CITY CLERK
HONOLULU, HAWAII

PLEASE DO NOT allow Bill ~~90~~² - providing individual water meters for
condo
owners - to proceed any further. The expense to the condo
associations,
not to mention the individual owners, would be astronomical and would
not
be that effective. Those who are concerned about water preservation
are
already taking steps to conserve. A water meter would only serve to
overburden owners who are already strapped with a host of expenses. We
already pay for our water through maintenance fees. Going the
individual
route would only put more of a burden on the associations which are
dealing with elevator, water heater and other repairs in aging
buildings.
It would really be a nightmare if this bill is allowed to become law.
Surely there are more reasonable alternatives to save water rather than
these draconian measures.

PLEASE DO NO PASS THIS BILL!
