PREFACE

This traffic code was prepared in compliance with Hawaii Revised Statutes, Sections 46-2.1 and 46-2.2, and Section 3-205 of the Revised Charter of the City and County of Honolulu 1973 (1984 Edition).

This traffic code contains all of the amendments subsequent to the adoption of the "Traffic Code of the City and County of Honolulu 1976" through December 31, 1990.

Users are advised to refer to the provisions of Act 150, SLH 1971 (Statewide Traffic Code) because certain provisions which have been superseded by said Act have been eliminated from this traffic code. As renumbered, this code must be characterized as unofficial pending approval by the City Council of the complete Revised Ordinances as recodified. However, the substance is reflective of the law as it existed on December 31, 1990.

Users are also advised that the traffic code had been internally renumbered to conform its internal numbering system to that of the rest of the Revised Ordinances.

In addition, where there is a traffic problem which may be alleviated by an appropriate traffic control device, the director may conduct studies and design, fabricate and determine temporary traffic control devices which, in the director's opinion, may alleviate, relieve or eliminate the traffic problems; provided, that whenever such traffic control device is to be located, selected, installed or maintained, the director shall observe the procedures prescribed in subsection (c) hereof; and provided further, that the schedule shall be entitled "Temporary Traffic Control Device," and made a part of Article 6 hereof.

(B) Any temporary traffic control device shall not be in use for more than 30 calendar days; provided, that if any extension is necessary, the same procedures prescribed in subsection (c) hereof shall be observed with the publication thereof, containing a statement that this is an extension of the temporary traffic control device which was in effect on a specific date, including the cutoff date; provided, that at no time shall a temporary traffic control device be in effect in excess of 365 days.

schedule is to be attached to and made a part of Article 6 hereof.

(b) Standards To Be Observed by the Director.

(c) Procedure for Implementing.

- (1) The director shall amend existing schedules which are attached to and made a part of Article 6 hereof by deleting therefrom or adding thereto traffic control devices which are included in a schedule or adopt additional schedules which shall be attached to and made a part of Article 6 hereof whenever the director determines that an amendment of an existing schedule is not the proper vehicle for the location, selection, installation and maintenance of the traffic control devices including schedules which would make temporary traffic control devices permanent.
- (2) The director shall file with the clerk an original or adopting schedule and three copies of each type so they may be examined by the public.

 - (3) Lamps for the purpose of warning the operators of other vehicles of the presence of a vehicular traffic hazard requiring the exercise of unusual care in approaching, overtaking or passing. The lamps used to display such warning to the front shall be at least two in number, mounted at the same level and as widely spaced laterally as practicable, and shall display simultaneously flashing white or amber lights, or any shade of color between white and amber. The lamps used to display such warning to the rear shall be at least two in number, mounted at the same level and as widely spaced laterally as practicable, and shall display simultaneously flashing amber or red lights, or any shade of color between amber and red. The warning lights shall be visible for a distance of 1,500 feet under normal atmospheric conditions at night.
- (b) A stop lamp shall be plainly visible and understandable from a distance of 100 feet to the rear, both during normal sunlight and at nighttime, and a signal lamp or lamps indicating an intention to turn shall be visible and understandable during daytime and nighttime from a distance of 100 feet both to the front and rear. When a vehicle is equipped with a stop lamp or other signal lamps, such lamp or lamps shall at all times be maintained in good working condition. No stop lamp or signal lamp shall project a glaring or dazzling light.
- (c) All mechanical signal devices shall be self-illuminated when in use during the time between one-half hour after sunset and one-half hour before sunrise.
- (Sec. 15-19.13, R.O. 1978 (1983 Ed.))

Sec. 15-19.15 Head lamps.

- (a) Every motor vehicle operated upon a highway, other than a motorcycle or motorized scooter or bicycle, shall be equipped with at least two multiple-beam or single-beam head lamps, one at each side of the front thereof, which shall conform to the requirements and limitations prescribed herein; provided, that the provisions of this subsection shall not apply to trucks with restrictive stickers as prescribed in Section 15-19.5.
- (b) Every motorcycle operated upon a highway shall be equipped with at least one and not more than two multiple-beam or single-beam head lamps on the front thereof, which shall conform to the requirements and limitations prescribed herein.

(Sec. 15-19.15, R.O. 1978 (1983 Ed.))

Sec. 15-19.16 Multiple-beam road-lighting equipment.

Except as hereinafter provided, the head lamps, or the auxiliary driving lamps, or combinations thereof, on motor vehicles shall be so arranged that the driver may select at will between distributions of light projected to different elevations, subject to the following requirements and limitations.

- (a) There shall be an uppermost distribution of lights or composite beam, so aimed and of such intensity as to reveal persons and vehicles at a distance of at least 200 feet ahead for all conditions of loading.
- (b) There shall be a lowermost distribution of light, or composite beam, so aimed that:
 - (1) When the vehicle is not loaded, none of the high-intensity portion of the light which is directed to the left of the prolongation of the extreme left side of the vehicle shall, at a distance of 25 feet ahead, project higher than a level of eight inches below the level of the center of the lamp from which it comes.
 - (2) When the vehicle is not loaded, none of the high-intensity portion of the light which is directed to the right of the prolongation of the extreme right side of the vehicle shall, at a distance of 25 feet ahead, project higher than a level of three inches below the level of the center of the lamp from which it comes.
 - (3) In no event shall any of the high-intensity of such lowermost distribution of light or composite beam project higher than a level of 42 inches above the level on which the vehicle stands at a distance of 75 feet ahead.

- (c) Where one intermediate beam is provided, the beam on the left side of the road shall be in conformity with subsection (b)(1).
 - (d) All road-lighting beams shall be so aimed and of sufficient intensity to reveal a person or vehicle at a distance of at least 100 feet ahead.
 - (e) Every new motor vehicle registered in the City and County of Honolulu which has multiple-beam road-lighting equipment shall be equipped with a beam indicator, which shall be lighted whenever the uppermost distribution of light from the head lamps is in use, and shall not otherwise be lighted. Such indicator shall be so designed and located that when lighted it will be readily visible without glare to the driver of the vehicle so equipped.
- (Sec. 15-19.16, R.O. 1978 (1983 Ed.))

Sec. 15-19.17 Use of multiple-beam road-lighting equipment.

Whenever a motor vehicle is being operated on a roadway or shoulder adjacent thereto during the time between one-half hour after sunset and one-half hour before sunrise, the driver shall use a distribution of light, or composite beam, directed high enough and of sufficient intensity to reveal persons and vehicles at a safe distance in advance of the vehicle, subject to the following requirements and limitations.

- (a) Whenever the driver of a vehicle approaches an oncoming vehicle within 500 feet, such driver shall use a distribution of light or composite beam so aimed that the glaring rays are not projected into the eyes of the oncoming driver, and in no case shall the high-intensity portion which is projected to the left of the prolongation of the extreme left side of the vehicle be aimed higher than the center of the lamp from which it comes at a distance of 25 feet ahead, and in no case higher than a level of 42 inches above the level upon which the vehicle stands at a distance of 75 feet ahead.
- (b) The lowermost distribution of light specified in Section 15-19.16 (b)(1) shall be deemed to avoid glare at all times, regardless of road contour and loading.

(Sec. 15-19.17, R.O. 1978 (1983 Ed.))

Sec. 15-19.18 Single-beam road-lighting equipment.

Head lamps arranged to provide a single distribution of light not supplemented by auxiliary driving lamps shall be permitted on motor vehicles manufactured and sold prior to one year after December 31, 1948, in lieu of multiple-beam road-lighting equipment hereinabove specified, if the single distribution of light complies with the following requirements and limitations:

- (a) The head lamps shall be so aimed that, when the vehicle is not loaded, none of the high-intensity portion of the light shall at a distance of 25 feet ahead project higher than a level of five inches below the level of the center of the lamp from which it comes, and in no case higher than 42 inches above the level on which the vehicle stands at a distance of 75 feet ahead.
- (b) The intensity shall be sufficient to reveal persons and vehicles at a distance of at least 200 feet.

lamp on the front thereof projecting a beam of an intensity greater than 300 candlepower, not more than a total of four of any such lamps on the front of a vehicle shall be lighted at any one time when upon a highway. (Sec. 15-19.19, R.O. 1978 (1983 Ed.))

Sec. 15-19.20 Lights not required where obscured from view.

Whenever motor and other vehicles are operated in combination during the time that lights are required, any lamp (except tail lamps) which, by reason of its location on a vehicle of the combination, would be obscured by another vehicle of the combination, need not be lighted; but this shall not affect the requirement that lighted clearance lamps be displayed on the front of the foremost vehicle required to have clearance lamps, nor that all lights required on the rear of the rearmost vehicle of any combination shall be lighted. (Sec. 15-19.20, R.O. 1978 (1983 Ed.))

Sec. 15-19.21 Head lamps on motorized scooters.

- (b) Every motorcycle and bicycle with motor attached, when operated upon a highway shall be equipped with at least one brake which may be operated by hand or foot.
- (c) Every trailer or semi-trailer of a gross weight of 3,000 pounds or more when operated upon a highway shall be equipped with brakes adequate to control the movement of and to stop and to hold such vehicle, and so designed as to be applied by the driver of the towing motor vehicle from its cab; and such brakes shall be so designed and connected that, in case of an accidental breakaway of the towed vehicle, the brakes shall be automatically applied. - (c) Any authorized emergency vehicle may be equipped with a siren, whistle, bell or air horn capable of emitting sound audible, under normal conditions, from a distance of not less than 500 feet, and of a type approved by the director of finance; provided, that the use of such air horn shall be restricted to heavy fire equipment such as fire engines, ladder trucks and rescue trucks; and provided further, that such siren or air horn shall not be used except when such vehicle is operated in response to an emergency call or in the immediate pursuit of an actual or suspected violator of the law, in which latter events the driver of such vehicle shall sound the siren or air horn when necessary to warn pedestrians and other drivers of the approach thereof.
- (d) Any truck used to haul dirt, rock concrete or other construction material may be equipped with a horn, bell or whistle in the rear thereof, capable of emitting a sound audible under normal conditions from a distance of not less than 200 feet; such warning device, however, to be sounded only while the truck is backing up.

(3) At least two red cloth flags, not less than 12 inches square, with standards to support same.

(b) No person shall operate, at the time and under the conditions stated in subsection (a), any motor vehicle used in the transportation of flammable gases unless there are carried in such vehicle three red electric lanterns meeting the requirements above stated; and there shall not be carried in such vehicle any flares, fusees or signal produced by a flame.

(c) In the alternative, it shall be deemed a compliance with this section in the event the person operating any motor vehicle described in this article carries in such vehicle three portable reflector units on standards of a type approved by the director of finance. No portable reflector unit shall be approved unless it is so designed and constructed that it will reflect red light clearly visible for a distance of at least 300 feet under normal atmospheric conditions at

nighttime when directly in front of the lawful upper beams of head lamps.

(Sec. 15-19.34, R.O. 1978 (1983 Ed.))

- (b) Whenever any vehicle used in the transportation of flammable liquids in bulk or in the transportation of compressed flammable gases is disabled upon a highway at any time or place mentioned in subsection (a), the driver of such vehicle shall display upon the roadway the following lighted warning devices: One red electric lantern shall be immediately placed on the roadway at the traffic side of the vehicle, and two other red electric lanterns shall be placed to the front and rear, respectively, of the vehicle in the manner prescribed in subsection (a)(2).
When a vehicle of the type specified in this subsection is disabled, the use of flares, fusees or any signal produced by flame as warning devices is prohibited.
- (c) Whenever any vehicle of a type referred to in this section is disabled upon the traveled portion of a highway or the shoulder thereof, at any time when the display of fusees, flares or electric lanterns is not required, the driver of such vehicle shall display two red flags upon the roadway in the lane of traffic occupied by the disabled vehicle, one at a distance of approximately 100 feet in advance of the vehicle, and one at a distance of approximately 100 feet to the rear of the vehicle.
- (d) In the alternative, it shall be deemed a compliance with this section in the event three portable reflector units on standards of a type approved by the chief of police are displayed at the times and under the conditions specified in this section either during the daytime or at nighttime; and such portable reflector units shall be placed on the roadway in the locations as described with reference to the placing of electric lanterns and lighted flares.

No motor vehicle or other power vehicle or combination of such vehicles equipped wholly with pneumatic tires, which has a total gross weight, including vehicle and load, in excess of the following requirements shall be operated or moved upon any public road, street or highway within the City and County of Honolulu, except as hereinafter provided.

- (a) The total gross weight of any such vehicle or combination of vehicles shall not exceed that determined by the following formula:

" W " = $800(L+40)$; in which " W " is the total gross weight, including vehicle and load, and " L " is the distance in feet between the first and last axles of the vehicle or combination of vehicles."

- (b) The total gross weight upon any two or more consecutive axles of any such vehicle or combination of vehicles, when the distance between the first and last axles of said two or more axles is 18 feet or less, shall not exceed that determined by the following formula:

" W " = $700(L+40)$; in which " W " is the total gross weight imposed upon the highway by the group of axles under consideration, and " L " is the distance in feet between the first and last axles of the group of axles under consideration."

- (c) The total gross load imposed upon the highway by any single axle shall not exceed 24,000 pounds. For the purposes of this

subsection, axles placed in the same transverse plane which are closer than 42 inches shall be considered as one axle.

- (d) The total gross load imposed upon the highway by any one wheel, either single or dual mounting, shall not exceed 12,000 pounds.

(Sec. 15-21.1, R.O. 1978 (1983 Ed.))

Sec. 15-21.2 Limitation of weight and wear defined.

- (a) No vehicles equipped wholly or partly with metal tires or vehicles resting on any metal roller, wheel or other object or portion thereof in contact with the highway, the weight of which with its load exceeds 500 pounds upon any inch width of the tire, shall be operated on any highway; provided, however, that traction engines or tractors, the propulsive power of which is exerted not through wheels resting upon the ground but by means of a flexible band or chain known as a movable tract, shall not be subject to the foregoing limitations upon permissible weight per inch of width of tire, if the portions of the movable track in contact with the highway present a plane surface. Further, no vehicle or trailer which is equipped wholly or partly with metal tires or other hard non-resilient material shall be operated upon any highway unless a special permit for each such operation be first obtained from the director of transportation, department of transportation of the State of Hawaii, or the director's representative, in case of state highways, or from the director of transportation services, department of transportation services of the City and County of Honolulu, or the director's representative, in case of city and county highways.
- (b) No vehicle equipped with pneumatic tires, the weight of which with its load exceeds 800 pounds per inch of width per tire shall be operated upon any public highway.
- (c) No vehicle equipped wholly or partly with solid tires, other than metal, the weight of which with its load exceeds 600 pounds on any inch of the channel base width of the tire used thereon, shall be operated upon any highway. The total width of all the tires on any one wheel shall be deemed the width of one tire.
- (d) No vehicle equipped with solid rubber tires shall be operated upon any public highway if the thickness of any such tire is less than as shown in the following table:

Width of tire in inches	Minimum thickness
3 inches to 5 inches, inclusive	1
6 inches to 8 inches, inclusive	1½
10 inches and over	1½

- (e) No vehicle equipped with solid rubber tires shall be operated on any highway when the variation in width of the entire traction surface of any solid tire due to injury or wear exceeds 15 percent, or when the variation in thickness on any part of the traction surface exceeds 15 percent, or when any portion of the rubber is not securely attached to the channel base. No dual solid rubber tires shall be permitted to be used on any highway if there is an average difference greater than one-eighth inch between the outside diameters of each of the single tires composing the dual tire.

(Sec. 15-21.2, R.O. 1978 (1983 Ed.))

Sec. 15-21.3 Projecting loads on passenger vehicles.

No passenger-type vehicle shall be operated on any highway with any load thereon projecting beyond the extreme width of the vehicle, regardless of the nature of the property being transported. (Sec. 15-21.3, R.O. 1978 (1983 Ed.))

Sec. 15-21.4 Loads to be properly secured.

- (a) No vehicle shall be driven or moved on any highway, unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, shifting, leaking or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining the roadway.
- (b) No vehicle shall be driven or moved on any highway when any load thereon is not entirely within the body of the vehicle; provided, however, that this prohibition shall not apply if the load is securely fastened by means of clamps, ropes, straps, cargo nets or other suitable mechanical device to prevent such load from dropping onto the highway or from shifting in any manner and, further, that this proviso shall not be deemed to supersede the provisions of Section 15-21.3 of this article.
- (c) No vehicle shall be driven or moved on any highway with any load consisting partially or entirely of loose paper, empty cartons, crates, or any other material susceptible of being blown or carried by the wind, unless such load is entirely covered by tarpaulin, net, canopy or other suitable material, effectively preventing any part of such load from being blown or carried by the wind; provided, however, this paragraph shall not apply to any vehicle carrying a load consisting entirely of soil, sand, coral or gravel, if such load is wetted down to prevent particles thereof from being blown or carried by the wind.

(Sec. 15-21.4, R.O. 1978 (1983 Ed.))

Sec. 15-21.5 Trailers and towed vehicles.

- (a) When one vehicle is towing another, the drawbar or other connection shall be of sufficient strength to pull all weight towed thereby, and such drawbar or other connection shall not exceed 15 feet from one vehicle to the other except that the connection may be longer between any two vehicles transporting poles, pipes, machinery, or other objects of such structural nature as cannot readily be dismembered.
- (b) When one vehicle is towing another and the connection consists of a chain, rope or cable, there shall be displayed upon such connection a white flag or cloth not less than 12 inches square.
- (c) Trailers shall not be operated, permitted to be operated, caused to be operated or parked on public highways without the safety chain or chains (stay chain or cable) securely coupled to the motor vehicle to which it has been coupled for towing. The safety chain or chains shall not be coupled to the same coupling of the towing vehicle to which the tow bar is coupled. Each chain or cable and its accompanying coupling and mounting devices shall have an ultimate strength equal at least to the gross weight of the trailer. No more slack shall be left in the safety chain or cables than shall be necessary to permit proper turning. The safety chain or cable shall be so connected to the trailer and towing vehicle, and also

to the tow bar so as to prevent the tow bar from dropping to the ground in the event the tow bar or coupling should fail.

- (d) No asphalt kettle containing hot liquid asphalt shall be towed or otherwise moved upon the highway unless the kettle is no more than one-half full of liquid asphalt, the top has been securely fastened, and chunks of cold, hard asphalt have been added to the liquid asphalt in sufficient quantities to cool the asphalt to a semisolid state and minimize splashing. In no event shall an asphalt kettle be towed or moved along the public highway while the heating element is operating.

(Sec. 15-21.5, R.O. 1978 (1983 Ed.))

- (a) Any police officer having reason to believe that the weight of a vehicle and load is unlawful is authorized to require the driver to stop and submit to a weighing of the same by means of either portable or stationary scales, and may require that such vehicle be driven to the nearest public scales in the event such scales are within two miles.
- (b) Whenever an officer, upon weighing a vehicle and load as above provided, determines that the weight is unlawful, such officer may require the driver to stop the vehicle in a suitable place and remain standing until such portion of the load is removed as may be necessary to reduce the gross weight of such vehicle to such limit as permitted under this article. All material so unloaded shall be cared for by the owner or operator of such vehicle at the risk of such owner or operator.
- (c) Any driver of a vehicle who fails or refuses to stop and submit the vehicle and load to a weighing when directed by an officer or who fails or refuses to otherwise comply with the provisions of this section, is guilty of a misdemeanor.

(Sec. 15-21.6, R.O. 1978 (1983 Ed.))

Sec. 15-21.7 Liability for damage to highway or structure.

- (a) Any person driving any vehicle, object or contrivance upon any highway or highway structure shall be liable for all damage which such highway or structure may sustain as a result of any illegal operation, driving or moving of such vehicle, object or contrivance, or as a result of operating, driving or moving any such vehicle, object or contrivance weighing in excess of the permitted maximum weight but authorized by a special permit issued as provided in Section 15-21.12.
- (b) Whenever such driver is not the owner of such vehicle, object or contrivance, but is so operating, driving or moving the same with the expressed or implied permission of its owner, then such owner and driver shall be jointly and severally liable for any such damage.

(Sec. 15-21.7, R.O. 1978 (1983 Ed.))

Sec. 15-21.8 Width and height of vehicles restricted.

No motor vehicle or other power vehicle of a greater width than nine feet, including load, and a height of 13½ feet, shall be operated on any street or highway except under the provisions specified in this article. (Sec. 15-21.8, R.O. 1978 (1983 Ed.))

The director of transportation services shall issue such a permit only when it appears to said director's satisfaction that an emergency exists necessitating the issuance of such a permit.

(Sec. 15-21.10, R.O. 1978 (1983 Ed.))

Sec. 15-21.11 Restricting the use of Kaneohe Bay Drive.

Sec. 15-24.10 Parking for disabled persons.

(a) Application and Issuance of Disabled Parking Placards and Disabled Identification Cards. The following provisions shall govern applications for and issuance of disabled parking placards and disabled identification cards to disabled persons:

- (1) In order to be considered for issuance of a disabled parking placard and disabled identification card, an applicant must present a completed application form and a completed certificate of disability form to the director of transportation services. These forms shall be provided to applicants by the department of transportation services. The certificate of disability shall be completed by a physician licensed by a state, territory or commonwealth of the United States or the District of Columbia, and shall certify that the applicant is a disabled person, shall state the category of the disability under Section 15-2.18, shall state whether the disability is permanent or temporary, and if the disability is temporary, shall state the anticipated duration thereof.
- (2) If, upon review of the application and certification of disability, the director of transportation services determines that the applicant is a resident of the city and county and is a permanently disabled person, the director shall, upon receiving payment of the fees prescribed in subsection (a)(9), issue one disabled parking placard and one disabled identification card to the applicant.
- (3) Any person who has a special parking permit issued by the city, which is valid and effective on the effective date of the ordinance codified in this section, may be issued a new disabled parking placard and a new disabled identification card without submitting a new certificate of disability if such person qualifies as a "disabled person" as defined in Section 15-2.18 (a).
- (4) For the purposes of this section, a valid and effective disabled parking placard or disabled identification card issued by another county of the State of Hawaii shall be deemed a disabled parking placard or disabled identification card, whichever is appropriate, issued pursuant to this section.
- (5) Any disabled person who has been issued and possesses a current disabled parking permit or placard or equivalent permit or placard for a jurisdiction other than the State of Hawaii or any county thereof may, upon submitting proof thereof, upon application, and upon payment of the fee prescribed in subsection (a)(9), be issued a temporary

disabled parking placard and a temporary disabled identification card by the department of transportation services for up to six months. This paragraph shall not apply to persons who were Hawaii residents at the time of issuance of the permit or placard by a jurisdiction other than the State of Hawaii or a county of the State of Hawaii.

- (6) For the purposes of this section, a valid and effective disabled parking placard or permit issued by a jurisdiction in which the disabled person resides and on which is depicted the international symbol of access for the handicapped shall be deemed a disabled parking placard issued by the city. For purposes of this section, a valid and effective disabled identification card issued by a jurisdiction in which the disabled person resides which identifies the disabled person as the person to whom the disabled parking placard or permit was issued, shall be deemed a disabled identification card issued by the city. This subsection shall not apply to the placard, permit or identification card of a person who has been physically present in the city for six months or longer. For purposes of this section, "jurisdiction" includes any foreign country or political subdivision thereof, and any state, territory, commonwealth, trust territory, or possession of the United States and any political subdivision of any of them.
- (7) Whenever a certificate of disability indicates that a person is disabled but is not anticipated to be permanently disabled and that the anticipated duration of the disability exceeds one month, the temporarily disabled person may be issued a temporary disabled parking placard and temporary disabled identification card for a period of up to six months upon payment of the fee prescribed in subsection (a)(9). Temporary disabled parking placards and temporary disabled identification cards may be renewed for additional periods of up to six months so long as the person to whom they were issued continues to qualify as a disabled person. The department of transportation services may require the applicant for renewal of a temporary disabled parking placard and temporary disabled identification card to present a supplemental certificate of disability completed by a physician licensed by a state, territory or commonwealth of the United States, or by the District of Columbia, stating the estimated duration of the disability from the date of the supplemental certificate. When a person to whom a temporary disabled parking placard and temporary disabled identification card have been issued ceases to qualify as a disabled person, that person shall surrender the placard and identification card to the department of transportation services. For purposes of this section, except in this subsection, the term "disabled parking placard" shall include a temporary disabled parking placard, and the term "disabled identification card" shall include a temporary disabled identification card.
- (8) The disabled parking placard and the disabled identification card shall be subject to reapplication and review by the director of transportation services, every four years. The reapplication and review requirements and fees shall be identical to those governing the initial application for the disabled parking placard and disabled identification card.

- (9) The fee for the issuance or renewal of the disabled parking placard and disabled identification card, or the temporary placard and temporary identification card, shall be four dollars. Replacement of the placard or identification card, or both, in the event of theft, loss or destruction shall be four dollars.
- (10) The placards and identification cards issued pursuant to this section shall be in such form as is prescribed by statute and the rules of the state department of transportation.
- (b) **Parking Privilege, Metered Parking Spaces, Conditions.** Notwithstanding any other provision of this traffic code relating to the parking of motor vehicles, a disabled person or a person parking a motor vehicle or causing it to stand in connection with the transportation of a disabled person shall be entitled to park the vehicle or leave the same standing in any metered public parking space, area or zone, including any metered off-street parking facility, without payment of any parking charge and for longer than any time limit established for such parking space, area or zone, when it is otherwise lawful to do so, provided that the following requirements are complied with:
- (1) The disabled person operating or being transported in the vehicle being parked or left standing shall carry on his or her person, and present to any enforcement officer upon request, a current disabled identification card issued to that person by the director of transportation services.
- (2) The disabled parking placard issued by the director of transportation services shall be prominently displayed on the inside of the vehicle, either on the dashboard or on the visor, so as to be visible through the front windshield of the vehicle at all times when the vehicle is parked or standing as above permitted.

- (A) Any vehicle parked or standing in a zone in which the stopping, standing, or parking of all vehicles is prohibited or in a zone which is reserved for special types of vehicles;
- (B) Any vehicle left unattended for more than 24 hours on a public street or highway or in any off-street parking facility;
- (C) Any vehicle defined as a nonconforming vehicle pursuant to the standards of the department of finance, City and County of Honolulu; or
- (D) Any vehicle parked or standing in a parking facility not controlled by the City and County of Honolulu.
- (c) **Parking Spaces for Disabled Persons.**
- (1) The head of any department or agency of the city may designate disabled parking spaces on property within the jurisdiction of the department or agency by official signs. Where not in conflict with a contract, such spaces may be designated despite the property being temporarily within the control of a concessionaire. The signs shall include a statement warning violators that vehicles illegally parked in such parking spaces shall be subject to towing.
- (2) Disabled parking spaces designated pursuant to subsection (c)(1) may be used for parking and standing of motor vehicles by disabled persons, or by other persons in

connection with the transportation of disabled persons, provided that the following requirements are complied with:

- (A) The disabled person shall carry on his or her person, and present to any enforcement officer upon request, a current disabled identification card issued to that person by the director of transportation services;
 - (B) The disabled parking placard issued by the director of transportation services shall be prominently displayed either on the dashboard or visor, so as to be visible through the front windshield of the motor vehicle at all times when it is so parked or standing in a disabled parking space; and

- (3) No motor vehicle may be parked in or caused to stand in a disabled parking space except as permitted in subsection (c)(2).

The expense incurred in the removal and towing of such vehicle shall be borne by the registered owner of the vehicle.
- (d) **Nontransferability.** The disabled identification card and the disabled parking placard shall be nontransferable and no person shall park or cause to stand a motor vehicle in which is displayed a disabled parking placard except the disabled person to whom the placard was issued, or a person parking the motor vehicle or causing it to stand in connection with the transportation of the disabled person to whom the disabled parking placard was issued. No disabled person shall permit another person to use the disabled person's disabled parking placard or disabled identification card except that the disabled person's disabled parking placard may be used by another person when such use is in connection with the transportation of the disabled person.
- (e) **Suspension or Revocation of Disabled Parking Placard or Disabled Identification Card.**
- (1) Violation or noncompliance by a disabled person of any provision of this section shall constitute sufficient grounds for the immediate suspension of that person's disabled parking placard and disabled identification card by the director of transportation services for a period not exceeding six months or for the revocation by the director of transportation services of that person's disabled placard and disabled identification card for a period of not less than one year.
 - (2) The director of transportation services shall revoke the disabled parking placard and disabled identification card of any person who never was or no longer is a disabled person.
 - (3) In the case of any suspension or revocation pursuant to this subsection, the person to whom the disabled parking placard or disabled identification card was issued shall return same to the director of transportation services.
 - (4) Prior to the suspension or revocation of a disabled parking placard and disabled identification card issued pursuant to this section, the director of transportation services shall give the person whose placard and card are proposed to be

suspended (the "aggrieved party") 10 days' notice of the proposed suspension or revocation, stating the reasons therefor. Such notice shall be sufficient if mailed to the address stated upon the latest application submitted by the aggrieved party to the director of transportation services under subsection (a). The aggrieved party may demand a hearing on the proposed suspension or revocation at any time prior to the suspension or revocation by making a written demand therefor to the director of transportation services. Upon receiving such demand, the director of transportation services shall schedule a hearing on the proposed suspension or revocation before a hearings officer to be designated by the director of transportation services. Notice of the time and place of the hearing shall be given to the aggrieved party at least 10 days prior to the scheduled hearing. The notice of hearing shall be sufficient if mailed to the address to which the notice of suspension or revocation was mailed, unless the aggrieved party requests in writing that such notice be mailed elsewhere. Pending the hearing, if demand for a hearing has been made, the placard and identification card shall not be suspended or revoked. The hearings officer shall determine at the hearing whether there exists good cause under subsections (e)(1) or (e)(2) for the proposed suspension or revocation, and shall issue an order either suspending or revoking the aggrieved party's disabled parking placard and disabled identification card for a specified period or prohibiting such suspension or revocation. The hearing provided herein shall be a contested case hearing and, except as provided in this paragraph, the notice of, procedure for, and appeal from the hearing and order shall be as provided in HRS Chapter 91.

(f) Penalties.

- (6) Any person violating any other provision of this section shall be subject to a fine of up to \$100.00.

(a) The department of finance shall establish a permit program to identify special transit service vehicles, other than those operated by a special transit service under Article 4, Chapter 13, which may benefit from the stopping, standing or parking privileges under this chapter. Under the program the department shall issue a permit for a vehicle eligible under subsection (d) upon:

(1) Application by the registered owner of the vehicle or, if the registered owner is a partnership or corporation, by a partner or officer of or employee authorized by the partnership or corporation; and

 - (2) Require a permit holder to return a decal, the validity of which has expired, to the department.
- (d) To be eligible for a permit under this section, a vehicle shall be:
- (1) Under the registered ownership of a:
