CITY CLERK
HONOLULU, HAWAII

Dear City Council Members:

I would like to submit my written testimony.

I am a homeowner on Ahuimanu Rd., just over the bridge after the last running river, which is located very close to the proposed 'The Woods at Ahuimanu'. The bridge that I am referring to is already a culvert and has many times overflowed during the heaving rains, causing dangerous road and driving conditions.

As a homeowner, I am very concerned about the sewage, run-off and new culvert and strongly believe that the City Council should take this resolution to further consideration.

To put another culvert in the same vicinity of the existing culvert is a very dangerous situation. It will cause the foundation to become weak. Needless to say the possible collapse of the new culvert and existing culvert, which would cost the City a considerable amount to repair / replace and potential lawsuits.

Thank you for your time and consideration.

Sharee Lee
