputized status of officers in the task force allowed cases to be federally prosecuted. In 2006, the joint effort of the various agencies in the task force resulted in the solving of 36 of 41 bank robberies on Oahu. In addition, 36 cases were presented to the U.S. Attorney's Office.

A special unit was formed within the Sex Crimes Detail to identify and prosecute individuals who violate the requirement for all sex offenders to register with the department. The unit initiated over 250 cases in year 2006 and investigated hundreds more that were found to be de minimis value for prosecution. In October 2006, the unit applied for and received money from the Justice Assistance

Grant Program. The monies will fund personnel hours, crime laboratory tests, and new equipment such as laptop computers; all of which will assist with these cases.

This year, the Auto Theft Detail focused on shutting down "chop shops" and targeting major offenders. One of the tools used against major offenders was the expansion of the auto theft prevention program called "Pit Stop." Through this program, all suspects arrested for Unauthorized Control of a Propelled Vehicle in the Pit Stop designated area are charged for the offense. The area expanded in 2006 from District 3 (Pearl City) to District 1 (Honolulu) and District 5 (Kalihi), thereby including the H-1 Freeway which runs through heavily populated areas in Honolulu.

Using available, advanced technology, the Auto Theft Detail also began a proactive program with license plate readers. The readers are hand-held radar guns that scan license plates and automatically relay and compare information to a database of stolen vehicles. Combining an officers' initiative with technology will result in a much quicker way to identify and recover stolen vehicles as well as apprehend suspects. Testing of available models began in 2006, and implementation is scheduled for 2007.

As a member of the Hawaii Anti-Trafficking Task Force, the Major Crimes Detail focused its efforts this year on public awareness, training, and protocols for assisting victims. Training for some patrol officers was also conducted by the detail so that patrol units could more effectively recognize and report incidents of human trafficking. Plans are in place for the detail to expand the training to include all patrol officers throughout the island.

The Missing Persons Unit handled 844 cases in 2006. An excellent average recovery rate of 95 percent was achieved by the three investigators assigned to this unit. Missing person's cases

throughout the year involved 160 cases of individuals afflicted with Alzheimer's disease or dementia and about 280 cases of individuals with other various mental disorders.

JUVENILE SERVICES DIVISION

The Juvenile Services Division (JSD) addresses issues involving the safe and healthy development of the community's youth through a variety of prevention, education, and intervention efforts. In addition, the division conducts follow-up investigations of reported runaways. As an extension of the various programs in the JSD, divisional personnel frequently provide guidance and leadership presentations at schools, community organizations, and special events.

The Drug Abuse Resistance Education (DARE) curriculum is nationally certified to help students recognize and resist the temptation to experiment with drugs and alcohol. This ten-week program is taught in 136 public and private schools to a total of 16,430 fifth-, eighth-, and tenth-grade students. More than 10,000 students took an oath to be drug free at the JSD's organized DARE Day in May 2006. As the single, largest DARE event in the United States, the event was recognized by DARE America for its impact on school youths.

The officers assigned to the Gang Resistance Education and Training (GREAT) Detail presented a ten-week curriculum in 26 public middle schools and reached a total of 6,300 students throughout Oahu. The program is designed to educate middle school students about the law and delinquent behavior and to provide alternatives to gang membership. For example, a partnership with the Department of Parks and Recreation helped to provide a GREAT program for summer fun students at the elementary school level. Also in May 2006, a popular graduation dance was held for roughly 2,300 seventh graders at the Neil Blaisdell Exhibition Hall. In cooperation

with the Department of Education, the GREAT Detail's School Attendance Program held Saturday morning classes to educate nearly 785 at-risk juveniles and their parents about truancy.

The Police Activities League (PAL) program promotes the concepts of friendly sportsmanship, fair play, friendship, sociability, and goodwill for its participants. Over the years, the PAL program has worked to expand beyond traditional, organized athletic programs to include activities such as cooking; canoe paddling; and the department's Law Enforcement Explorers Program, a division of the Boy Scouts of America. These activities provide more opportunities for at-risk youths so that they may also benefit from teamwork, camaraderie, and nontraditional athletic competition.

During 2006, over 10,000 juveniles participated in 12 different PAL activities. Sixty Explorers were trained in traffic and crowd control, bicycle patrol, and patrol procedures. These Explorers volunteered at 66 community service events, such as the Keiki Identification Programs.

The Runaway Detail is responsible for investigating reported runaways. In 2006, 1,367 cases were assigned to the detail for further investigation, which resulted in 502 apprehensions. The Runaway Detail is also responsible for the administration of the Acquiring Knowledge, Awareness, Motivation, and Inspiration (AKAMAI) program, a diversionary program geared toward first-time status offenders.

They counsel juveniles and their parents about the hidden dangers of status offenses and the lifelong implications of making inappropriate choices. The AKAMAI program is administered through partnerships with the Honolulu Police Department, Parent Project, Hawaii Army National Guard Youth Challenge, Youth Outreach, Mothers Against Drunk Driving, Victory Ohana, and Hale Kipa. AKAMAI sessions are held at the Alapai headquarters, Kapolei Police Station, and Waipahu Middle School. During 2006, approximately 1,060 families were referred to the AKAMAI program compared to 730 families in 2005.

Tobacco enforcement programs conducted by the division resulted in the inspection of 1,051 establishments and the issuance of 128 citations. Alcohol enforcement efforts by the JSD resulted in the inspection of 374 businesses and the issuance of 63 citations. The division's five Alcohol Sweep operations yielded 29 arrests and 40 citations.

NARCOTICS/VICE DIVISION

The Narcotics/Vice Division is responsible for the enforcement of laws, ordinances, and regulations relating to gambling, morals, and narcotics offenses. In 2006, the Honolulu Police Department (HPD) continued to participate in the High Intensity Drug Trafficking Area (HIDTA) program. The HIDTA task forces are comprised of federal, state, and county law enforcement officers who focus on the interdiction of narcotics at Hawaii's points of entry and the disruption or dismantling of major drug trafficking organizations. One task force initiated 36 federal investigations and made 48 arrests for federal prosecution that resulted in the seizure of 10 firearms, 11 vehicles, and over half a million dollars in cash and other assets.

The division's Hawaii Interagency Mobile Police Apprehension Crime Task Force (HI-IMPACT) Detail primarily conducts long-term undercover investigations. These investigations target high-

level drug trafficking organizations and individuals with local and mainland affiliations. During 2006, the HI-IMPACT Detail initiated 261 investigations, executed 37 search warrants, and made 97 arrests. The detail worked with various agencies such as the Federal Bureau of Investigation (FBI), Drug Enforcement Administration (DEA), and other county police departments on four noteworthy investigations. These investigations resulted in the recovery of approximately 25 pounds of crystal methamphetamine valued at roughly \$2.5 million, 18 dangerous weapons, 20 vehicles, 105 marijuana plants, 10 pounds of cocaine, 5,100 Ecstasy tablets, and \$2.5 million in currency and assets.

The Marijuana Eradication Team is comprised of four officers who conduct investigations related to the cultivation and distribution of marijuana. Their efforts on Oahu resulted in the eradication of 5,000 outdoor plants and eight arrests in the year 2006. Ten search warrants executed by the team yielded over 100 pounds of processed marijuana, one rifle, four vehicles, and over \$10,000 worth of assets. As a member of the DEA's Domestic Cannabis Eradication and Suppression Program, the team participated in more than 30 eradication missions statewide. In 2006, the team began developing new skills through medical training, helicopter hoist operations and advanced operations, and man-tracking courses.

In 2006, the Morals Detail addressed the use of Internet technology as a means of furthering prostitution activity. Joining forces with the Internal Revenue Service, the detail made attempts to dismantle prostitution operations by targeting prostitution organizations and their related business transactions. Through their day-to-day operations, 229 individuals were arrested for prostitution offenses. Of these 229 arrests, 157 were adult females, 67 were adult males, and 5 were juveniles.

On October 20, 2006, a large-scale prostitution operation that spanned eight locations throughout Waikiki and Central Honolulu was conducted with the assistance of several government agencies. Seventeen people were arrested, and 30 charges were made for various prostitution-related offenses.

The Gambling Detail adopted a new strategy in 2006 to address the many cockfights that occur throughout Oahu. Instead of one-time operations that require exhaustive planning and coordination, more time was spent in the execution of multiple raids that were held simultaneously or in rapid succession at numerous locations. During 2006, the detail received 66 complaints and closed 78 complaints (some closures were cases received in 2005). Numerous investigations of cockfighting, bookmaking, arcade gambling machines, etc., resulted in the seizure of about \$32,600 in cash and more than \$28,000 in property. By the end of the year, the detail made 56 arrests for gambling-related activities and confiscated 45 gambling machines.

The Asset Forfeiture Detail investigated 440 cases during the year. Seizures under chapter 712A of the Hawaii Revised Statutes amounted to nearly \$300,000 in cash and more than \$120,000 in property; 84 vehicles were also seized. The Asset Forfeiture Detail continued to assist officers of the HPD as well as outside agencies, such as the city's Department of the Prosecuting Attorney, the DEA, the FBI, and mainland police departments.

SCIENTIFIC INVESTIGATION SECTION

The Scientific Investigation Section (SIS) continues to contribute to the Combined DNA Index System (CODIS), which consists of DNA types of convicted offenders. The Federal Bureau of Investigation (FBI) handles the maintenance of the CODIS. The evidence analyzed by the laboratory for DNA types will be automatically uploaded in the CODIS if the data meets the minimum criteria defined by the FBI.

A recent law requires all convicted felony offenders to provide a biological sample for the purpose of including them in the national database. The SIS and the state Department of the Attorney General are actively working in partnership to collect and upload all of the DNA types.

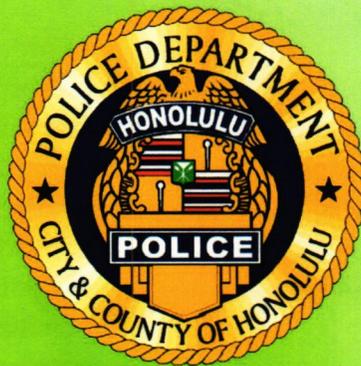

Forensic Quality Services-International conducted an external audit of the DNA/Serology Unit from November 28 to 30, 2006. In addition, the SIS underwent its first Grant Progress Assessment, a mandatory requirement of the Department of Justice. Auditors were brought in to review and evaluate the documents for a DNA No-Suspect Grant and a DNA Capacity Enhancement Grant. Not only were there no negative findings, auditors were pleased with the section's overall record keeping.

Grant funding of \$224,098 from the DNA Backlog Reduction Program provided the means to send out 21 homicide cases and 2 sexual assault cases for analysis. Results that meet the FBI criteria will be uploaded into the CODIS.

Other grants greatly assisted in the acquisition of new equipment as well as the updating of other items. A biohazard hood, notebook computers, centrifuge, and shaking water bath were purchased through the DNA Capacity Enhancement Grant. In addition, a robotics system for DNA analysis, linear light source, ultraviolet illumination cabinet, and static dust lifter are just some of the equipment acquired through the Bureau of Justice Assistance grant.

In 2006, SIS personnel attended training courses and conferences, such as the American Academy of Forensic Sciences, Crime Scene Processing Workshop, Introduction to Hairs and Fibers course, and Digital Photography for Law Enforcement class, to improve and enhance the value of their section.

Administrative Bureau

FINANCE DIVISION

The Finance Division oversees the Honolulu Police Department's (HPD) annual operating budget, which amounted to \$176.4 million for fiscal year 2006. The budget covers all salaries, current expenses, and equipment purchases. Additionally, the division oversees the operation of the Property and Supply Section and the Publications Unit.

The division also coordinates, manages, and monitors approximately 40 federal and state grants totaling approximately \$23 million. These grants enhance programs and property acquisitions such as the Computer Aided Dispatch System, mobile data computers, homeland security, drug trafficking, bulletproof vests, marijuana eradication, sobriety checkpoints, speed and safety belt enforcement, pedestrian safety, youth programs and services, upgrades to forensic equipment, violence against women and children, and alcohol and tobacco programs. The division continually seeks grant funds from federal, state, private, and public foundations in order to enhance current and future innovative programs for the HPD.

HUMAN RESOURCES DIVISION

The Human Resources Division (HRD) is responsible for administering all personnel matters, including recruitment and hiring, labor relations and union issues, special duty jobs for off-duty police services, investigations of sexual harassment and discrimination complaints, and the Drug Urinalysis Screening program.

A Fair Labor Standards Act (FLSA) lawsuit was settled in 2006, and departmental policies were amended accordingly.

The Career Center celebrated its fifth anniversary and the center continued to make the filling of vacant positions a high priority. Efforts also continued in the quest to fill police radio dispatcher and other civilian positions. As of December 2006, the authorized strength of the department was 3,049 (2,112 police officers, 360 police recruits, and 577 civilian personnel). The department's actual strength was 2,520 (1,903 police officers, 137 police recruits, and 480 civilian personnel). Resulting net vacancies were 9 percent for officers and 3.4 percent for civilian personnel.

By the end of 2006, 182 metropolitan police recruits were hired throughout three training classes. Six entry-level examinations for police recruit positions were administered in Honolulu, and two examinations were administered on the mainland.

The police psychologist became one of only 56 psychologists in the nation to be recognized as a diplomat in the field of police psychology. In addition, the department became one of only two law enforcement agencies in the nation to have a formal fellowship program in police psychology.

TRAINING DIVISION

The Honolulu Police Department's Training Academy, Ke Kula Maka'i, is located at 93-093 Waipahu Depot Street in Waipahu. The Training Division focuses on four main areas: recruit training, annual recall training (ART), executive training, and specialized training for personnel in units requiring specific skills.

Over 1,000 hours of instructions over 28 weeks constitute the current curriculum for police recruits. Police recruits are taught police organization, law, communication, police procedures, and functional skills. In 2006, the Training Division graduated 108 new officers from three recruit training classes.

The division's training program is divided into two curricula: the functional skills curriculum and the administrative curriculum. Each curriculum is managed by a lieutenant and is assigned several sergeants and officers in each unit. The functional skills curriculum includes the following courses: Control and Arrest Tactics, Emergency Vehicle

Operations Course (EVOC), Fit for Life, Firearms, and ART. The administrative curriculum includes the following courses: Accreditation, Administration, and Recruit Training.

The ART I session consists of mandatory training regarding firearms, sexual harassment, bloodborne pathogens, hazardous materials, automated external defibrillator, and cardiopulmonary resuscitation. Patrol officers attend a three-day, 36-hour ART I session and non-patrol officers attend a three-day, 24-hour ART II session. In 2006, the Training Division held 32 ART I sessions for 1,065 patrol officers and 20 ART II sessions for 736 non-patrol officers.

Executive training was provided by the division for all officer and civilian equivalents that are of the rank of captain and above. In November 2006, two classes in particular were provided for departmental executives. One was the Emotional Survival for Law Enforcement that was attended by 127 executives who received instructions on keeping employees committed and engaged. Another was the Ethics-based Policing class in which 129 executives covered strategies to avoid and deter improper employee behavior.

The division holds specialized training courses to enhance career development and patrol skills. The Supervisory Training Regimen in Preparation and Education of Sergeants (STRIPES) course is a two-week program that prepares candidates for their roles as supervisors. Lieutenants attend a three-day Lieutenants Training Session to further their leadership and management skills. During the 2006 year, 58 officers attended the STRIPES course. In order to improve teaching methods and set training standards, seven officers attended a 24-hour Instructor Development Course. The division also conducted a 40-hour Police Radio Dispatchers (PRD) class for 10 new PRDs.

In addition to the firing range and EVOC track, the Training Division utilizes shooting and driving simulators for recruit training and ART to test and improve the officers' decision-making skills through the use of "real-life" scenarios.

As a critical component of the electric gun program, the division certified nine additional officers to be electric gun instructors and 234 additional officers to carry the gun. In September 2006, 201 electric guns were delivered for distribution to patrol districts and the Central Receiving, Specialized Services, and Traffic Divisions.

The Training Division continued to use a wireless report writing, computer training system for recruits. The wireless system involves the installation of fiber-optic cabling and access-point antennas to provide wireless (802.11 b/g) connectivity throughout the campus. Wireless coverage expanded to include the Criminal Investigations Building, and planning began

to include the K-9 building in the future.

After the groundbreaking for an indoor pistol range at the academy, progress on the \$7 million project continued throughout 2006; and the range is now slated for completion in the year 2008. With 30 firing points, a gunsmith shop, a classroom, and an arsenal, the new range will have the capability to accommodate firearms qualifications for day and night operations personnel.

To promote superior public safety training academy standards and recognize professional excellence, the division executed an accreditation agreement with the Commission on Accreditation for Law Enforcement Agencies, Inc., to seek accreditation for the Public Safety Training Academy Accreditation Program. After meeting 166 accreditation standards with no discrepancies, the accreditation process culminated with a formal award that was presented to the division in Florida on March 25, 2006.

Support Services Bureau

COMMUNICATIONS DIVISION

The Communications Division receives emergency requests and dispatches emergency services throughout the island. The division serves as the primary public safety answering point for all 9-1-1 calls on Oahu. It also serves as the Hawaii State Warning Point for all civil defense emergencies such as tsunamis, enemy attacks, or other disasters. In 2006, the division handled over one million calls, of which 73 percent (737,878) were for police services. The rest of the calls were for the Honolulu Fire Department (52,705), the Honolulu Emergency Services Department (75,584), and miscellaneous events (139,642).

On October 15, 2006, the division relocated its operations to the Alternate Communications Center at Kapolei for two months during a construction project at the Alapai headquarters. Minutes after operations went live in Kapolei, an earthquake of a 6.6 magnitude caused power disruptions throughout Oahu. During the power outage, the 9-1-1 service to the community was uninterrupted due to backup generators and other critical equipment.

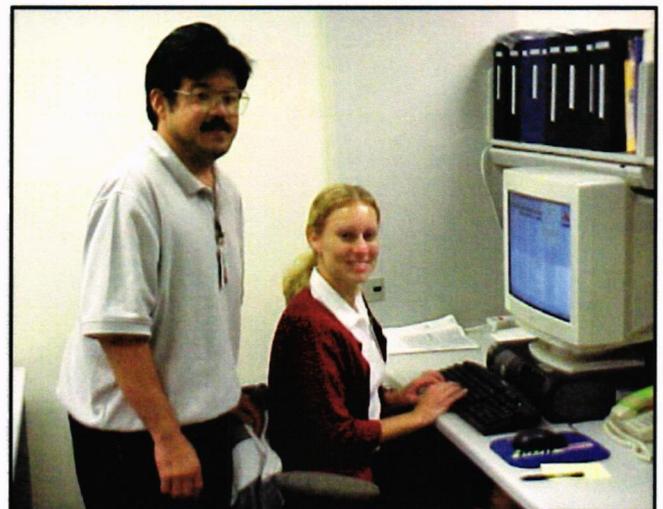

On December 15, 2006, the division returned to its newly renovated operations area at the Alapai headquarters. The \$1.6 million project had redone nearly everything from the carpet to ceiling. Divisional personnel now have personal filter fans, wide-screen monitors, brighter overhead lighting, etc.

A new GeoLynx mapping computer system was implemented to enhance the processing of wireless 9-1-1 calls via global positioning system coordinates. Oahu will deploy the enhanced wireless 9-1-1 system in early 2007.

INFORMATION TECHNOLOGY DIVISION

The Information Technology Division (ITD) provides technical and research support for the entire department. The division consists of the Data Section; Research Section; and Deployment, Development and Training Section. The division assists with the department's computer and software systems, conducts research, analyzes crime data, and maintains a sophisticated information management system.

The Data Section's primary responsibility is to develop and support the department's information technology and related systems and provide data communications and information for departmental operations. Technical support is provided by the division 24 hours a day, 7 days a week, through the Help Desk and standby services. In 2006, data personnel completed over 3,500 calls for service in support of the department's approximately 1,700 computers and related equipment.

The Research Section provides analytical and statistical research for the department. Services include accreditation support, annual reports, crime information, and special research projects. In addition, the section is responsible for maintaining and revising the department's directive system and conducting research for changes in uniform and equipment.

The Development, Deployment, and Training Section bridges the gap between operations and technology. By identifying needs and deficiencies involving technology at the operational level, the section is able to develop technological solutions into practical tools for field and investigative officers.

Program and project highlights for 2006 include the automated field reporting (AFR) paperless transfer of police reports directly from mobile data computers (MDC) to the Records Management System (RMS) and the Document Imaging System. The division was instrumental in establishing the MDC Lifecycle Leasing Program, a landmark procurement process that provides for the ongoing support of departmental MDCs. The CrimeView Geographic Information System mapping was deployed in all police patrol districts to enable crime analysis and other mapping applications to support field operations. A Web site was established to provide information regarding an officer's caseload, a 24-hour log of reported incidents and locations, and other information related to the Computer Aided Dispatch System.

Working in partnership with commercial service providers, the ITD ensured that uninterrupted coverage was maintained and disaster recovery was implemented for police operations during serious incidents or natural disasters. This was evident when no appreciable degradation of overall police field data and communications occurred during the power outage that resulted from an earthquake in October.

Teaming with the Scientific Investigation Section, the ITD coordinated with the Office of the United States Attorney for Hawaii to provide crime scene forensics training for personnel of the U.S. Army's 25th Infantry Division to support their overseas deployment.

RECORDS AND IDENTIFICATION DIVISION

The Records and Identification Division consists of seven major sections: Records, Identification, Evidence, Warrants, Firearms, Follow-Up, and Alarm Tracking and Billing. The division maintains records for all known police offenses. The division is also responsible for the service of warrants, registration of firearms and alarms, handling of evidence, and fingerprinting.

To meet current and future departmental needs, the division continued with the implementation and fine-tuning of the Records Management System. In June of 2006, the recently initiated automated field reporting system via mobile data computers (MDCs) for patrol units became a requirement islandwide.

A total of nearly 1,500,000 pages have been scanned throughout the years utilizing the Document Imaging system.

In 2006, the Evidence Room continued to use PropertyBureau.com to display auction items that have been recovered from various law enforcement agencies. A total of \$31,359 was collected from the on-line auctions throughout the year. Operations and facilities at the Hart Street bulk evidence room were improved in 2006 when shelving was fortified and a forklift for larger, heavier items was acquired.

During 2006, the Firearms Section processed 4,518 firearms permits and registrations. This section also processed 167 security guard firearm licenses and 30 Special Police Officer Commission licenses that included permits for the department's parking enforcement officers.

The Alarm Tracking and Billing Section is responsible for registering all burglar alarms in the City and County of Honolulu. Burglar alarm permits are issued and tracked by the section for excessive incidents of false alarms. Service charges are assessed if more than three false alarms occur within a year. Alarm owners are given the opportunity to attend a class given by the police department and alarm companies that cover the proper use of alarms. Currently, there are over 34,543 registered alarm users on Oahu.

The Identification Section initiated the conversion to the Live Scan Automated Fingerprint Identification System processing of arrested persons. This process eliminated the use and related problems of ink. The pilot program began at the Kaneohe Police Station in October 2006, and implementation throughout the rest of the department is anticipated some time in 2007.

LEGISLATIVE LIAISON OFFICE

The Legislative Liaison Office (LLO) is responsible for coordinating all legislative matters that affect departmental operations. During the 2006 legislative session, the LLO reviewed 6,544 bills and tracked more than 800 bills. The LLO was also responsible for tracking bills and resolutions that were heard before the City Council.

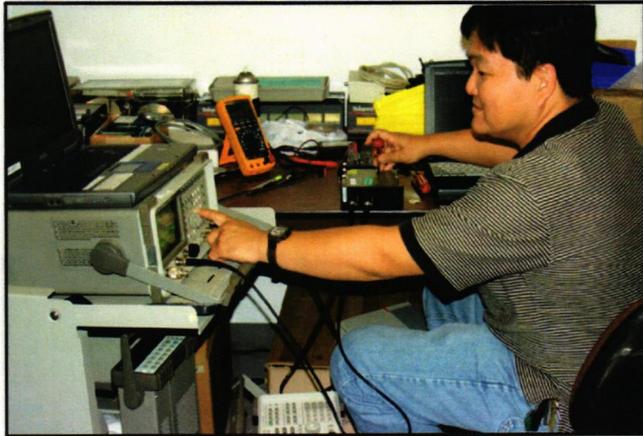

During the state legislative session, the LLO coordinates attendance and presentation of testimony at all hearings involving the department. The LLO also compiles and distributes pertinent legislative information to elements providing testimony.

The legislative liaisons provided classes for the Honolulu Police Department and other county police departments on recently enacted and modified state laws.

TELECOMMUNICATIONS SYSTEMS SECTION

The Telecommunications Systems Section (TSS) worked with the city's Department of Information Technology (DIT) and subcontractor, Dailey Wells Communications, to install additional capacity to the 800 MHz radio system. Increased channel capacity will help to support the interoperability between city, state, and federal agencies in the event of a major emergency. In addition to site equipment programming, the TSS performed a complete preventive maintenance inspection of the 800 MHz repeater system which included the expansion channels.

The TSS and Information Technology Division (ITD) implemented the pilot program for the new light emitting diode (LED) roof light bar and rear dash LED light for police subsidized vehicles. A little over a hundred subsidized vehicles in Districts 1 through 8 and the Traffic Division were equipped with the new lights.

With the help of Homeland Security grant monies, the TSS purchased and installed additional components of the C3 Maestro radio consoles and a T-1 interface unit at the Kapolei alternate dispatch center. As an alternate call center, the Kapolei communications facility would not have been able to sustain continuous, long-term use. The C3 Maestro radio consoles are designed for continuous, long-term use and to provide functions such as patching, simultaneous selecting, and programming talk groups.

The TSS assisted the Communications Division's dispatch center renovation project by removing and installing all of the radio hardware equipment and wiring, including the 800 MHz C3 Maestro radio consoles and other systems' equipment. During the renovation, the TSS reconfigured the 800 MHz switch and replaced the uninterrupted power supply for the radio and Computer Aided Dispatch system.

The software of the Voice over Internet Protocol (VoIP) backup radio system was upgraded to enhance the radio voice quality and reliability. Working with the ITD and the DIT, the TSS was involved in redesigning the Kapolei local area network system that supports the VoIP system.

In December 2006, the TSS assisted the DIT in transferring the 800 MHz radio communications circuits to the new digital microwave system. This new microwave system provides three times the

capacity for additional users, equipment, and add-on features over the previous microwave system.

VEHICLE MAINTENANCE SECTION

The Vehicle Maintenance Section (VMS) operates out of the Alapai headquarters and the police training academy in Waipahu. The section is responsible for maintaining the department's fleet of police vehicles. It is also responsible for the repair, maintenance, and deployment of the department's approximately 600 pieces of equipment that include patrol cars, motorcycles, auxiliary vehicles, trailers, and off-road equipment.

Filling the vacant positions created by separations, retirements, and promotions allowed the VMS to implement an advanced preventative maintenance program for the department's fleet vehicles.

During 2006, the VMS acquired approximately 61 patrol cars equipped with the latest light emitting diode roof light bars and rear dash deck lights to increase visibility and improve officer safety. In an effort to reduce repair costs and sustain a modernized fleet, the VMS disposed of 59 older patrol vehicles and 11 motorcycles.

Executive Office

COMMUNITY AFFAIRS SECTION

The Community Affairs Section (CAS) is responsible for coordinating and operating a number of the department's special projects and events. They include the departmental museum, Speakers Bureau, Mounted Unit, Reserve Officer program, Maka`i Video Productions unit, Ho`ike Information Line, Ride-A-Long program, Citizens Police Academy, Youth Citizens Police Academy, Business Police Academy, and numerous award ceremonies. The section also maintains the department's Internet Web site.

The museum houses exhibits that narrate the history of the Honolulu Police Department (HPD) from its inception through the present day. The museum is a popular stop for visitors touring the Alapai headquarters and had 2,691 visitors in 2006.

The Speakers Bureau coordinates and provides speakers to educate and inform the public about home and personal security, robbery and theft prevention, identity theft, child safety, traffic safety, drug awareness, domestic abuse, workplace violence, and disaster preparedness. In 2006, there were 899 requests for various speakers. Of those requests, the CAS handled 202 engagements.

The Mounted Unit adds a unique dimension to the department by providing high visibility patrol, crowd control, rural area searches, and assistance to the districts with projects in the beach areas. The unit made 65 appearances in 2006, educating 9,541 children and adults. Personnel in the unit assisted patrol divisions with 33 cases, assisted the Criminal Investigation Division with three searches, and were also involved in other various kinds of arrests. The unit received 12 commendations and 160 letters of appreciation throughout the year.

The Reserve Officer program enlists the services of qualified citizens to perform emergency police duties.

Reserve officers provide additional police protection to the public with emphasis on supplementing the patrol divisions. The Reserve Officer program has 100 authorized positions; however, there are only 72 active members at this time. The reserve officers work without compensation or financial obligation from the City and County of Honolulu. The reserve officers are assigned to a specific division where they work five hours a week. In addition to their regular assignments, they assist the CAS with various special events such as Police Week, Drug Abuse Resistance Education Day, Troy Barboza Torch Run, Memorial Day, Explorers' Conference, Honolulu City Lights Electric Light Parade, and the annual city employees' Christmas party. In 2006, the reserve officers provided the city with a total of 16,712 hours.

The Maka`i Video Productions unit provides audio-visual support for the HPD. They create and produce videos for the department's projects, functions, and events. The unit produced about 20 videos and assisted with over eight projects in 2006. The staff attended virtually every departmental function and continued to work on the following five projects/videos: On the Beat, the Chief's Message, the department's 75th Anniversary public service announcements, Interoperability Radio Use video, and Police Week 2007. The unit was also responsible for administering the grant for video streaming.

The Ho`ike Information Line at 529-3352 provides a contact point for the public to obtain answers or referrals for police-related questions. Anyone with questions can call on weekdays during normal business hours. The Graffiti Hotline at 529-3222 is available around-the-clock, providing the public with a direct line to report graffiti problems on public or private property. The Ride-Along program provides citizens a firsthand look at officers on the beat. The department provided 186 ride-alongs in 2006.

The Citizens Police Academy (CPA) holds yearly classes to open the lines of communication between the community and the police department. By enrolling in the CPA, members of the public gain firsthand experience on what it takes to become an officer. Participants learn about the educational, physical, and emotional demands that officers undergo. The heightened understanding can alleviate misconceptions about police work and foster a mutually respectful relationship between the public and the department. There have been 25 CPA classes since its inception in 1994, and a total of 473 men and women have graduated from the program.

The Youth Citizens Police Academy (YCPA) is open to high school sophomores, juniors, and seniors. The goal of the YCPA is to enhance the relationship between youth and officers. Training sessions give the students an introduction to the department, education in problem solving, and information about how to make decisions that modern youth face every day. There have been four classes since its inception in 2000, and a total of 60 students have graduated from this program. Those interested in information on the CPA or YCPA may call 529-3351.

The Business Police Academy (BPA) began in 2004, and classes are held annually. This interactive program is for members of the private and public sector. The BPA fosters "understanding through education" and helps to develop awareness for business people, thus enhancing the quality of life in our community. The BPA is a revolutionary approach to law enforcement, which helps develop awareness within the business community. Since its inception in 2004, 87 men and women have graduated from the program. For information on the BPA, interested parties may call 529-3351.

The CAS manages the department's Internet Web site at www.honoluluupd.org. The site includes a departmental overview and history, statistics, safety information, answers to frequently asked questions, and other useful information. The department can

be contacted via e-mail at hpd@honolulu.org. In 2006, the CAS received and responded to approximately 6,000 e-mails.

OFFICE OF ACCREDITATION

The Office of Accreditation is responsible for facilitating the compliance of operational policies and procedures with the Commission on Accreditation for Law Enforcement Agencies, Inc. (CALEA) accreditation standards. By ensuring that periodic reviews and reports are accomplished, the office prepares the department for future reaccreditations.

In March 2006, the department was presented with the CALEA TRI-ARC Excellence Award. This award recognizes agencies that hold all three CALEA Accreditation Awards: Law Enforcement, Public Safety Communications, and Public Safety Training Academy. The Honolulu Police Department is the first major metropolitan law enforcement agency to attain this triple accreditation and one of only two in the nation to have received this coveted award.

An on-site assessment was held in the spring of 2006 to reaccredit the department, and high marks as well as extremely positive comments were received from the CALEA inspection team. The process culminated with the department receiving its second accreditation award at the summer CALEA Conference in Lexington, Kentucky.

*A Celebration of Life
Officer Steve B. Favela*

April 18, 1976 to November 26, 2006

A stylized illustration of a coastal town at night. In the background, a large, rugged mountain is illuminated with a warm, golden light. The sky is a deep blue with soft, white and pinkish clouds. The middle ground shows a town with buildings and palm trees, their lights reflecting on the water. The foreground is a dark, calm body of water with some light reflections. The overall style is soft and artistic.

Statistics

Major statistics are presented on pages 57 through 70.

For purposes of presentation, statistics are categorized in different ways.

For instance, offenses are counted in two ways: actual and reported.

"Actual offenses" are defined according to the standards of the Uniform Crime Reporting program of the Federal Bureau of Investigation. Counts of actual offenses are a common measure of crime. The data that appear on pages 57 through 62 are based on actual offenses.

"Reported offenses" include unfounded complaints, which are screened out in the counting of actual offenses. Counts of reported offenses are a common measure of workload. The data on pages 63 through 70 of this section are based on reported offenses.

Seven serious offenses are used to define trends and make comparisons across the nation. These offenses are called index crimes, and data about them are drawn from the Federal Bureau of Investigation's Uniform Crime Reporting program. The offenses consist of four violent crimes (murder, forcible rape, robbery, and aggravated assault) and three property crimes (burglary, larceny-theft, and motor vehicle theft).

During 2006, a total of 41,055 index crimes occurred in Honolulu, a decrease of 9 percent from 2005. The number of indexed crimes are still lower than the number of crimes recorded in the mid-1970s. Violent crimes increased by 7 percent, with the number of robbery incidents accounting for the largest percentage increase (14 percent). Property crimes decreased by 10 percent, with the number of burglaries having the largest percentage decrease (12 percent).
